The Influence of Sea Power Upon History, 1660-1783 Alfred Thayer Mahan 1918 Today, war is more complicated than it has ever been. When considering military strategy, a commander must be aware of several theaters of war. There's ground strength, air power, naval combat and even cyber warfare. In the late 19th century, however, the true military might of a nation rested primarily on the strength of its navy. In 1890, United States Navy Captain Alfred Thayer Mahan published a book titled "The Influence of Sea Power Upon History." The monumental text addressed the importance of both military and commercial fleets in the success of a nation in war and peacetime. Mahan begins with a discussion of the elements he considers to be the key to a nation's success on the seas. He theorizes that a ground force could not sustain the pressure of a naval blockade. Mahan then applies his principles to wars of the past. He analyzes the use of a navy in various engagements and considers the resulting influence on the outcome of the wars. The book was readily accepted by commanders and tacticians all over the world and his principles and theories were utilized throughout the 20th century. His arguments, along with technological advances, were influential in the strengthening of the United States Navy. Presently, Mahan's work is considered the most important work on naval strategy in history.

The Do Boys Rick Ridgeway 2021-10-26 A life worth living is lived at the edges where it is wild Early in his

memoir, adventurer, mountaineer, writer, filmmaker, and environmentalist Rick Ridgeway faces an existential "fork in the road." "I was twenty-five years old, and somewhere in my reading I had run across a quote from Saint Thomas Aquinas: trust the authority of your instincts," he writes, his gut telling him to choose adventure over convention. What follows is a candid account of the many decision points in his life, from high school, when he pivoted away from family, to the events that led him to become part of The Do Boys, a "group of guys who go around having adventures." "We don't just talk about doing stuff," Rick remembers Yvon Chouinard saying. "We do it." The members of the posse expanded and contracted over the years, as did the activities they pursued, but always at the core were Yvon Chouinard, environmentalist and founder of Patagonia, and Doug Tompkins, environmentalist and founder of The North Face, and Rick. This story of Rick's life crosses continents, from North America to Asia, across South America and Africa, embracing adventures - climbing, surfing, kayaking, trekking - all along the way. It also chronicles Rick's growing love of the natural world, as well as his awareness of human proclivity to exploit it. "We all strive to protect what we love and protecting the beauty of wild nature from our species' aptitude to disfigure it would become a central focus for ...The Do Boys." It would also become the spine of this book, the thread that weaves through the friendships, the loves and the losses of a life lived "doing stuff" in the wildest and most remote corners of our planet. A master storyteller, this long-awaited memoir is the book end to Ridgeway's impressive list of publications, including Seven Summits (Grand Central Publishing, 1988), The Shadow of Kilimanjaro (Holt, 1999), and The Big Open (National Geographic, 2005).
