Deciphering the Signs of God Annemarie Schimmel 1994 The Qur'an constantly exhorts people to 'look at the signs of god,' signs that are hidden 'in the horizons and in themselves.' This book examines the mysteries of Islam using a phenomenological method to come closer to the true center of Muslim belief. Schimmel takes as her starting point the simplest 'signs of god' -- natural phenomena like stones, plants and animals, and their use in religious and symbolic language. She then moves on to less obvious signs, such as sacred time and space, ritual actions, forms of worship, the sacred individual, and the order of the community. She concludes with an examination of the individual's response to the mystery of the Divine. Based on both original classical sources and modern literature, as well as the author's considerable personal experience, this is not only a fascinating survey of Islamic practices and beliefs, but also a broad and intregated overview of the phenomenology of Islam.

The Coins of the Indian Sultanates Stan Goron 2001 Illustrations: 3013 B/w
Coins Illustrations Description: The coinage of the Indian Sultanates is a very important primary source for helping us to understand the political and economic history of much of what is now India, Pakistan and Bangladesh during the period from the beginning of the thirteenth century AD until the seventeenth century when the last of the sultanates, that of Bijapur, was absorbed into the Mughal Empire. The right of sikka, i.e., the right to strike coins was one of the two juridically recognized expressions of the right of the ruler to sovereignty, and it was a right that was jealously guarded. It is a happy feature of Islamic coinage that the coins bear information not only about the rulers' names and titles but very often also the place and date of minting. In this way we can follow the progress of their rule as their territories expanded or contracted. We can learn of rulers who are otherwise not known to history, their usually ephemeral reigns not recorded in any literary sources that have come down to us. We can also examine the metals used for the currency, its fineness or debasement, and seek to draw conclusions from that. The present book, however, does not go that far. It is not intended as an economic history of the sultanate period but as an extensive, illustrated catalogue of coin types. More types are included here than in any previously published book on sultanate coins. Many are published for the first time. They come from both public and private collections in India and elsewhere. Brief histories are included for each sultanate as well as comments on the coinage and the coin legends. An extensive bibliography is also provided. This book will serve as an essential reference for students and collectors of Indian sultanate coins and for anyone else interested in this period of South Asian history.

Covering Islam Edward W. Said 2015-08-19 In this classic work, now updated, the author of *Culture and Imperialism* reveals the hidden agendas and distortions of fact that underlie even the most "objective" coverage of the Islamic world. From the Iranian hostage crisis through the Gulf War and the bombing of the World Trade Center, the American news media have portrayed "Islam" as a monolithic entity, synonymous with terrorism and religious hysteria. At the same time, Islamic countries use "Islam" to justify unrepresentative and often repressive regimes. Combining political commentary with literary criticism, *Covering Islam* continues Edward Said's lifelong investigation of the ways in which language not only describes but also defines political reality.

The Coinage of Northern India Prafulla Chandra Roy 1980 The Present Thesis Fulfils A Long Felt Desideratum In The Field Of Numismatological Studies In India. So Far Our Knowledge About Early Medieval Coinage Of India Has Been Very Poor And Fragmentary. A Systematic And Comprehensive Study Of Sporadic Materials Has Been, For The First Time, Successfully Attempted In This Subject. The Author With Industry And Intelligence Has Collected Thematerials, Sorted And Collated Them And Reconstructed The Structure Of His Subject. It Is Based On The Discovery Of New Facts And Fresh Interpretation Of Already Known Facts And Current Theories. It Is Both Exhaustive And Critical. It Positively Forms A Valuable Contribution To The Literature Of Numismatics And Tends Generally To The Advancement Of Knowledge.The Present Work Shows The Painstaking Labour, A Critical Study Of The Subject, And Above All Original Suggestions Which Undoubtedly Enhance The Value Of The Dissertation Like The Present One. The Up-To-Date Bibliography Shows An Extensive Range Of Study In The Political History Of The Dynasties As Well, Without A Thorough Knowledge Of Which The Present Attempt Could Hardly Have Been Possible. The Author Has Rightly Rejected The View Of D.W. Macdowall, On The Coins Of Gangeyadeva. D.W. Macdowall Is No Doubt A Great Numismatist, And I Am Glad To See That A Young Scholar Is Not Afraid To Criticise Eminent Authorities Here As Well As Elsewhere And His Criticisms Are Just And Reasonable. The Magadh University Should Undertake The Task Of The Publication Of This Valuable Work.

Principles Ray Dalio 2018-08-07 #1 New York Times Bestseller "Significant...The book is both instructive and surprisingly moving." -The New York Times Ray Dalio, one of the world's most successful investors and entrepreneurs, shares the unconventional principles that he's developed, refined, and used over the past forty years to create unique results in both life and business—and which any person or organization can adopt to help achieve their goals. In 1975, Ray Dalio founded an investment firm, Bridgewater Associates, out of his two-bedroom apartment in New York City. Forty years later, Bridgewater has made more money for its clients than any other hedge fund in history and grown into the fifth most important private company in the United States, according to Fortune magazine. Dalio himself has been named to Time magazine's list of the 100 most influential people in the world. Along the way, Dalio discovered a set of unique principles that have led to Bridgewater's exceptionally effective culture, which he describes as "an idea meritocracy that strives to achieve meaningful work and meaningful relationships through radical transparency." It is these principles, and not anything special about Dalio—who grew up an ordinary kid in a middle-class Long Island neighborhood—that he believes are the reason behind his success. In Principles, Dalio shares what he's learned over the course of his remarkable career. He argues that life, management, economics, and investing can all be systemized into rules and understood like machines. The book's hundreds of practical lessons, which are built around his cornerstones of "radical truth" and "radical transparency," include Dalio laying out the most effective ways for individuals and organizations to make decisions, approach challenges, and build strong teams. He also describes the innovative tools the firm uses to bring an idea meritocracy to life, such as creating "baseball cards" for all employees that distill their strengths and weaknesses, and employing computerized decision-making systems to make believability-weighted decisions. While the book brims with novel ideas for organizations and institutions, Principles also offers a clear, straightforward approach to decision-making that Dalio believes anyone can apply, no matter what they're seeking to achieve. Here, from a man who has been called both "the Steve Jobs of investing" and "the philosopher king of the financial universe" (CIO magazine), is a rare opportunity to gain proven advice unlike anything you'll find in the conventional business press.

The Tao of Islam Sachiko Murata 1992-03-23 The Tao of Islam is a rich and diverse anthology of Islamic teachings on the nature of the relationships between God and the world, the world and the human being, and the human being and God. Focusing on gender symbolism, Sachiko Murata shows that Muslim authors frequently analyze the divine reality and its connections with the cosmic and human domains with a view toward a complementarity or polarity of principles that is analogous to the Chinese idea of yin/yang. Murata believes that the unity of Islamic thought is found, not so much in the ideas discussed, as in the types of relationships that are set up among realities. She pays particular attention to the views of various figures commonly known as "Sufis" and "philosophers," since they approach these topics with a flexibility and subtlety not found in other schools of thought. She translates several hundred pages, most for the first time, from more than thirty important Muslims including the Ikhwan al-Safa', Avicenna, and Ibn al-'Arabi. Sachiko Murata is Professor of Religious Studies at the State University of New York, Stony Brook.

Some Distinctive Features of Islam Mirza Tahir Ahmad 2012 Some distinctive features of islam was a lecture delivered by Hazrat Mirza Tahir Ahmad (rh) at the University of Canberra, Australia. The speaker builds up his lecture on the thesis that the most distinctive feature of Islam is twofold. First, it is the only religion which claims to be, and is, the final, the universal and eternal religion for all times and for all peoples. Second, it is the only religion which acknowledges, and bears witness to, the veracity of every other religions and claims that the truth is not the monopoly of Islam aloneówhereas every other religion claims that it alone contains the Divine truth. Then Hazrat Mirza Tahir Ahmad (rh) answers at some length the question that if all religions are from God then why is there any difference in religions. Moreover he argues three main points: that Islamic teachings are not only universal and eternal but are also complete, comprehensive and perfect; that the Holy Quran is the final and immutable word of God free from all human interpolation; and that the Prophet of Islam, the Holy Prophet Muhammad (sa) is the Seal of the Prophetsóthe best of themóand the perfect model of excellence for mankind. In the middle part of lecture he discusses seventeen features of Islam which distinguish it from other religion and ideologies including the Islamic concept of justice and Islamic teachings regarding the form and function of government. At the end the speaker introduces the Founder of Ahmadiyya Muslim Community and the Community itself to his audience concluding his lecture with an excerpt from the writings of the Promised Messiah (as).

Sing, Unburied, Sing Jesmyn Ward 2017-09-05 "A searing and profound Southern odyssey through Mississippi's past and present"--

Book of Illumination Aḥmad ibn Muḥammad Ibn 'Aṭā' Allāh 2005 Presenting a mystical and theological analysis of our human urge to create idols for ourselves and out of ourselves, this medieval author carefully recounts the enlightening counsels of his own masters. He is most attentive to the subtle psychological working of our human ego, marshaling resources for his Islamic tradition that can confront and overcome it. The result of desisting from claiming as our right and ability what is clearly beyond our control is illumination of the heart, clarity of the mind, and tranquility of the soul. This new translation masterfully illustrates the goal of Ibn Ata' Allah's discussion of achieving inner illumination of the heart, which is close to the sense of "enlightenment" that has become common in English language discussions of spirituality and gnosis.

Gus Dur Greg Barton 2002 In October 1999, Abdurrahman Wahid, almost blind and recovering from a nearfatal stroke, was elected as Indonesia's fourth president. Referred to as 'Indonesia's surprising new president' by the Economist, the man who had commanded the highest respect of his fellow countrymen for his lifetime devotion to public service, liberal democracy and tolerant Islam, was impeached in humiliating and controversial circumstances less than two years later. Wise to some, insolent to others, Abdurrahman's mercurial style of leadership constantly confounded critics and ultimately caused him to be widely misunderstood by both domestic and international observers. For the first time, biographer Greg Barton delves beneath the surface and gives us a unique insight into the man and his world drawn from his long relationship with Gus Dur - including being at his side during the final extraordinary months of the presidency. Those interested in the drama of modern Indonesian politics will find this book provides a fascinating and invaluable account of the enigmatic Gus Dur.

A Concise History of the Arabs John McHugo 2013-09-03 From Algeria and Libya to Egypt and Syria, the Arab world commands Western headlines, even as its complex politics and cultures elude the grasp of most Western readers and commentators. Perhaps no other region is so closely linked to contemporary U.S. foreign policy, and nowhere else does the unfolding of events have such significant consequences for America. *A Concise History of the Arabs* argues that the key to understanding the Arab world today—and in the years ahead—is unlocking its past. John McHugo takes the reader on a journey through the political, social, and intellectual history of the Arabs from the Roman Empire right up to the present day. His sweeping and fluent account describes in vivid detail the mission of the Prophet Muhammad, the expansion of Islam, the origins of Shiism, medieval and modern conflicts, the fall of the Ottoman Empire, the interaction with Western ideas, the struggle to escape foreign domination, the rise of Islamism, and the end of the era of dictators. McHugo reveals how the Arab world came to have its present form, why change was inevitable, and what choices lie ahead following the Arab Spring. This deeply informed and accessible account is the perfect entry point for anyone seeking to comprehend this vital part of the world.

A Concise History of Sunnis and Shi'is John McHugo 2018-04-02 The 1,400-year-old schism between Sunnis and Shi'is is currently reflected in the destructive struggle for hegemony between Saudi Arabia and Iran—with no apparent end in sight. But how did this conflict begin, and why is it now the focus of so much attention? Charting the history of Islam from the death of the Prophet Muhammad to the present day, John McHugo describes the conflicts that raged over the succession to the Prophet, how Sunnism and Shi'ism evolved as different sects during the Abbasid caliphate, and how the rivalry between the Sunni Ottomans and Shi'i Safavids ensured that the split would continue into the modern age. In recent decades, this centuries-old divide has acquired a new toxicity that has resulted in violence across the Arab world and other Muslim countries. Definitive, insightful, and accessible, *A Concise History of Sunnis and Shi'is* is an essential guide to understanding the genesis, development, and manipulation of the schism that for far too many people has come to define Islam and the Muslim world.

The Influence of Islam on Medieval Europe W. Montgomery Watt 1983

Living Without Silver John S. Deyell 1999-08-15 This book is concerned with money as an indicator of economic activity. It makes a comprehensive examination of the use of money from Afghanistan to Bihar, and from Kashmir to Malwa, during the period AD 750-1250. Its major premise is that the patterns of production, exchange, and dispersion of money over time can be used to define the economic systems of early medieval North India. This book explains and interprets the economic history of the period, using current models of feudalization, decentralization, trade, and commerce. The author rejects the common perception that money during this period was scarce, primitive, and debased, by analysing the evidence of surviving coin hoards. His findings suggest a considerably greater reliance on money, closer co-ordination of its use, and its wider circulation in larger quantities, than is consistent with many current models of the early medieval Indian economy.
