**Teaching Students to Drive Their Brains** Donna Wilson 2016-06-28 If the difference between a student's success and failure were something specific you could teach, wouldn't you? Metacognition is exactly that—a tool that helps students unlock their brain's amazing power and take control of their learning. Educational researchers and professional developers Donna Wilson and Marcus Conyers have been exploring and using the explicit teaching of metacognition for years, and in this book they share a practical way to teach preK-12 students how to drive their brains by promoting the following practices: \* Adopt an optimistic outlook toward learning, \* Set goals, \* Focus their attention, \* Monitor their progress, and \* Engage in practices that enhance cognitive flexibility. Wilson and Conyers explain metacognition and how it equips students to meet today's rigorous education standards. They present a unique blend of useful metaphors, learning strategies, and instructional tips you can use to teach your students to be the boss of their brains. Sample lessons show these ideas in a variety of classroom settings, and sections on professional practice help you incorporate these tools (and share them with colleagues and parents) so that you are teaching for and with metacognition. Research suggests that metacognition is key to higher student achievement, but studies of classroom practice indicate that few students are taught to use metacognition and the supporting cognitive strategies that make learning easier. You can teach metacognition to your students, so why wouldn't you? This book shows you how.

Pearson FlexText, Microeconomics 2018-04-30 Pearson FlexText ...setting you up for success in school and at work The study of economics requires a different style of thinking from what you may encounter in other courses. Economists make extensive use of assumptions to break down complex problems into simple, analytically manageable parts. Our experience has taught us that what first-year economics students want most from a FlexText is help in mastering course material to do well on examinations. We have developed this FlexText to respond specifically to that demand.
