Sociology in America Craig Calhoun 2008-09-15 Though the word "sociology" was coined in Europe, the field of sociology grew most dramatically in America. Despite that disproportionate influence, American sociology has never been the subject of an extended historical examination. To remedy that situation—and to celebrate the centennial of the American Sociological Association—Craig Calhoun assembled a team of leading sociologists to produce Sociology in America. Rather than a story of great sociologists or departments, Sociology in America is a true history of an often disparate field—and a deeply considered look at the ways sociology developed intellectually and institutionally. It explores the growth of American sociology as it addressed changes and challenges throughout the twentieth century, covering topics ranging from the discipline's intellectual roots to understandings (and misunderstandings) of race and gender to the impact of the Depression and the 1960s. Sociology in America will stand as the definitive treatment of the contribution of twentieth-century American sociology and will be required reading for all sociologists. Understanding Race, Class, Gender, and Sexuality Lynn Weber 2010 *Understanding Race, Class, Gender, & Sexuality: A Conceptual Framework, Second Edition*, is the only text that develops a theoretical framework for the analysis of intersectionality. Weber argues that these social systems are historically and geographically contextual power relationships that are simultaneously expressed and experienced at both the macro level of social institutions and the micro level of individual lives and small groups. This is also the only text that teaches students how to apply the theory to their own analyses. Originally published in its first edition as two separate books, the second edition integrates the main text and the case studies into one volume. As in the previous edition, Weber uses education as an extended example to show students how to conduct a race, class, gender, and sexuality analysis. With completely updated data, this edition adds important new research in sexuality, globalization, and education. It also features new case studies, including one on Hurricane Katrina and another on the 2008 Presidential election. *Understanding Race, Class, Gender, & Sexuality: A Conceptual Framework, Second Edition*, can be used in a variety of courses: in social inequality, communication, women's and gender studies, ethnic studies, American studies, sociology, political science, human services, and public health.

Empires and Boundaries Harald Fischer-Tiné 2008-11-19 *Empires and Boundaries: Rethinking Race, Class, and Gender in Colonial Settings* is an exciting collection of original essays exploring the meaning and existence of conflicting and coexisting hierarchies in colonial settings. With investigations into the colonial past of a diversity of regions – including South Asia, South-East Asia, and Africa – the dozen notable international scholars collected here offer a truly inter-disciplinary approach to understanding the structures and workings of power in British, French, Dutch, German, and Italian colonial contexts. Integrating a historical approach with perspectives and theoretical tools specific to disciplines such as social anthropology, literary and film studies, and gender studies, *Empires and Boundaries: Rethinking Race, Class, and Gender in Colonial Settings*, is a striking and ambitious contribution to the scholarship of imperialism and post-colonialism and an essential read for anyone interested in the revolution being undergone in these fields of study.

Emerging Intersections Bonnie Thornton Dill 2009-01-01 The United States is known as a "melting pot" yet this mix tends to be volatile and contributes to a long history of oppression, racism, and bigotry. *Emerging Intersections*, an anthology of ten previously unpublished essays, looks at the problems of inequality and oppression from new angles and promotes intersectionality as an interpretive tool that can be utilized to better understand the ways in which race, class, gender, ethnicity, and other dimensions of difference shape our lives today. The book showcases innovative contributions that expand our understanding of how inequality affects people of color, demonstrates the ways public policies reinforce existing systems of inequality, and shows how research and teaching using an intersectional perspective compels scholars to become agents of change within institutions. By offering practical applications for using intersectional knowledge, *Emerging Intersections* will help bring us one step closer to achieving positive institutional change and social justice.

Making Sense of Race, Class, and Gender Celine-Marie Pascale 2013-02-01 Using arresting case studies of how ordinary people understand the concepts of race, class, and gender, Celine-Marie Pascale shows that the peculiarity of commonsense is that it imposes obviousness—that which we cannot fail to recognize. As a result, how we negotiate the challenges of inequality in the twenty-first century may depend less on what people consciously think about "difference" and more on what we inadvertently assume. Through an analysis of commonsense knowledge, Pascale expertly provides new insights into familiar topics. In addition, by analyzing local practices in the context of established cultural discourses, Pascale shows how the weight of history bears on the present moment, both enabling and constraining possibilities. Pascale tests the boundaries of sociological knowledge and offers new avenues for conceptualizing social change. In 2008, *Making Sense of Race, Class and Gender* was the recipient of the Distinguished Contribution to Scholarship Book Award, of the American Sociological Association Section on Race, Gender, and Class, for "distinguished and significant contribution to the development of the integrative field of race, gender, and class."

Rothenberg deftly and consistently helps students analyze each phenomena, as well as the relationships among them, thereby deepening their understanding of each issue surrounding race and ethnicity.

Intersections of Race, Class, Gender, and Nation in Fin-de-siècle Spanish Literature and Culture Jennifer Smith 2016-09 This volume focuses on intersections of race, class, gender, and nation in the formation of the fin-de-siècle Spanish and Spanish colonial subject. Despite the wealth of research produced on gender, social class, race, and national identity few studies have focused on how these categories interacted, frequently operating simultaneously to reveal contexts in which dominated groups were dominating and vice versa. Such revelations call into question metanarratives about the exploitation of one group by another and bring to light interlocking systems of identity formation, and consequently oppression, that are difficult to disentangle. The authors included here study this dynamic in a variety of genres and venues, namely the essay, the novel, the short story, theater, and zarzuelas. These essays cover canonical authors such as Benito Pérez Galdós and Emilia Pardo Bazán, and understudied female authors such as Rosario de Acuña and Belén Sárraga. The authors included here study this dynamic in a variety of genres and venues, namely the essay, the novel, the short story, theater, and zarzuelas. The volume builds on recent scholarship on race, class, gender, and nation by focusing specifically on the intersections of these categories, and by studying this dynamic in popular culture, visual culture, and in the works of both canonical and lesser-known authors.

Race, Gender, Sexuality, and Social Class Susan J. Ferguson 2015-07-16 An eye-opening exploration of how social statuses intersect to shape our identities and produce inequalities. In this fully edited and streamlined *Race, Gender, Sexuality, and Social Class: Dimensions of Inequality and Identity, Second Edition*, Susan Ferguson has carefully selected readings that open readers' eyes to the ways that social statuses shape our experiences and impact our life chances. The anthology represents many of the leading voices in the field and reflects the many approaches used by scholars and researchers to understand this important and evolving subject. The anthology is organized around broad topics (Identity, Power and Privilege, Social Institutions, etc.), rather than categories of difference (Race, Gender, Class, Sexuality) to underscore this fundamental insight: race, class, gender, and sexuality do not exist in isolation; they often intersect with one another to produce social inequalities and form the bases of our identities in society. Nine readings are new to this edition: Michael Polgar—on Jewish assimilation and culture in the U.S. Katherine Franke—on the 1940 Supreme Court case, *Suneri v. Cassagne*, concerning racial identity Carla Pfeffer—on transgender identity Michelle Alexander—on the New Jim Crow Richard Lachmann—on the decline of the U.S. as an economic and political power Abby Ferber—on privilege and “oppression blindness” Amada Hess—Why Women Aren’t Welcome on the Internet Iris Marion Young—Five Faces of Oppression Ellis Cose—Rage of the Privileged “The choice of readings in *Race, Gender, Sexuality, and Social Class: Dimensions of Inequality and Identity* is better than my current text in terms of inequality and steps of closing the gaps.” – Dr. Deden Rukmana, Savannah State University “I really like how *Race, Gender, Sexuality, and Social Class: Dimensions of Inequality and Identity* deals with underlying concepts rather than difference by x, y, or z.” – Ana Villalobos, Brandeis University

Gender, Race, and Class in Media Bill Yousman 2020-07-24 *Gender, Race, and Class in Media* provides students

a comprehensive and critical introduction to media studies by encouraging them to analyze their own media experiences and interests. Editors Bill Yousman, Lori Bindig Yousman, Gail Dines, and Jean McMahon Humez explore some of the most important forms of today's popular culture—including the Internet, social media, television, films, music, and advertising—in three distinct but related areas of investigation: the political economy of production, textual analysis, and audience response. Multidisciplinary issues of power related to gender, race, and class are integrated into a wide range of articles examining the economic and cultural implications of mass media as institutions. Reflecting the rapid evolution of the field, the Sixth Edition includes 18 new readings that enhance the richness, sophistication, and diversity that characterizes contemporary media scholarship.

Inequality David Grusky 2018-05-04 This book redirects the focus of public debate to issues of gender and racial segregation and suggests that they should be fundamental to thinking about the status of black Americans and the origins of the urban underclass. It is a starting point for students and advanced scholars of inequality.

White Lies Jessie Daniels 2016-01-08 White supremacist groups have traditionally been viewed as "fringe" groups to be ignored, dismissed, or at most, observed warily. White Lies investigates the white supremacist imagination, and argues instead that the ideology of these groups is much closer to core American values than most of us would like to believe. The book explores white supremacist ideology through an analysis of over 300 publications from a variety of white supremacist organizations. It examines the discourse of these publications and the ways in which "whites," "blacks," and "Jews" are constructed within that discourse.

Intersectional Approach Guidroz Kathleen 2010-05-07 Inter sectionality, or the consideration of race, class, and gender, is one of the prominent contemporary theoretical contributions made by scholars in the field of women's studies that now broadly extends across the humanities, social sciences, and natural sciences. Taking stock of this transformative paradigm, The Intersectional Approach guides new and established researchers to engage in a critical reflection about the broad adoption of inter sectionality that constitutes what the editors call a new "social literacy" for scholars. In eighteen essays, contributors examine various topics of interest to students and researchers from a feminist perspective as well as through their respective disciplines, looking

specifically at gender inequalities related to globalization, health, motherhood, sexuality, body image, and aging. Together, these essays provide a critical overview of the paradigm, highlight new theoretical and methodological advances, and make a strong case for the continued use of the intersectional approach both within the borders of women's and gender studies and beyond.

On Our Own Terms Leith Mullings 2014-05-12 This volume utilizes the cross-cultural, historical and ethnographic perspective of anthropology to illuminate the intrinsic connections of race, class and gender. The author begins by discussing the manner in which her experience as a participant observer led her to research and write about various aspects of African-American women's experiences. She goes on to provide a critical analysis of the new scholarship on African-American women, and explores issues of race, class and gender in the arenas of work, kinship and resistance.

Bringing the Empire Home Zine Magubane 2004 How did South Africans become black? How did the idea of blackness influence conceptions of disadvantaged groups in England such as women and the poor, and vice versa? *Bringing the Empire Home* tracks colonial images of blackness from South Africa to England and back again to answer questions such as these. Before the mid-1800s, black Africans were considered savage to the extent that their plight mirrored England's internal Others—women, the poor, and the Irish. By the 1900s, England's minority groups were being defined in relation to stereotypes of black South Africans. These stereotypes, in turn, were used to justify both new capitalist class and gender hierarchies in England and the subhuman treatment of blacks in South Africa. Bearing this in mind, Zine Magubane considers how marginalized groups in both countries responded to these racialized representations. Revealing the often overlooked links among ideologies of race, class, and gender, *Bringing the Empire Home* demonstrates how much black Africans taught the English about what it meant to be white, poor, or female.

Affirmative Advocacy Dara Z. Strolovitch 2008-09-15 The United States boasts scores of organizations that offer crucial representation for groups that are marginalized in national politics, from women to racial minorities to the poor. Here, in the first systematic study of these organizations, Dara Z. Strolovitch explores the challenges and opportunities they face in the new millennium, as waning legal discrimination coincides with increasing political and economic inequalities within the populations they represent. Drawing on rich new data from a survey of 286 organizations and interviews with forty officials, Strolovitch finds that groups too often prioritize the interests of their most advantaged members: male rather than female racial minorities, for example, or affluent rather than poor women. But Strolovitch also finds that many organizations try to remedy this inequity, and she concludes by distilling their best practices into a set of principles that she calls affirmative advocacy—a form of representation that aims to overcome the entrenched but often subtle biases against people at the intersection of more than one marginalized group. Intelligently combining political theory with sophisticated empirical methods, *Affirmative Advocacy* will be required reading for students and scholars of American politics.

Race, Class and Education (RLE Edu L) Len Barton 2012-05-04 One problem which continues to absorb social scientists is the way in which so much social deprivation stems from racial or class status. The discussion in this book is developed in two ways: firstly, careful attention is given to an examination of the way minority groups create and maintain collective identities and action. Secondly, the relationship between this movement and such topics as racism in schools, schooling, unemployment and West Indian involvement in sporting rather than academic activities is analysed, together with the nature of the educational experience of different class and gender groups.

Women, Race, & Class Angela Y. Davis 2011-06-29 From one of our most important scholars and civil rights activist icon, a powerful study of the women's liberation movement and the tangled knot of oppression facing Black women. "Angela Davis is herself a woman of undeniable courage. She should be heard."—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of

its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women's rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger's racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

Systemic Crises of Global Climate Change Phoebe Godfrey 2016-04-14 Sociological literature tends to view the social categories of race, class and gender as distinct and has avoided discussing how multiple intersections inform and contribute to experiences of injustice and inequity. This limited focus is clearly inadequate. *Systemic Crises of Global Climate Change* is an edited volume of 49 international, interdisciplinary contributions addressing global climate change (GCC) by intentionally engaging with the issues of race, gender, and class through an intersectional lens. The volume challenges and inspires readers to foster new theoretical and practical linkages and think beyond the traditional, and oftentimes reductionist, environmental science frame by examining issues within their turbulent political, cultural, and personal landscapes. Varied media and writing styles invite students and educators to reflexively engage different, yet complementary, approaches to GCC analysis and interpretation, mirroring the disparate voices and viewpoints within the field. The second volume, *Emergent Possibilities for Sustainability* will take a similar approach but will examine the possibilities for solutions, as in the quest for global sustainability. This book is a valuable resource for academics, researchers and both undergraduate and post-graduate students in the areas of Environmental Studies, Climate Change, Gender Studies and International studies as well as those seeking a more intersectional analysis of GCC.
