Digital Technologies in Teaching and Learning Strategies Alexandr Lyapin 2022 This book demonstrates the benefits and drawbacks of using digital technology in preparing online lessons and educational activities. The experience of the last year has shown that online education is becoming a priority. This gave impetus to the creation and development of a new generation of equipment for online education. The book presents latest innovative technologies and modern digital trends in the field of information and communication technology for online education, including personalized learning, neuro-information systems, mobile learning, development of software and hardware infrastructure, and the use of robotics technologies. Key technologies for managing risk and cybersecurity, such as cloud and data security, identity and trust convolution systems, computational intelligence and cryptography techniques, malware and attack analysis, are presented. The topic of cybersecurity is one of the most important issues in the modern digital world. The results of the research on recently developed software, decision support systems, and cloud technologies make a huge contribution to the development of information technology in the context of digitalization. This book is of interest for developers of applications and programs for online education, for software and hardware suppliers who want to keep up with the times and reorient existing IT systems for use in online education.

Digital Health Communications Benoit Cordelier 2021-07-07 ECHNOLOGICAL PROSPECTS AND SOCIAL APPLICATIONS SET Coordinated by Bruno Salgues There are many controversies with respect to health crisis management: the search for information on symptoms, misinformation on emerging treatments, massive use of collaborative tools by healthcare professionals, deployment of applications for tracking infected patients. The Covid-19 crisis is a relevant example about the need for research in digital communications in order to understand current health info communication. After an overview of the challenges of digital healthcare, this book offers a critical look at the organizational and professional limits of ICT uses for patients, their caregivers and healthcare professionals. It analyzes the links between ICT and ethics of care, where health communication is part of a global, humanistic and emancipating care for patients and caregivers. It presents new digitized means of communicating health knowledge that reveal, thanks to the Internet, a competition between biomedical expert knowledge and experiential secular knowledge.

Nursing and Computers Virginia K. Saba 1998 A compilation of both landmark historic and contemporary papers, illustrating the inception and evolution of nursing informatics. The authors have assembled the papers into an invaluable source book providing a framework for future developments in the field. Examining the relationship between nursing and information systems, practical applications include administration, practice, research, education, critical care, and community health. An essential tool for nurses seeking to attain credentials as Nursing Informatics Specialists.

Mass Communications Research Methods H.J. Hsia 2015-10-23 Originally published in 1988. Step-by-step, this book leads students from problem identification, through the mazes of surveys, experimentation, historical/qualitative studies, statistical analysis, and computer data processing to the final submission and publication in scientific or popular publications.

Encyclopedia of Survey Research Methods Paul J. Lavrakas 2008-09-12 In conjunction with top survey researchers around the world and with Nielsen Media Research serving as the corporate sponsor, the Encyclopedia of Survey Research Methods presents state-of-the-art information and methodological examples from the field of survey research. Although there are other "how-to" guides and references texts on survey research, none is as comprehensive as this Encyclopedia, and none presents the material in such a focused and approachable manner. With more than 600 entries, this resource uses a Total Survey Error perspective that considers all aspects of possible survey error from a cost-benefit standpoint.

The Routledge Handbook of Language and Professional Communication Vijay Bhatia 2014-02-24 The Routledge Handbook of Language and Professional Communication provides a broad coverage of the key areas where language and professional communication intersect and gives a comprehensive account of the field. The four main sections of the Handbook cover: Approaches to Professional Communication Practice Acquisition of Professional Competence Views from the Professions This invaluable reference book incorporates not only an historical view of the field, but also looks to possible future developments. Contributions from international scholars and practitioners, focusing on specific issues, explore the major approaches to professional communication and bring into focus recent research. This is the first handbook of language and professional communication to account for both pedagogic and practitioner perspectives and as such is an essential reference for postgraduate students and those researching and working in the areas of applied linguistics and professional communication.

Childhood Friendships and Peer Relations Barry Schneider 2016-03-10 In the second edition of his unique study of peer relationships in childhood, Dr Barry Schneider re-examines this fundamental aspect of childhood. Taking the work of Jacob Moreno as its starting point, the book provides an up-to-date and accessible understanding of how children develop social competence in different environments, from school to cyberspace. It is informed by a cross-cultural perspective that examines how peer relationships vary in different cultures, as well as among children who have migrated to a new culture, and provides increased coverage of how bullying is perceived and managed within peer groups. The book is informed, too, by new research techniques, both qualitative and quantitative, which mean we know far more about how children relate to each other than ever before. Childhood Friendships and Peer Relations is a fascinating and very timely overview of what we know about making friends and enemies in childhood, showing how these relationships can have lasting effects. It will be essential reading to all students of Developmental Psychology and Educational Psychology, as well as anyone training towards a career working with children and young people.

Online Instruments, Data Collection, and Electronic Measurements: Organizational Advancements

Bocarnea, Mihai C. 2012-10-31 "This book aims to assist researchers in both understanding and utilizing online data collection by providing methodological knowledge related to online research, and by presenting information about the empirical quality, the availability, and the location of specific online instruments"--Provided by publisher.

Introduction to Electronic Commerce and Social Commerce Efraim Turban 2017-04-23 This is a complete update of the best-selling undergraduate textbook on Electronic Commerce (EC). New to this 4th Edition is the addition of material on Social Commerce (two chapters); a new tutorial on the major EC support technologies, including cloud computing, RFID, and EDI; ten new learning outcomes; and video exercises added to most chapters. Wherever appropriate, material on Social Commerce has been added to existing chapters. Clinical Research Informatics Rachel L. Richesson 2019-02-07 This extensively revised new edition comprehensively reviews the rise of clinical research informatics (CRI). It enables the reader to develop a thorough understanding of how CRI has developed and the evolving challenges facing the biomedical informatician in the modern clinical research environment. Emphasis is placed on the changing role of the consumer, and the need to merge clinical care delivery and research as part of a changing paradigm in global healthcare delivery. Clinical Research Informatics presents a detailed review of using informatics in the continually evolving clinical research environment. It represents a valuable textbook reference for all students and practising healthcare informaticians looking to learn and expand their understanding of this fast-moving and increasingly important discipline.

Advances in Communications, Computing, Electronics, Networks, Robotics and Security Volume 12 Paul Dowland 2016-07 This book is the twelfth in a series presenting research papers arising from MSc/MRes research projects undertaken by students of the School of Computing and Mathematics at Plymouth University. The publications in this volume are based upon research projects that were undertaken during the 2013/14 academic year. A total of 17 papers are presented, covering many aspects of modern networking and communication technology, including security, mobility, coding schemes and quality measurement. The expanded topic coverage compared to earlier volumes in this series reflects the broadening of our range of MSc programmes. Specifically contributing programmes are: Communications Engineering and Signal Processing, Computer and Information Security, Computer Science, Computing, Electrical and Electronic Engineering, Network Systems Engineering, and Robotics.

Mobility for Smart Cities and Regional Development - Challenges for Higher Education Michael E. Auer 2022 This book presents recent research on interactive collaborative learning. We are currently witnessing a significant transformation in the development of education and especially post-secondary education. To face these challenges, higher education has to find innovative ways to quickly respond to these new needs. On the one hand, there is a pressure by the new situation in regard to the COVID pandemic. On the other hand, the methods and organizational forms of teaching and learning at higher educational institutions have changed rapidly in recent months. Scientifically based statements as well as excellent experiences (best practice) are absolutely necessary. These were the aims connected with the 24th International Conference on Interactive Collaborative Learning (ICL2021), which was held online by Technische Universität Dresden, Germany, on 22-24 September 2021. Since its beginning in 1998, this conference is devoted to new approaches in learning with a focus on collaborative learning in Higher Education. Nowadays, the ICL conferences are a forum of the exchange of relevant trends and research results as well as the presentation of practical experiences in Learning and Engineering Pedagogy. In this way, we try to bridge the gap between 'pure' scientific research and the everyday work of educators. This book contains papers in the fields of Teaching Best Practices Research in Engineering Pedagogy Engineering Pedagogy Education Entrepreneurship in Engineering Education Project-Based Learning Virtual and Augmented Learning Immersive Learning in Healthcare and Medical Education. Interested readership includes policymakers, academics, educators, researchers in pedagogy and learning theory, schoolteachers, learning industry, further and continuing education lecturers, etc.

Computers, Communication, and Mental Models Donald L. Day 2020-09-23 Computers, Commmunication, and Mental Models is a far-ranging, focused treatment of the cognitive and behavioural issues in computer-mediated communication, knowledge representation and computer-supported co- operative work. It is also an argued development of the theoretical bases for treating computerized tools as intermediaries in the communication of mental maps between tool builders and users. Empirical trails are

reported in detail sufficient for representation, in computer-based instruction, fractal dimensions of cognitive mapping and group decision support. The book is a collection of multidisciplinary papers which each shed light on the complex interactions between users and systems architects, via a common medium: computerized tools.

Handbook of Research on Electronic Surveys and Measurements Reynolds, Rodney A. 2006-09-30 "This book is the comprehensive reference source for innovative knowledge on electronic surveys. It provides complete coverage of the challenges associated with the use of the Internet to develop online surveys, administer Web-based instruments, and conduct computer-mediated assessments. This combination of how-to information about online research coupled with profiles of specific measures makes it an indispensable reference"--Provided by publisher.

Marketing Research: Asia-Pacific Edition Steve D'Alessandro 2017-01-01 Marketing Research 4th Asia-Pacific edition continues to equip students with the knowledge and skills required to successfully undertake marketing research.Combining a solid theoretical foundation with a practical, step-by-step approach, the marketing research process is explored through a learning model that is constantly reinforced throughout the text.Using a raft of contemporary local and international examples, data sets and case studies to explain traditional marketing research methods, Marketing Research also examines new theories and techniques. To reflect emerging industry practices, each stage of research reporting is detailed, as well as a range of presentation methodologies. This edition of Marketing Research continues to integrate Qualtrics, a robust and easy-to-use online survey tool that provides students with a platform for designing, distributing and evaluating survey results, to strengthen its 'learning by doing' approach. For analysing data, the text covers both SPSS and EXCEL outputs. This text is indispensable for students studying marketing research in any business or marketing course.

Teenagers, Sexual Health Information and the Digital Age Kerry Mckellar 2020-01-06 Teenagers, Sexual Health Information and the Digital Age examines the online resources available on teenagers, including games and digital interventions. In addition, it highlights current issues such as sexting and pornography. Information needs and provisions are examined, and existing sexual health interventions and digital interventions are discussed, gathering both teenagers' and sexual health professionals' views on these services. In addition to a review of the current literature on sexual health and teenagers, the book examines groups of teenagers, particularly those vulnerable to risky sex and asks what are the predictors of these behaviors and what can be done to address the behaviors. Finally, the book will also provide reflections and practical advice on the ethical issues associated with research in this context. Provides guidance on the ethical issues with research associated with this topic Covers both teenagers' information needs as well as their existing levels of knowledge Assesses how teenagers engage with, and evaluate, sexual health information Addresses the challenges inherent in the online environment, such as unreliable and misleading information

Internet, Phone, Mail, and Mixed-Mode Surveys Don A. Dillman 2014-08-18 The classic survey design reference, updated for the digital age For over two decades, Dillman's classic text on survey design has aided both students and professionals in effectively planning and conducting mail, telephone, and, more recently, Internet surveys. The new edition is thoroughly updated and revised, and covers all aspects of survey research. It features expanded coverage of mobile phones, tablets, and the use of do-

it-yourself surveys, and Dillman's unique Tailored Design Method is also thoroughly explained. This invaluable resource is crucial for any researcher seeking to increase response rates and obtain high-quality feedback from survey questions. Consistent with current emphasis on the visual and aural, the new edition is complemented by copious examples within the text and accompanying website. This heavily revised Fourth Edition includes: Strategies and tactics for determining the needs of a given survey, how to design it, and how to effectively administer it How and when to use mail, telephone, and Internet surveys to maximum advantage Proven techniques to increase response rates Guidance on how to obtain high-quality feedback from mail, electronic, and other self-administered surveys Direction on how to construct effective questionnaires, including considerations of layout The effects of sponsorship on the response rates of surveys Use of capabilities provided by newly mass-used media: interactivity, presentation of aural and visual stimuli. The Fourth Edition reintroduces the telephone—including coordinating land and mobile. Grounded in the best research, the book offers practical how-to guidelines and detailed examples for practitioners and students alike.

Newspapers in International Librarianship 2003-01-01 The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. Inpatient Functional Communication Interview Robyn O'Halloran 2019-10-08 The Inpatient Functional Communication Interview: Screening, Assessment, and Intervention (IFCI: SAI) is a set of four resources for speech-language pathologists (SLPs) and other healthcare professionals working in acute and rehabilitation hospitals. They can be used separately or together to enhance patient-provider communication in hospitals. The IFCI: SAI has been developed so healthcare professionals can identify and support patients who have difficulty communicating, with a focus on patients with communication disability. The following resources are included: *Screening Questionnaire. Designed to identify patients who have difficulty communicating about their healthcare and will need support to communicate with healthcare providers in hospital. *Inpatient Functional Communication Interview (IFCI). A semi-structured interview that the SLP conducts at the patient's bedside. During the interview, the SLP investigates how well the patient can communicate in everyday healthcare communication activities. If the SLP and patient have difficulty communicating, the clinician investigates if any communication supports or strategies enable successful communication. *Impairment Rating Scales. These assist the SLP to rate their initial clinical impressions of the patient's speech intelligibility, spoken language, and cognitive-communicative function. Each rating scale provides descriptions of speech, language, and cognitive-communicative function on a five-point scale ranging from no impairment to complete impairment. *Environmental Questionnaires (EQs). The set of EQs assist SLPs and other healthcare professionals to screen the communicative environment for factors influencing patient-provider communication in their setting. Once the factors that influence patient-provider communication have been identified, SLPs and other healthcare professionals may be better informed and more able to systematically address these factors to develop communicatively accessible hospital services.

E-Lexicography Pedro A. Fuertes-Olivera 2011-10-20 This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: • Polyfunctional versus monofunctional dictionary tools • Developing theories of lexicography for electronic mediums • Distinguishing between the database and the dictionary • Online dictionaries not as data repositories but as sophisticated search engines This volume will appeal to scholars in lexicography and to practicing lexicographers.

Essential Guide to Qualitative Methods in Organizational Research Catherine Cassell 2004-04-28 Essential Guide to Qualitative Methods in Organizational Research is an excellent resource for students and researchers in the areas of organization studies, management research and organizational psychology, bringing together in one volume the range of methods available for undertaking qualitative data collection and analysis. The volume includes 30 chapters, each focusing on a specific technique. The chapters cover traditional research methods, analysis techniques, and interventions as well as the latest developments in the field. Each chapter reviews how the method has been used in organizational research, discusses the advantages and disadvantages of using the method, and presents a case study example of the method in use. A list of further reading is supplied for those requiring additional information about a given method. The comprehensive and accessible nature of this collection will make it an essential and lasting handbook for researchers and students studying organizations.

Gender Articulated Kira Hall 2012-11-12 Gender Articulated is a groundbreaking work of sociolinguistics that forges new connections between language-related fields and feminist theory. Refuting apolitical, essentialist perspectives on language and gender, the essays presented here examine a range of cultures, languages and settings. They explicitly connect feminist theory to language research. Some of the most distinguished scholars working in the field of language and gender today discuss such topics as Japanese women's appropriation of "men's language," the literary representation of lesbian discourse, the silencing of women on the Internet, cultural mediation and Spanish use at New Mexican weddings and the uses of silence in the Anita Hill-Clarence Thomas hearings.
