War and Virtual War Jones Irwin 2004 If the practice of war is as old as human history, so too is the need to reflect upon war, to understand its meaning and implications. The Pre-Socratic philosopher Heraclitus asserted in 600BC that War (polemos) is justice, thus inaugurating a long philosophical tradition of consideration of the morality of war. In recent times, the increased specialisation of academic disciplines has led a to a fragmentation of the thematic of war within the academy - the topic of war is as likely to be addressed by sociologists, cultural theorists, psychologists and even computer scientists as it is by historians, philosophers or political scientists. This diversity of disciplinary approaches to war is undoubtedly fruitful in itself but can lead to an isolation of respective disciplinary analyses of war from each other. In July 2002, at Mansfield College, Oxford, an inter-disciplinary conference on war (entitled 'War and Virtual War') was held so as to redress some of this disciplinary isolationism and to forge an integrative dialogue on war, in all its facets. The papers in this volume were nominated by delegates as the most paradigmatic of the ethos of the original project and the most successful in achieving its aims of inter-disciplinarity and critical dialogue.

The Vampire in Science Fiction Film and Literature Paul Meehan 2014-07-09 Vampires have been a popular subject for writers since their inception in 19th century Gothic literature and, later, became popular with filmmakers. Now the classical vampire is extinct, and in its place are new vampires who embrace the hi-tech worlds of science fiction. This book is the first to examine the history of vampires in science fiction. The first part considers the role of science and pseudo-science, from late Victorian to modern times, in the creation of the vampire, as well as the "sensation fiction" of J. Sheridan Le Fanu, Bram Stoker, Arthur Conan Doyle and H.G. Wells. The second part focuses on the history of the science fiction vampire in the cinema, from the silent era to the present. More than sixty films are discussed, including films from such acclaimed directors as Roger Corman, David Cronenberg, Guillermo del Toro and Steven Spielberg, among others.

Asian Defence Review 2013 Air Marshal Vinod Patney 2014-03-15 Going by all estimates, this is going to be an Asia-centred century. Indeed, a shift of global power is under way from West to East. The rise of China and India, the recovery and resurgence of Russia on one side, and Japan, on the other, and the nature of the international order are leading to enormous changes. These transformational changes

in the military, economic, social and political dynamics of Asia will only accelerate with the passage of time. Historically, changes in the international order and equations of power among nations have been almost inevitably accompanied by conflicts and wars. The challenge ahead, therefore, for the international community in general, and the Asian countries in particular, is to ensure that this is avoided, and competition, which is inevitable, is managed without escalating to the level of armed conflict. This is crucial for most countries, and especially so for India so that its pursuit of comprehensive national development can progress without adverse distractions. In order to work toward such goals, it is necessary to look at security and military-related issues as objectively as possible. It is with this objective in view that the Centre for Air Power Studies has been bringing out the Asian Defence Review. This volume, a resource base for both the professional and the general readers, is the eighth in the series under this title, which aims to fill a critical information and knowledge gap in current strategic literature dealing with military strategy, defence politics and trends in military capabilities that impact countries in Asia. In particular, it covers some of the important issues that affect the Asian countries, including those related to air power, outer space, Pakistan, China, cruise missiles and sea-based deterrence.

Atomic Habits James Clear 2018-10-16 The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes, Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving--every day. James Clear, one of the world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: • make time for new habits (even when life gets crazy); • overcome a lack of motivation and willpower; • design your environment to make success easier; • get back on track when you fall off course; ...and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

Race Car Rally! Alan Copeland 2018-09-18 Grab hold of this book that lets you steer a race car that's revving up to win the big race! This is going to be a tough race. . . . There are a bunch of speedy cars already ahead of you! You're coming up to a blue car there on your right. Speed up and then swerve into the lane to get ahead of him! China Versus The Us: Who Will Prevail? Alfredo Toro Hardy 2020-06-24 The heralding of ambitions and hardening of geopolitical and military stances by China has given rise to few questions: Did China challenge the United States too hard and too soon and, by doing so, seriously jeopardize its chances of achieving its objectives? Can Washington still contain China's ascendancy and retain its current leading status? This book attempts to explore these questions and analyse if China has tried to display its strength to America too soon. It argues that by comparing the comprehensive national power of the two countries, one may be able to answer the above questions.

Trail Blazer Ryan Sandes 2016-03-01 What does it take to run a six-day race through the world's harshest deserts? Or 100 miles in a single day at altitudes that would leave you breathless just walking? More than that, though: what is it like to win these races? South Africa's ultra-trail-running superstar Ryan Sandes has done just that. Since bursting onto the international trail-running scene by winning the first multistage race he ever entered - the brutal Gobi March - Ryan has gone on to win various other multistage and single-day races around the globe. Written with bestselling author and journalist Steve Smith, *Trail Blazer - My Life as an Ultra-distance Trail Runner* recounts the life story of this intrepid sportsman, from his experiences as a rudderless party animal to becoming a world-class athlete, and includes details on his training regimes, race strategies and aspirations for future sporting endeavours. Sports enthusiasts will enjoy the adrenaline-inducing trials and tribulations of one of South Africa's most awe-inspiring athletes, while endurance-sport participants - from beginners to aspirant pros - will benefit from his insights and advice. As Professor Tim Noakes says in the Foreword to this book: 'However much we might think we know and understand, there are some phenomena which now, and perhaps forever, we will never fully comprehend. We call such happenings "enigmas". Or even miracles. Ryan Sandes is one such.'

Real Men Work in the Pits Jeff Hammond 2005-01-15 A memoir of the author's life working in a NASCAR pit crew, from his early days as a tire changer and jackman to his promotion to crew chief, working with such champion drivers as Cale Yarborough, Darrell Waltrip, and Dale Earnhardt.

Artificial Intelligence Charles Jennings 2019-05-08 Self-learning machines called AIs are popping up all around us. They will alter our lives as workers, consumers, investors, citizens, patients and students. We all need to get smart about AIs, now! That's Charles Jennings' message in his provocative new book, *Artificial Intelligence: The Rise of the Lightspeed Learners*.

The Cold War Comes to Main Street Lisle A. Rose 1999 In 1950, Main Street American was abruptly traumatized. The sudden prospect of thermonuclear war with the Soviet Union, Senator McCarthy's vicious anticommunist crusade, and the beginning of the Korean War all combined to dampen the public mood. The Cold War invaded every home. Rose maintains that 1950 was a pivotal year for the nation. He argues that the convergence of Korea, McCarthy, and the bomb wounded the nation in ways from which we've never fully recovered. Brimming with originality, this book makes readers look at the Cold War from a dozen different angles.

X-Isle Steve Augarde 2010-07-13 Ever since the floods came and washed the world away, survivors have been desperate to win a place on X-Isle, the island where life is rumored to be easier than on what's left of the mainland. Only young boys stand a chance of getting in, the smaller and lighter the better. Baz and Ray are two of the lucky few to be chosen, but they soon discover that X-Isle is a far cry from paradise. Ruled by Preacher John, a dangerous religious fanatic, it's a violent, unpredictable place, where terrible things can happen at any moment. The boys hatch an extraordinary plan in order to protect themselves-the construction of a mighty weapon of defense. But can they complete this weapon in time, and are they really prepared to use it to secure their freedom? Powerful and compelling, X-Isle is a fast-moving thriller and a great read for boys. Filled with suspense, fights, adventure, and mystery, this is a book that will keep you guessing right to the very end.

Handbook on Wealth and the Super-Rich Iain Hay 2016-01-29 Fewer than 100 people own and control more wealth than 50 per cent of the world's population. The Handbook on Wealth and the Super-Rich is a landmark multidisciplinary evaluation of both the lives and lifestyles of the super-rich, as well as the processes that underpin super-wealth generation and its unequal distribution. Drawing on international case studies, leading experts from across the social sciences offer 22 accessible and coherently organized chapters, which critically analyse a range of topics including: • the legitimacy of extreme wealth from a moral economic perspective • biographies of illicit super-wealth • London's housing markets • how the very wealthy fly • the environmental consequences of super-rich lives • crafting immigration policies to attract the rich. Students and scholars studying a host of topics such as development studies, economics, geography, history, political science and sociology will find this book eminently engaging. It will also be of great interest to public commentators, charitable organizations and NGOs concerned with wealth and income distributions.

The Bishop Emgee 2019-09-23 The Bishop is based loosely around the game of chess but essentially it deals with the people involved in this particular microcosm of society and the clash that occurs when three different cultures collide - the American, the British and the Australian. Madison Chatfield, a New York journalist whose career has stalled after a regrettable incident in the office when she is sent off on a graveyard assignment to England. Thanks to her unwavering ambition and her eye for a scoop, she meets up with Tobias Byron, the reigning champion; a reclusive but very opinionated Englishman and Gary Bridgewater, a young, laid-back Australian who flaunts all the establishment rules but, who is in fact the future of the game. The story follows these three characters through the relationships they strike up with each other - thanks primarily to the game which takes them from England to Boston and New York and then back again to the UK - and is sprinkled with a healthy dose of pertinent political and social commentary as it makes its way - via the inevitable betrayal of trust - towards its rather unexpected conclusion.

Ways Out of the Arms Race J Hassard 1989-11-01 This congress gathers together scientists from all over the world to analyse the problems of, and possible solutions to, the arms race. Speakers: A Arbatov, E Ash, V Baranovsky, P Deák, H-P Dürr, S Elworthy, R Ennals, R Fieldhouse, R Forsberg, V Gamba-Stonehouse, R Garwin, V Goldanskii, F Heisbourg, F von Hippel, D Hodgkin, S Kapitza, T Kibble, A Lecocq, P Lewis, S Lunn, R McNamara, S Oznobishev, J Pike, R Rilling, J Rotblat, R Sagdeev, M Schmidt, J Sharp, P Smoker, P Starlinger, J A Stein, K Subrahmanyam, T Taylor, M-B Theorin, J Thompson, R Trapp & C Voûte. Readership: Scientists and general.

Dataquest 1995

The Great Transition Mauro Bonaiuti 2014-06-05 Recent events including the financial crisis and the gradual lessening of the planet's natural resources have raised the fundamental question as to whether the capitalist market system can survive its own contradictions or whether we are witnessing the outset of a profound change in civilization. By deploying the tools of the science of complexity alongside those of historical research, Mauro Bonaiuti tackles this basic question, posed against a backcloth of declining marginal returns where growth in the complexity of industrial, military and bureaucratic-institutional apparatuses is thought to have led to progressive increases in economic, social and environmental costs. In this framework, the economic crisis we are traversing, grave as it is, could be interpreted not as a simple cyclical crisis, from which it is possible to escape by the traditional policies of supporting growth, but as the outcome of a 'passage of civilization' inscribed in the long-term evolutionary dynamics of capitalism. After the crisis that started in 2008, with millions of people unemployed, with the failure of the economy to pick up and with the ever-growing sense of precariousness and insecurity, we are beginning to suspect that we are facing something more than a cyclical crisis.

A Citizen's Blueprint Emgee 2014-07-25 In today's conformist, censorious, politically-correct world we are not allowed to speak our minds for fear of being called a racist, a sexist or a bigot - and yet, when somebody does buck the trend and says what we all - or at least the majority of us - are really thinking, we often applaud it. Why is that? Surely if the majority of people think in a certain way, then that should be the way that our democracy is run. We should not have a silent majority wishing that the country was run in one way, while an arrogant minority is taking it in a completely different direction. Examples abound in UK politics of politicians not listening to the people who elected them (the EU, the wars in Iraq and Afghanistan etc.) Indeed, in recent years, in politics as in TV, substance has given way to spin. Well I intend to change that. The PDC could not promise a horn of plenty for all but what it would promise is an honest, hard-working team of dedicated professionals working together to get the best deal for this country and its inhabitants - not for themselves, not for their cronies or for the self-serving elite but for the hard-working citizens of this country without whom there would be no Britain to make Great again NB - I do not subscribe to social networks but if you would like to show your support for this project or make a pledge towards its funding you may do so at; www.the-pdc.org.uk

Business India 2007-04

MAGE RAPPORT Jens F. Simon 2022-04-08 Mysterious events shake the local civilization. It seems that sorcerous powers and magic are at play. Several assassinations attempt on Sigurd, which he survives only because of his special abilities, convince him that he must join forces with the new MBF organization to solve the mysteries. His top priority, however, is to find the organic ship PAURUSHEYA, which also mysteriously disappeared 250 years ago. In a forgotten and impenetrable part of the world, in the middle of the dense Honduran rainforest in the region of La Mosquitia, Alethea and Sigurd come across the legendary city. Through the "Ring of Srem" he and Alethea, the former material hologram and avatar of the spaceship Paurusheya, are transported to the energetic half-world of the Zetschn'cha. There is the Hemisphere, the refuge of the mage Sol'alto, the sole ruling tyrant.

Rules of Play Katie Salen Tekinbas 2003-09-25 An impassioned look at games and game design that offers the most ambitious framework for understanding them to date. As pop culture, games are as important as film or television—but game design has yet to develop a theoretical framework or critical vocabulary. In *Rules of Play* Katie Salen and Eric Zimmerman present a much-needed primer for this emerging field. They offer a unified model for looking at all kinds of games, from board games and sports to computer and video games. As active participants in game culture, the authors have written *Rules of Play* as a catalyst for innovation, filled with new concepts, strategies, and methodologies for creating and understanding games. Building an aesthetics of interactive systems, Salen and Zimmerman define core concepts like "play," "design," and "interactivity." They look at games through a series of eighteen "game design schemas," or conceptual frameworks, including games as systems of emergence and information, as contexts for social play, as a storytelling medium, and as sites of cultural resistance. Written for game scholars, game developers, and interactive designers, *Rules of Play* is a textbook, reference book, and theoretical guide. It is the first comprehensive attempt to establish a solid theoretical framework for the emerging discipline of game design.

Green Electricity Kendall F. Haven 2011 This fascinating book explores the pros and cons of the top 25 green electricity technologies, illuminating how each technology works and detailing the key hurdles each emerging energy strategy has to overcome before it becomes a viable option. * Suggests a low or no-cost activity, research project, or demonstration that students can undertake for each energy technology topic * Contains content specifically written for intermediate and middle school audiences * Provides inquiry and discussion questions to engage students' critical thinking skills * Includes a list of "For Further Reading" suggestions with every entry
