Encountering Land Grab Abhijit Guha 2022-04-28 Taking possession of private land for 'public purpose' by the eminent domain of the state is a global phenomenon, but it displaces and marginalizes the people at the local-level. The researchers have mainly dealt with this phenomenon either from the field, or from the archive. In this book, the author has studied the observable fact of land grab, or acquisition for industries in a particular locale of the West Bengal State by combining the field and archive in a unique mode through a multi-sited ethnographic 'journey'. Unlike the traditional anthropological ethnographies consisting of single 'tribes' or 'multi-caste villages', this vertical ethnographic voyage of the author led him to come across a group of dispossessed peasants in the villages, a bunch of files in the district land acquisition department, a rich text of proceedings in the West Bengal Assembly Library, the growing global literature on land grab, and also to reflect on his dialogues with the elected members of the parliamentary standing committee at New Delhi. Ethnography, for the author was the road map, which guided his journey in these apparently separate existential domains of land acquisition and throws new light on how development policies are made, and how they failed, and what were the lessons learnt. Please note: Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Quantitative Techniques for Management S. Jaisankar 2009 This book has been developed with a focus on the need to demystify the subject and make it easy for students to grasp the principles and details involved, and make it easily understandable to beginners exposed to the subject for the first time. An attempt has been made to explain things in a logical progression, in the simplest possible way so that neophytes may quickly grasp the concepts and methodology. A novel approach in the book is the illustrative use of computers with TORA package, as a problem-solving tool. In actual practice, situations arise with large and complex problems that are difficult to solve. At such times, using computers to solve problems gives fast and more accurate results. The chapters are arranged so as to progressively explain the workings of various models in actual practice through step-by-step procedures that so simplify and solve them, that even students from a non-mathematics academic background will grasp them quickly. Linear programming, the most powerful tool for managerial decision-making is covered elaborately, including thorough discussion of various LP methods and LP solutions, Duality in LP problems, sensitivity analysis, etc. Models in the book also use Linear Programming to reach solutions including those relating to transportation and transshipment, assignment, and Game Theory&illustrated with screenshots of a computer with a TORA package. Readers whether students, business executives, managers, researchers and academicians will find that the insights and knowledge obtained from the book will stand them in good stead in both academic as well as occupational pursuits.
