**Design, Make, Play** Margaret Honey 2013-03-12 Design, Make, Play: Growing the Next Generation of STEM Innovators is a resource for practitioners, policymakers, researchers and program developers that illuminates creative, cutting edge ways to inspire and motivate young people about science and technology learning. The book is aligned with the National Research Council's new Framework for Science Education, which includes an explicit focus on engineering and design content, as well as integration across disciplines. Extensive case studies explore real world examples of innovative programs that take place in a variety of settings, including schools, museums, community centers, and virtual spaces. Design, Make, and Play are presented as learning methodologies that have the power to rekindle children's intrinsic motivation and innate curiosity about STEM (science, technology, engineering, and mathematics) fields. A digital companion app showcases rich multimedia that brings the stories and successes of each program—and the students who learn there—to life.

*An Introduction to Language and Linguistics* Ralph Fasold 2006-03-06 This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Becoming Places Kim Dovey 2009-07-09 About the practices and politics of place and identity formation - the slippery ways in which who we are becomes wrapped up with where we are - this book exposes the relations of place to power. It links everyday aspects of place experience to the social theories of Deleuze and Bourdieu in a very readable manner. This is a book that takes the social critique of built form another step through detailed fieldwork and analysis in particular case studies. Through a broad range of case studies from nationalist monuments and new urbanist suburbs to urban laneways and avant garde interiors, questions are explored such as: What is neighborhood character? How do squatter settlements work and does it matter what they look like? Can architecture liberate? How do monuments and public spaces shape or stabilize national identity?

**Reflections on the Astronomy of Glasgow** David Clarke 2013-05-24 How Astronomy contributed to the educational enlightenment of Glasgow, to its society and to its commerce. The words 'Astronomy' and 'Glasgow' seem an incongruous juxtaposition, and yet the two are closely linked over 500 years of history. This is a tale of enlightenment and scientific progress at both institutional and public levels. Combined with the ambitions of civic commerce, it is a story populated with noteworthy personalities and intense rivalries. It is remarkable to realise that the first Astronomy teaching in the Glasgow 'Colledge' presented an Earth-centred Universe, prior to the Copernican revolution of the mid sixteenth Century. Glasgow was later known astronomically for the telescope observations of sunspots made by Wilson in the 1760s, but less well known are the ideas related to mono-chromaticity within light, to dew point and hoar frost, and Herschel's discovery of infra-red energy in solar radiation by application of Glasgow-made thermometers. This engrossing and entertaining scientific history includes the story of Glasgow's 'Big Bang' of 1863, the controversy over 'Astronomer Royal for Scotland' and a historical survey of the eight observatories that once populated Glasgow. David Clarke brings us a complex weave of science and accompanying social history in this unique and fascinating work.
