The collection of approximately 400 articles, alphabetically arranged and written by some seventy faculty members and alumni in addition to the author, covers all aspects of Princeton life in the past as well as in the present. Of special interest are the biographies of eminent Princetonians, including the University's presidents, well-known trustees, distinguished deans, famous alumni, and some of Princeton's most prominent and popular professors. Other articles in the book embrace a wide range of topics: histories of academic departments, programs, and research units; descriptions of the honor system, the preceptorial method, the four-course plan, and coeducation; a historical survey of the University's acquisition of land and the development of its campus, together with articles on its principal buildings; pieces on student activities; accounts of alumni activities; articles on athletics; portraits of notable personalities; and commentaries on a host of lighter topics such as the cane spree, beer jackets, the Faculty Song, the proctors, and Veterans of Future Wars. Among the most important articles are one summarizing Woodrow Wilson's Sesquicentennial address, "Princeton in the Nation's

Service," and a dozen others recording faculty and alumni achievements toward the goal encompassed by that phrase. Originally published in 1978. The Substance of Things Charles Capps 1990-01-01 Measure the amount of the Word of God within you; that is the measure of your faith! When the Word of God gets inside you, it creates an image in its own kind. When that image is perfected inside you, then you have faith. Charles Capps has written this powerful and anointed book to instruct you in how to perfect that image of faith inside you to help you increase your faith.

The Spiritual Universe Fred Alan Wolf 1999-01-01 Why do we believe in the soul? Does it actually exist? If so, what is it? Does it differ from the self? Is it part of the material world? Does it survive the body after death? In *The Spiritual Universe*, Fred Alan Wolf brings the most modern perspective of quantum physics to the most ancient questions of religion and philosophy. Taking the reader on a fascinating tour of both Western and Eastern thought, Wolf explains the differing view of the soul in the works of Plato, Aristotle, and St. Thomas--the ancient Egyptian's believe in the nine forms of the soul/ the Qabalistic idea of the soul acting in secret to bring spiritual order to a chaotic universe of matter and energy--and the Buddhist vision of a "nonsoul." And, Wolf mounts a defense of the soul against its modern critics who see it as nothing more than the physical body.

God and Stephen Hawking John C Lennox 2011-09-23 *The Grand Design*, by eminent scientist Stephen Hawking, is the latest blockbusting contribution to the so-called New Atheist debate, and claims that the laws of physics themselves brought the Universe into being, rather than God. In this swift and forthright reply, John Lennox, Oxford mathematician and author of *God's Undertaker*, exposes the flaws in Hawking's logic. In lively, layman's terms, Lennox guides us through the key points in Hawking's arguments - with clear explanations of the latest scientific and philosophical methods and theories - and demonstrates that far from disproving a Creator God, they make his existence seem all the more probable.

Jesus Christ - Quantum Physicist Dirk Schneider 2015-06-15 Does modern natural science suggest the existence of the Holy Trinity of Father, Son and Holy Spirit? How can we explain eternity and Heaven? Who is the Holy Spirit? Physicist Dirk Schneider beckons his readers to follow him on an enthralling journey of discovery over the course of which he comes up with an entirely new theory. In order to be able to explain the world we live in from the perspective of quantum physics, the existence of the Holy Trinity of Father, Son and Holy Spirit is apparently a necessity. Schneider's analysis uncovers surprising and easy-to-understand congruencies between the results of physics experiments and statements made in the Bible. What's more: the phenomena of quantum physics are easier to understand with the assistance of Biblical statements than they are without the Bible. Table of Contents

The Yoga of Time Travel Fred Alan Wolf 2012-12-20 Time travel is not just science fiction; it may actually be possible. Wolf draws on yoga and quantum physics to show that time is a flexible projection of mind. Cheating time, he says, is an ancient metaphysical idea from the Vedas having to do with moving through meditation to a place where time stands still.

God, Freud and Religion Dianna T. Kenny 2015-03-05 Choice Essential Read Did God create man or did man create God? In this book, Dianna Kenny examines religious belief through a variety of perspectives - psychoanalytic, cognitive, neuropsychological, sociological, historical and psychiatric - to provide a coherent account of why people might believe in God. She argues that psychoanalytic theory provides a fertile and creative approach to the study of religion that attempts to integrate religious belief with our innate human nature and developmental histories that have unfolded in the context of our socialization and cultural experiences. Freud argued that religion is so compelling because it solves the problems of our existence. It explains the origin of the universe, offers solace and protection from evil, and provides a blueprint about how we should live our lives, with just rewards for the righteous and due punishments for sinners and transgressors. Science, on the other hand, offers no such explanations about the universe or the meaning of our lives and no comfort for the unanswered longings of the human race. Is religion a form of wish-fulfilment, a collective delusion to which we cling as we try to fathom our place and purpose in the drama of cosmology? Can there be morality without faith? Are science and religion radically incompatible? What are the roots of fundamentalism and terror theology? These are some of the questions addressed in *God, Freud and Religion*, a book that will be of interest to psychoanalysts, psychologists and psychotherapists, students of psychology, psychoanalysis, philosophy and theology and all those with an interest in religion and human behaviour. Dianna Kenny is Professor of Psychology at the University of Sydney, Australia. She is the author of over 200 publications, including six books.

The Power! James Bramlett 2003-07-01

Behold a White Horse Cisco Wheeler 2009 "My people are destroyed for lack of Knowledge" (Hosea 4:6). This book is not meant for those who refuse to step out of their box, but instead cling onto their blinders, believing that the world is exactly as they have always been taught it is. Rather, it is specially written for those who discern that things are not exactly as they seem, and are dedicated to the pursuit of truth and knowledge. "For we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places"(Ephesians 6:12). "Behold a White Horse" is a roller coaster ride engaged in a myriad of related topics. The reader will be taken all the way back to ancient Babylon - the foundation of all secret societies, and continue on through Egypt and Rome. Other topics covered are ceremonial magick, kundalini power and evil spirits, the Talmud, Kabbalah, the apostasy of the Christian church today,

alchemy, Papal Rome and the Catholic church, false prophets of the world, televangelists - wolves in sheep's clothing, & pagans in the pulpit." " Who changed the truth of God into a lie, and worshipped and served the creature more than the creator, who is blessed forever. Amen" (Romans 1:25) "This work is spiritually based, using many scriptures. It is the prayer of the author that through careful reading of these pages, the reader can connect the dots into a whole new level of discernment to help guard against demon traps and the many devices of Satan. Knowledge is power and the truth really does set you free."

God's Creative Power Will Work for You Charles Capps 1976-09-01 Many people have been defeated in life because they believed and spoke the wrong things. They have allowed the words of their own mouths to hold them in bondage.

Understanding Persecution Annette Capps 1982-01-01 Persecution is an area where we must learn to overcome. Of course, there are different degrees of persecution. In the United States, for instance, we do not know the kind of persecution experienced by Christians in other lands. But the Word of God does not give us different principles for overcoming these varying degrees of suffering by persecution.

Beyond These Horizons John Breck 2019 "From the electron microscope to the Hubble space telescope, modern technological advances have broadened our horizons - macroscopic and microscopic - beyond anything imaginable prior to the 1930s. One of the most important discoveries of the past few decades is the fact that everything, beginning with subatomic particles and including star systems and conscious human life, emerges from an underlying, transcendent Reality that brings all things from nonexistence into being through a continuous act of creation. All things are essentially interconnected in an entangled unity, which obliges us to view the world as a great hologram in which every aspect contains information of the Whole. This book raises the question of the relationship between that Reality and the Christian understanding of God. Written in the form of a simple novel, it begins by offering an overview, in lay terms, of quantum theory as it has developed since the early twentieth century. Gradually it lays the groundwork for an exploration of the relationship between quantum mechanics and certain key aspects of traditional Christian teaching. Its aim is to make clear that our usual conception of God and the world, in the words of the English theologian J.B. Phillips, is far 'too small.' With the help of insights drawn from quantum theory, we can now see that Creation is more intricate, more interconnected and more beautiful than our forebears could ever have imagined."-- Publisher.

Calling Things That Are Not Charles Capps 2016-03-01 The principle of calling things that are not as though they were is the spiritual principle through which everything physical becomes manifest. God

created the light by calling for "light" when only darkness was there. Jesus used this same method, calling the lepers clean, and the dead to life, and peace to the storm. You must call for what you desire. if you want your dog to come, you call the dog, not the cat. You call for what is not there. Whatever you call in the natural will come. Call what does not exist and continue to call until it manifests.
