2022-09-23 This volume presents a collection of different views and perspectives, featuring both theoretical and empirical contributions, to provide deep insight into the role of innovation and of non-technological innovation (NTI) in contemporary business. It illustrates how NTI encourages organizational development as well as competitive advantage. Chapters display a variety of research methods, both qualitative and quantitative, including case studies, best practices, surveys, novel approaches to interpretations, concepts and theories. Together they contribute to a significant extension of the existing knowledge on non-technological innovations and their role in organizations. This volume highlights the effects of marketing and organizational innovation strategies on companies' innovation and overall performance, while demonstrating that the effects of NTI may vary depending on the phase of the innovation process, and how it differs within small, medium and large enterprises from manufacturing and service industries. It explores the bidirectional relationship between technological innovation (TI) and NTI, and considers the competences needed to implement NTI. The book is written for scholars and academic professionals from a wide variety of disciplines addressing issues of organizational change and innovation, new management techniques and strategies, and the sustainable growth of organizations. It may also be an interesting source of knowledge for graduate and postgraduate students in management.

Ancient Jewellery Jack Ogden 1992-01-01 00 Jewellery has a rare power to communicate, even across millennia, the feelings, beliefs, and aspirations of the people who wore it. Jewellery also contributes to the study of ancient art and metalworking techniques, for great skill was required to create what are often small-scale works of art. But the importance of surviving artifacts of the jeweller's craft--quite apart from the inherent attraction of individual pieces--is now increasing as the number of new scientific techniques available to archaeologists expands, complementing the more traditional methods of analysis. This book shows how important ancient jewellery is to interpreting the past. Diamonds for Profit Fred Cuellar 2003-03 The information in this comprehensive guide is of great value to both buyers and sellers because it offers inside information on how diamonds are professionally appraised and sold. Those who wish to dispose of the family diamonds at the best price learn how to choose a reliable appraiser and how to find legitimate buyers. Readers interested in pursuing diamond trading as an avocation will find valuable advice on how to spot good buys (and avoid scams) in classified ads, going-out-of-business sales, estate sales, pawnshops, auctions, and dealer's clubs. There is also a complete explanation of how to grade diamonds for colour and clarity, what flaws to look for, and how to estimate the carat weight of set stones.

cosmopolitan city is an exotic world—a place where diamonds, astronomically priced, are bought and sold on the strength of a handshake, and business disputes are resolved according to ancient Jewish principles of arbitration. Yet it is also a modern industry facing the same fundamental global changes affecting all businesses today. In *Diamond Stories*, Renée Rose Shield leads us into the unexamined realm of wholesale diamond traders in New York. Related to several well-respected traders, she had unprecedented access to a society normally closed to outside inquiry. Here she deftly blends her personal relationship and her anthropological training to provide an insightful exploration of this tradition-bound industry, the new challenges it faces, and the ways both industry and individuals adapt to and endure change. Shield begins with a fascinating history of diamond mining, combining the story of the De Beers cartel, the role of Jews in the trade, and the part diamonds have played both in war and liberation. Throughout, she incorporates commentary by current diamond traders. Succeeding chapters explore the evolving nature of both the global trade and the New York diamond district. Shield takes a close look at the increasingly complex ethnic makeup of the district, illuminates the rarely documented work done by women, chronicles the resilient system of arbitration, and reveals the ways in which many traders work well into their eighties and nineties. Their long lives of work, cushioned by the trade's social environment, offer hints for successful aging in general.

Diamond Design Marcel Tolkowsky 2015-08-04 Excerpt from *Diamond Design: A Study of the Reflection and Refraction and Refraction of Light in a Diamond* This book is written principally for students of precious stones and jewellers, and more particularly for diamond manufacturers and diamond cutters and polishers. The author will follow the evolution of the shape given to a cut diamond, and discuss the values of the various shapes and the reason for the discarding of the old shapes and the practically universal adoption of the brilliant. HPHT-Treated Diamonds Inga A. Dobrinets 2013-06-12 High-temperature and high-pressure treatment of diamond is becoming an important technology to elaborate diamonds. This is the first book providing a comprehensive review of the properties of HPHT-treated diamonds, based on the analysis of published data and the work of the authors. The book gives a detailed analysis of the physics of transformation of internal structures of diamonds subjected to HPHT treatment and discusses how these transformations can be detected using methods of optical microscopy and spectroscopy. It also gives practical recommendations for the recognition of HPHT-treated diamonds. The book is written in a language and terms which can be understood by a broad audience of physicists, mineralogists and gemologists.

Analytical Archaeometry Howell Edwards 2016-01-13 Analytical Archaeometry describes this interesting and challenging field of research - on the border between natural sciences (chemistry, spectroscopy, biology, geology) and humanities (archaeology, (art-)history, conservation sciences). It fills the gap between these two areas whilst focussing on the analytical aspects of this research field. The first part of the book studies the main analytical techniques used in this research field. The second part expands from the different types of materials usually encountered, and the final part is organised around a series of typical research questions. The book is not only focussed on archaeological materials, but is also accessible to a broader lay audience. Overall the book is clearly structured and gives insight into different approaches to the study of analytical providing extensive discussion on a wide range of techniques, materials, questions and applications. Due to the advances in analytical instrumentation and applications in this field, it is important to have all this information merged together. Academics as well as professionals in archaeology, art history, museum labs and conservation science will find this an invaluable reference source ensuring the reader is provided with the latest progress in this research field.
