Books and Periodicals in Brazil 1768-1930 AnaClaudiaSurianiDa Silva 2017-07-05 Before the Portuguese Royal Court moved to its South-American colony in 1808, books and periodicals had a very limited circulation there. It was only when Brazilian ports were opened to foreign trade that the book trade began to flourish, and printed matter became more easily available to readers, whether for pleasure, for instruction or for political reasons. This book brings together a collection of original articles on the transnational relations between Brazil and Europe, especially England and France, in the domain of literature and print culture from its early stages to the end of the 1920s. It covers the time when it was forbidden to print in Brazil, and Portugal strictly controlled which books were sent to the colony, through the quick flourishing of a transnational printing industry and book market after 1822, to the shift of hegemony in the printing business from foreign to Brazilian hands at the beginning of the twentieth century. Sandra Guardini Vasconcelos is Professor of English and Comparative Literature at the University of Sao Paulo.

The Portuguese in the Age of Discovery c.1340-1665 David Nicolle 2012-11-20 From humble beginnings, in the course of three centuries the Portuguese built the world's first truly global empire, stretching from modern Brazil to sub-Saharan Africa and from India to the East Indies (Indonesia). Portugal had established its present-day borders by 1300 and the following century saw extensive warfare that confirmed Portugal's independence and allowed it to aspire to maritime expansion, sponsored by monarchs such as Prince Henry the Navigator. During this nearly 300-year period, the Portuguese fought alongside other Iberian forces against the Moors of Andalusia; with English help successfully repelled a Castilian invasion (1385); fought the Moors in Morocco, and Africans, the Ottoman Turks, and the Spanish in colonial competition. The colourful and exotic Portuguese forces that prevailed in these battles on land and sea are the subject of this book.

Coastal Lagoons in Europe Geoffrey D. Gooch 2015-07-15 Lagoons represent nearly 13% of the shoreline globally and around 5% in Europe. Coastal lagoons are shallow water bodies separated from the ocean by a barrier (e.g., narrow spit), connected at least intermittently to the ocean by one or more restricted inlets, and usually geographically oriented parallel to the shore-line. Coastal lagoons are flexible and usually able to cope with environmental change, yet nowadays they are under threat. This is partly due

to climate change impacts (for example, sea-level rise and hydro-meteorological extreme events) but also due to more direct human activities and pressures. The book focuses on addressing these challenges through integrated management strategies seen in a land-sea and science-stakeholder-policy perspective. Pan-European management challenges are seen from the context of the perspectives of Policy, Environment and Modelling. Four case study lagoons in different geographical locations in Europe provide examples of some of the practical experiences and results around these challenges. Possible impacts on drainage basins and lagoons are introduced through integrated scenarios which were developed through a multi-science and land-lagoon science perspective combined with interactions and contributions from stakeholders and citizens. Issues around climate change impacts on environmental conditions in both drainage basins and lagoons are also included. The book derives from a collaborative EC-funded project entitled 'Integrated Water Resources and Coastal Zone Management in European Lagoons in the Context of Climate Change' comprising nine partner institutes with a wide diversity in the scientific disciplines covered.
