'Raas' : The Mandal Raas of Mulher Province of Maharashtra Meghana Ashtaputre 2021-08-14 The followers of 'Ramanuj Sampradaya' in Mulher province, worship Lord Shri Krishna. It has its historic importance. The followers of this sect traditionally celebrate 'Raas-Leela' of lord Shri Krishna at every 'Sharad Poonam'. This tradition is 350 years old. The 'Raas-Leela' of Mulher is equally important as the 'Raas-Leela' of Brindavan. Lots of followers from the interior parts of Gujarat, Karnataka and Maharashtra participate in the yearly 'Raas-Leela' celebration. They come to worship Lord Shri Krishna, among them some thank the Lord for their fulfilled wishes, and others pray to God to fulfill their wishes. They have a feeling of love, affection and equality about all the religions in their hearts. They all are lost in themselves; their souls are connected to the Lord. They are so engrossed in singing 'Bhajans' that they forget hunger, thirst, etc. In this 'Raas-Leela' one local child enacts Shri Krishna and others enact as his 'Gopis'. All night the followers sing 'Bhajans' under the 'Chakra'. The 'Padas' of 'Raas-Leela' are sung by them. A total of 105 'Padaas' are sung. They are composed in various 'Raagas'- Traditional as well as the 'Raagas' which are scarcely known. We can easily make out that those 'Raagas' are different from the present ones. In this book, there is an humble effort to give the detailed information about the history of raas leela , the present situation of Raas-leela: a live description , Raas padaas with notation (pt. Bhatkhande notation system), actual meaning of each pada, a study of the raagas in which the padas are composed, and an effort to know the

actual face or structure of the raagas in medieval period and in modern period.

How to Play Sitar Mamta Chaturvedi 2018-02-10 -

Soft Computing: Theories and Applications Millie Pant 2017-11-23 This book focuses on soft computing and its applications to solve real-life problems occurring in different domains ranging from medical and health care, supply chain management and image processing to cryptanalysis. It presents the proceedings of International Conference on Soft Computing: Theories and Applications (SoCTA 2016), offering significant insights into soft computing for teachers and researchers and inspiring more and more researchers to work in the field of soft computing. The term soft computing represents an umbrella term for computational techniques like fuzzy logic, neural networks, and nature inspired algorithms. In the past few decades, there has been an exponential rise in the application of soft computing techniques for solving complex and intricate problems arising in different spheres of life. The versatility of these techniques has made them a favorite among scientists and researchers working in diverse areas. SoCTA is the first international conference being organized at Amity University Rajasthan (AUR), Jaipur. The objective of SoCTA 2016 is to provide a common platform to researchers, academicians, scientists, and industrialists working in the area of soft computing to share and exchange their views and ideas on the theory and application of soft computing techniques in multi-disciplinary areas. The aim of the conference is to bring together young and experienced researchers, academicians, scientists, and industrialists for the exchange of knowledge. SoCTA especially encourages the young researchers at the beginning of their career to participate in this conference and present their work on this platform.

Finding the Raga Amit Chaudhuri 2021-03-30 An autobiographical exploration of the role and meaning of music in our world by one of India's greatest living authors, himself a vocalist and performer. Amit Chaudhuri, novelist, critic, and essayist, is also a musician, trained in the Indian classical vocal tradition but equally fluent as a guitarist and singer in the American folk music style, who has recorded his experimental compositions extensively and performed around the world. A turning point in his life took place when, as a lonely teenager living in a high-rise in Bombay, far from his family's native Calcutta, he began, contrary to all his prior inclinations, to study Indian classical music. *Finding the Raga* chronicles that transformation and how it has continued to affect and transform not only how Chaudhuri listens to and makes music but how he listens to and thinks about the world at large. Offering a highly personal introduction to Indian music, the book is also a meditation on

the differences between Indian and Western music and art-making as well as the ways they converge in a modernism that Chaudhuri reframes not as a twentieth-century Western art movement but as a fundamental mode of aesthetic response, at once immemorial and extraterritorial. Finding the Raga combines memoir, practical and cultural criticism, and philosophical reflection with the same individuality and flair that Chaudhuri demonstrates throughout a uniquely wide-ranging, challenging, and enthralling body of work.

The Music Sound Nicolae Sfetcu 2014-05-07 A guide for music: compositions, events, forms, genres, groups, history, industry, instruments, language, live music, musicians, songs, musicology, techniques, terminology , theory, music video. Music is a human activity which involves structured and audible sounds, which is used for artistic or aesthetic, entertainment, or ceremonial purposes. The traditional or classical European aspects of music often listed are those elements given primacy in European-influenced classical music: melody, harmony, rhythm, tone color/timbre, and form. A more comprehensive list is given by stating the aspects of sound: pitch, timbre, loudness, and duration. Common terms used to discuss particular pieces include melody, which is a succession of notes heard as some sort of unit; chord, which is a simultaneity of notes heard as some sort of unit; chord progression, which is a succession of chords (simultaneity succession); harmony, which is the relationship between two or more pitches; counterpoint, which is the simultaneity and organization of different melodies; and rhythm, which is the organization of the durational aspects of music.

The Raga Guide Joep Bor 2002 The Raga Guide is an introduction to Hindustani ragas, the melodic basis for the classical music of Northern India, Pakistan, Nepal and Bangladesh.

Swarika - Madhyama Purna Divya Nandyala 2013

Objective Classification of Hindustani Ragas Poonam Priyadarshini 2019-05-27 Doctoral Thesis / Dissertation from the year 2019 in the subject Musicology, grade: NA, , language: English, abstract: The aim of the research work presented in this book, is to find important features of the music signal so that we can classify the raga into different category. It will encourage the scientific research in Indian Classical music, specifically Hindustani music. The main objectives of the study include: • Extraction of features of a music signal which are relevant for classification of the music signal using different techniques. • To determine whether the artists singing the raga during a concert belongs to same gharana or different gharanas by finding the MFCC (Mel frequency cepstral co-efficients) features of a music signal. Andrew plot is used to study the results. • Comparison between two types of ragas, one being aesthetically known to be restful raga and the other restless in nature is done by finding statistical features. Distinction between the two types of raga is done by finding the mean, standard deviation and Inter onset interval. The Transitory and non-transitory frequency movements between the notes of both ragas is determined. • Statistical Modeling of ragas is done to distinguish

between Restful ragas and Restless Ragas. Simple Exponential smoothing techniques is used for Modeling the Restless Ragas Pilu and Bhairavi and Double exponential Smoothing techniques is used for Modeling the Restful Raga Todi . • The work is focused on music emotion representation. The characteristics features of music signal such as rhythm, melody, pitch and timbre are studied. Among these which parameter(s) play a major role in creating happy or sad emotion in the song or music samples are studied.

10 Thaats in Harmonium Sadakat Aman Khan 2021-06-01 A well explained Book about 10 Thaats of Hindustani Classical Music and How to play 10 thaats in Harmonium are written in this book with correct finger patterns and clear diagrams.

Mystic Melodies Mushtaq Ali Shah 2014-11-13 Mystic Melodies is an English interpretation of a magnum opus of passionate, didactic and epic odes and hymns renditioned by an eighteenth-century polyglot poet, philosopher and musicologist, Shah Abdul Latif Bhittai. The laique lyrics define metaphysical precepts with the help of mundane metaphors and also illustrate the ethos of the Spartan queens of Sindhi folklore, ascetics, peasants, sailors, fishermen, spinners and bards. Bhittai's passionate poetry constitutes a spiritual voyage through the pastures, prairies, deserts, hills, harbours, and hamlets of the Indus valley civilization.

Heritage Preservation Bhabatosh Chanda 2018-06-15 This book presents a unique guide to heritage preservation problems and the corresponding state-of-the-art digital techniques to achieve their plausible solutions. It covers various methods, ranging from data acquisition and digital imaging to computational methods for reconstructing the original (pre-damaged) appearance of heritage artefacts. The case studies presented here are mostly drawn from India's tangible and non-tangible heritage, which is very rich and multi-dimensional. The contributing authors have been working in their respective fields for years and present their methods so lucidly that they can be easily reproduced and implemented by general practitioners of heritage curation. The preservation methods, reconstruction methods, and corresponding results are all illustrated with a wealth of colour figures and images. The book consists of sixteen chapters that are divided into five broad sections, namely (i) Digital System for Heritage Preservation, (ii) Signal and Image Processing, (iii) Audio and Video Processing, (iv) Image and Video Database, and (v) Architectural Modelling and Visualization. The first section presents various state-of-the-art tools and technologies for data acquisition including an interactive graphical user interface (GUI) annotation tool and a specialized imaging system for generating the realistic visual forms of the artefacts. Numerous useful methods and algorithms for processing vocal, visual and tactile signals related to heritage preservation are presented in the second and third sections. In turn, the fourth section provides two important image and video databases, catering to members of the computer vision community with an interest in the domain of digital heritage. Finally, examples of reconstructing ruined monuments on the basis of historic documents are presented in the fifth section. In essence, this book offers a pragmatic appraisal of the uses of

digital technology in the various aspects of preservation of tangible and intangible heritages.

Bhatkhande's Contribution to Music Sobhana Nayar 1989 On the work of Vishnu Narayan Bhatkhande, 1860-1936, exponent of Hindustani music.

Jack Of All Master Of One Chanakya Shukla 2021-08-11 We might have often heard of this popular old saying that a jack of all could become the master of none. This is indeed a fact, some really experienced man might have said this because he might have tried his hands in all places he could which resulted from him becoming ultimately a master in none. Whenever we read motivational quotes and motivational speeches from all the great people in the world, we are advised to focus. That means we should concentrate on doing one specific thing where we want to achieve, and it helps. In fact, I have experienced and advised my juniors to do the same. I use to tell them that now you are a beginner and find yourself nowhere but as soon you spend a decade in a skill, an industry, a field of study, a sport, a profession, a business, or simply practicing a hobby; you reach somewhere and nobody in this world can take it away from you be it anywhere on this planet or elsewhere. Teachers deliver a lecture from half an hour to more but it is always the self-study, the amount of study you do without being told by anybody; it makes you the man you want to be in the future. The teacher (or Guru) again helps you to focus on one thing while there are millions of parallel events going around the world to lose your focus and waste your time. You might find yourself succeeding in various distinct fields, yes it is very much possible. Humans can create and extend the boundaries themselves but then you often find yourself not the number one. You could be good but can't be the best in the world in everything, there is always someone practicing the same skills and getting better than you in some part of the world and it should be appreciated with acceptance. And, here what this popular saying makes sense is that the Jack of all is a Master of None. But my all-loving readers I would like to share my story here where I grew up learning this phrase in schools and from my parents. During my interaction with the portion of the world in form of the people that I met, I found this phrase made sense, and sometimes it did not. A millennial like me always look for a modification of complex things and truths of life and death to make it simple. My late father who was a businessman used to tell his employees that in this competing World one has to be an all-rounder moreover has to master one particular skill to stand out in the crowd or must say simply survive. Luckily, I was there in his office to hear him telling this to some employee. I was very young when he left this world and all of a sudden I had a different perspective on life. Cheating people, telling lies for small profits of money, frauds, bullying, sexual exploitation, grudges over communities, body shaming, superstition, greediness, impersonation, racial discrimination, depression, and much more that exists on earth and we often ignore it while people have justifications for it. I know already there are a number of books and educating videos available out there then why I am writing this one? Because this is my journey of learning ten different skills after the death of my father and I earned a little or more amount of money utilizing these skills. I could be a

victim or a guilty while all above said evils surrounding me, but I was guided well by my mentors, parents, and elders moreover, I accepted that guided path and followed it to get benefited out of it and become an example that the world could learn from, a good example probably. With changes in time and situations, now if a father teaches his son driving a car it won't make a skill worth enough to make a living. Since now most of the people work from home moreover most of the people know themselves that how to drive a car. People need to learn more skills for a better tomorrow. My father uses to take a walk with me in the evening after dinner when he uses to tell me how children make their parents proud or shamed out of their doings. I hope this reached out to him somehow in a good way. ~ CHANAKYA SHUKLA

Swarika - II Divya Nandyala 2012

SWARIKA - Madhyama Pratham Divya Nandyala 2014-11-30 A must need book for the ABGMVM Madhyama Pratham examination. This book contains all the relevant theory, taal details and practical materials for the students. It has complete details and notations for the following Raags: 1. Bhairav 2. Bhimpalasi 3. Alhaiya Bilawal 4. Kedar 5. Yaman 6. Vrindavan Sarang It also includes bhajans in raag Tilang and Tilak Kamod

BASIC CONCEPTS OF NORTH INDIAN CLASSICAL MUSIC ABHA SAXENA 2020-06-23 This book contains basic concepts of North Indian Classical Music in a simple language with 14 basic raags with their introduction and swar vistar, new compositions with their alaap and taan with basic taals and layakaries. I believe that the book will be highly beneficial for learning the elementary knowledge of vocal music.

Tune from Tagore

Swarika III Divya Nandyala 2013

Songs of Kabir from the Adi Granth Kabir 1991-01-01 This translation presents the hymns of Kabir from the Adi Granth (the holy book of the Sikhs), which has been neglected because it is written in Gurmukhi script rather than Devanagari. The Introduction contextualizes these songs and proceeds to examine their construction of meaning. Most songs have explanatory notes, and there is a Glossary of names and terms that appear in Kabir's work.

Guru Granth Sahib - An Advance Study Volume-I Sukhbir S Kapoor 2005

A Journey Down Melody Lane Raju Bharatan 2010-09-01 The Hindi film song has held millions spellbound for nearly eight decades. In this unputdownable 'labour of love', India's leading film song historian, Raju Bharatan, delves deep into his treasure trove to tell us how singing is all about romancing, how composing is all about feelings, how the twain, stardom and songdom, do meet to make the vintage film number a part of the nation's psyche. He reconstructs song happenings over the last sixty years or so to condense the emotion and passion going into legendary star hook-ups, showing us how with the pairing comes the vibe, with the vibe comes the tune, and with the tune unfolds cinema that is a 'Madhuballad' all the way. This volume also describes the creative inputs of music directors, lyricists and singers that go into the making of a Hindi film song. It is a compendium that no one can afford to miss! Raju Bharatan is popularly recognized as the last word on film music in India – as the only one physically there 'on the scene' through the decades. His knowledge of Hindustani cinesangeet is matched only by his grip on Indian cricket. He now packs fifty years of musical lore into a work sure to command a niche on your bookshelf.

Basics of North Indian Classical Music Mrs.. Abha Saxena 2020-06-23 This book contains basic concepts of North Indian Classical Music in a simple language with 14 basic raags with their introduction and swar vistar, new compositions with their alaap and taan with basic taals and layakaries. book opens with a short introduction to Indian music, in particular classical Hindustani music, followed by a chapter on the role of statistics in computational musicology. The authors then show how to analyze musical structure using Rubato, the music software package for statistical analysis, in particular addressing modeling, melodic similarity and lengths, and entropy analysis; they then show how to analyze musical performance. Finally, they explain how the concept of seminatural composition can help a music composer to obtain the opening line of a raga-based song using Monte Carlo simulation. The book will be of interest to musicians and musicologists, particularly those engaged with Indian music.
