Independent Component Analysis of Edge Information for Face Recognition Kailash Jagannath Karande 2013-07-15 The book presents research work on face recognition using edge information as features for face recognition with ICA algorithms. The independent components are extracted from edge information. These independent components are used with classifiers to match the facial images for recognition purpose. In their study, authors have explored Canny and LOG edge detectors as standard edge detection methods. Oriented Laplacian of Gaussian (OLOG) method is explored to extract the edge information with different orientations of Laplacian pyramid. Multiscale wavelet model for edge detection is also proposed to extract edge information. The book provides insights for advance research work in the area of image processing and biometrics.

Rock Identification Bernhard R. Teicher 2020-04-09 Are you an amateur rock collector looking for a easily-accessible compilation of essential facts for rock identification? This is a guide for amateur rock collectors like myself, who do not have access to a laboratory to identify their "treasures" scientifically. A telegram style has been chosen for this compilation, because I wanted to create a practical tool without unnecessary (for the purpose of identification) verbiage. The most important point is for me, and I would imagine for most amateur rock collectors, that all the easily available information for any one rock is concentrated in one point of reference, obviating the need to acquire and wade through numerous tomes. There is, to the best of my knowledge, no single information source available concentrating detailed identification facts like in this compilation. By purchasing the print edition of this book on AMAZON, you are eligible for a FREE download of the Kindle eBook version! Finally, I have attempted to organize the rocks into some kind of logical scheme, because there seem to be no official efforts to classify rocks, as we know them for plants and animals.

Lee Konitz Andy Hamilton 2007-08-08 "Meticulously researched, detailed and documented, this long awaited overview justly establishes Konitz as one of the most consistently brilliant, adventurous and original improvisers in the jazz tradition—a genius as rare as Bird himself." —John Zorn "Hamilton's work may well mark the inception of a format new to writing on Western music, one which avoids both the self-aggrandizing of autobiography and the stylized subjectification of biography." —The Wire "An extraordinary approach to a biography, with the man himself speaking for extended sessions. The main vibration I felt from Lee's words was total honesty, almost to a fault. Konitz shows himself to be an acute observer of the scene, full of wisdom and deep musical insights, relevant to any historical period regardless of style. The asides by noted musicians are beautifully woven throughout the pages. I couldn't put the book down—it is the definition of a living history." —David Liebman The preeminent altoist

associated with the “cool” school of jazz, Lee Konitz was one of the few saxophonists of his generation to forge a unique sound independent of the influence of Charlie Parker. In the late 1940s, Konitz began his career with the Claude Thornhill band, during which time he came into contact with Miles Davis, with whom he would later work on the legendary Birth of the Cool sessions. Konitz is perhaps best known through his association with Lennie Tristano, under whose influence much of his sound evolved, and for his work with Stan Kenton and Warne Marsh. His recordings have ranged from cool bop to experimental improvisation and have appeared on such labels as Prestige, Atlantic, Verve, and Polydor. Crafted out of numerous interviews between the author and his subject, the book offers a unique look at the story of Lee Konitz’s life and music, detailing Konitz’s own insights into his musical education and his experiences with such figures as Miles Davis, Stan Kenton, Warne Marsh, Lennie Tristano, Charles Mingus, Bud Powell, and Bill Evans. Andy Hamilton is a jazz pianist and contributor to major jazz and contemporary music magazines. He teaches philosophy, and the history and aesthetics of jazz, at Durham University in the United Kingdom. He is also the author of the book *Aesthetics and Music* (Continuum 2007). Joe Lovano is a Grammy Award-winning tenor saxophonist. His most recent album is *Streams of Expression*.

Gifted Tongues Gary Alan Fine 2010-07-01 Learning to argue and persuade in a highly competitive environment is only one aspect of life on a high-school debate team. Teenage debaters also participate in a distinct cultural world--complete with its own jargon and status system--in which they must negotiate complicated relationships with teammates, competitors, coaches, and parents as well as classmates

outside the debating circuit. In *Gifted Tongues*, Gary Alan Fine offers a rich description of this world as a testing ground for both intellectual and emotional development, while seeking to understand adolescents as social actors. Considering the benefits and drawbacks of the debating experience, he also recommends ways of reshaping programs so that more high schools can use them to boost academic performance and foster specific skills in citizenship. Fine analyzes the training of debaters in rapid-fire speech, rules of logical argumentation, and the strategic use of evidence, and how this training instills the core values of such American institutions as law and politics. Debates, however, sometimes veer quickly from fine displays of logic to acts of immaturity--a reflection of the tensions experienced by young people learning to think as adults. Fine contributes to our understanding of teenage years by encouraging us not to view them as a distinct stage of development but rather a time in which young people draw from a toolkit of both childlike and adult behaviors. A well-designed debate program, he concludes, nurtures the intellect while providing a setting in which teens learn to make better behavioral choices, ones that will shape relationships in their personal, professional, and civic lives.
