Powers, inequalities and vulnerabilities Johannes J. Knoetze 2020-12-31 This research addresses the gap that is present in both missiology and family and youth ministry. Missiology does not focus on children and youth specifically, while this is the largest population in the developing world. On the other hand, family and youth ministry has a more pastoral than missional approach, not always taking cognisance of contexts like globalisation. Thus, the purpose of the book is to address the sometimes unintended and unnoticed influence of globalisation on the mission of the church, with a specific focus on children, youth and family. For this purpose, the International Association for Mission Studies study group for children, youth and families coming from different parts of the world decided to describe the powers, inequalities and vulnerabilities of children, youth and families in a globalised world from their specific contexts. Although the most prominent research methodology was critical literature studies, methods like autoethnographic, and empirical methods were also used. No decisions were made on a specific method of research for this publication. This publication can be viewed as an interdisciplinary and intra-disciplinary, because it deals with social sciences, anthropology, psychology, missiology, systematic theology and practical theology.

EDUCATIONAL ADMINISTRATION AND MANAGEMENT Dr. M. Sudarshan 2022-07-14 Educational administration is regarded as the process of integrating the appropriate human and material resources that are made available and made effective for achieving the purposes of a programme of an educational institution. The term 'Administration' doesn't refer to any single process or act. It is like a broad umbrella encompassing a number of processes such as:

planning, organizing, directing, coordinating, controlling and evaluating the performance. The same situation occurs in the field of educational administration. The concept of educational administration is applicable in case of an educational organisation which has certain purposes or goals to fulfill.

Human Capital Development in South Asia Asian Development Bank 2017-12-01 Human capital is an important factor for economic growth in South Asia. Between 1981 and 2010, human capital contributed about 22% of annual gross domestic product per worker growth in India. During the same period, it contributed around 21% in Bangladesh, and 16% in Sri Lanka. However, education and skills remain the binding constraint. Raising the quality of education and skills in South Asia's workforce can play a critical role in catching up to the level of development of the People's Republic of China, the Republic of Korea, and other successful Southeast Asian economies. This study reviews the development of human capital in South Asia and analyzes contributing factors to human development including policies and strategies that countries in South Asia follow.

Education :An Eternal Asset (Articles United) DR. PRATIK MUNGEKAR 2022-05-03 Dear Readers, To educate the complete child, teaching and learning must encompass all aspects of student development. How do experts from many disciplines collaborate and combine their skills and abilities to meet the developmental requirements of students? What attitudes and ideas are required to effectively collaborate in order to build healthy educational settings for children? Who has responsibility for the collaborative process, and who intervenes when it fails? There is room for everyone to excel intellectually if they are given the correct education from the beginning. "The function of education is to teach one to think deeply and critically." True education aims

to develop intelligence as well as character. The importance of cooperation and coordination in problem resolution and transformation in classrooms, schools, and school-community systems is emphasised. What exactly is 'Education'? What is its principal function, and what is it not? Which techniques support it, and at what cognitive levels? So many fundamental issues that many of our "trained teachers," among others, raise. And there are few forums where they may debate the few replies they have found so far. As a result, there was a perceived need for a book of this type, containing basic principles and introductions to many pertinent theories. I hope that the book will be a useful resource for student-teachers, teachers, teacher-educators, and all stakeholders in our country's educational institutions.

Universal Secondary Education in India Jandhyala B. G. Tilak 2020-07-24 This book offers a cutting-edge contribution on the importance of secondary education and assesses the strengths and weaknesses of its growth in India. Secondary education, long neglected, faces countless challenges and will require tremendous financial resources, millions of additional trained teachers, and vast infrastructure in terms of buildings, laboratories, libraries, ICT facilities, etc. The book examines these critical issues, with particular reference to the situation in India. It analyses the status quo of secondary education and discusses the strategies and approaches needed in order to universalize it. Including 20 chapters authored by eminent scholars in the field and from across the country, this book gathers the outcomes of a seminar organized by the Council for Social Development on Universalization of Secondary Education. The target audience includes policymakers, practitioners, administrators, education planners, researchers, teachers, and teacher educators with an interest in the future of secondary education.

CHILDHOOD AND GROWING UP MANGAL, S. K. 2019-05-01 The book, with comprehensive and practicable coverage, acquaints its readers with thorough knowledge and skills to help the growing children in their proper growth and development enabling them to reach the limit of their excellence on one hand, and instilling in them the sense of responsibility towards their society and nation on the other hand. It dwells on the essential topics such as nature of the process of growth and development going on at the various ages and developmental stages of children, their developmental needs and characteristics, individual differences and diversities existing among them, development of various abilities and capacities like intelligence, creativity, and overall personality characteristics, nature of the age-linked behavioural problems, adjustment and mental health, parenting styles, and methods of dealing with the behavioural problems, adjustment, and stressful conditions of the developing children. The text equips the readers with all what is in demand for helping the developing children at this juncture of rapid industrialisation, globalisation, urbanisation, modernisation and economic change. It is primarily designed for the undergraduate students of education and elementary education. **KEY FEATURES** • Incorporates quite advanced topics such as emotional intelligence, use of reflective journals, anecdotal records and narratives as method of understanding child's behaviour, and so on •

Includes detailed discussion of theories of child development, theories of learning, theories of intelligence, theories of achievement motivation, theories of creativity, and theories of personality • Offers engaging language and user-friendly mode of discussion • Adequately illustrated with examples, figures and tables • Comprises chapter-end summary for quick glance of the concepts.

Clean Development Mechanism And Swachh Bharat Abhiyan Dr I sundar

Secondary Education in India Weltbank 2012 The dramatic growth in Indian elementary education enrollment and improvements in retention and transition rates over the past ten years, particularly among more disadvantaged groups, are increasing pressure on the secondary level to absorb new entrants. Given ongoing center and state investments in Sarva Shiksha Abhiyan (education for all), this trend will continue for the next 10 years. At the same time, India's impressive, sustained economic growth has increased household and labor market demand for secondary and higher education. Secondary education's contribution to economic growth, demonstrated high social benefits (particularly for girls), and support of democratic citizenship reinforce the need for increased public support at this level, particularly in light of the very large inequalities in access to secondary education, by income, gender, social group and geography. The challenge is to dramatically improve access, equity and quality of secondary education simultaneously. Small-scale learning achievement studies and parental preference for private schools suggest that the quality of public secondary education is alarmingly low. Efforts to improve the quality of secondary education are thus urgent, but medium to long-term in producing results. India needs to make the public qualitative investments now in teacher education and accountability, curriculum reform, quality assurance, examinations reform, national assessment capabilities and management information systems, which will require time and significant institutional capacity building to succeed at a national scale. The recently launched centrally sponsored scheme for secondary education, Rashtriya Madhyamik Shiksha Abhiyan (RMSA), offers a strategic opportunity to improve access and equity; enhance quality, accountability and ability to measure learning outcomes; and promote standardization of curriculum and examinations across states. In addition, India's recent decision to participate in international assessments of student achievement is an extremely positive sign. Over time, such participation will provide an important objective baseline of students' cognitive skills and a future measure of success of the country's investments in elementary and secondary education.

Investment in Early Childhood Education in a Globalized World Guangyu Tan 2019-11-25 This book is a comparative study of how early childhood educational policies and initiatives in three countries—China, India, and the United States—have been utilized as both direct and indirect strategies for responding to fierce global economic competition. Human capital theory and cultural ecology theory serve as the conceptual framework for discussing how this has played out in each of the three countries. In addition, this book presents a

discussion and analysis of how the beliefs, parents' perspectives, and practices with regard to child-rearing and the education of young children have both changed and remained the same in response to forces of globalization.

A Decade of Research on School Principals Helene Ärlestig 2015-11-13 This book provides a unique map of the focus and directions of contemporary research on school leadership since 2000 in 24 countries. Each of these directions has its own particular cultural, educational and policy history. Taken together, the various chapters in the volume provide a rich and varied mosaic of what is currently known and what is yet to be discovered about the roles and practices of principals, and their contributions to the improvement of teaching and the learning and achievement of students. The particular foci and methodological emphases of the research reported illustrate the different phases in the development of educational policies and provision in each country. This collection is an important addition to existing international research that has shown beyond any reasonable doubt that the influence of school principals is second only to that of teachers in their capacity to impact students' progress and achievement and to promote equity and social justice.

Educational Administration in India Dr.Kotreshwaraswamy A. Surapuramath

ATTITUDES OF POSTGRADUATE STUDENTS TOWARDS LIFELONG LEARNING Dr Rajkumar Suresh Singh

The Pursuit of Human Well-Being Richard J. Estes 2017-01-09 This handbook informs the reader about how much progress we, the human race, have made in enhancing the quality of life on this planet. Many skeptics focus on how the quality of life has deteriorated over the course of human history, particularly given World War II and its aftermath. This handbook provides a positive perspective on the history of well-being. Quality of life, as documented by scientists worldwide, has significantly improved. Nevertheless, one sees more improvements in well-being in some regions of the world than in others. Why? This handbook documents the progress of well-being in the various world regions as well as the differences in those regions. The broad questions that the handbook addresses include: What does well-being mean? How do different philosophical and religious traditions interpret the concept of well-being within their own context? Has well-being remained the same over different historical epochs and for different regions and subregions of the world? In which areas of human development have we been most successful in advancing individual and collective well-being? In which sectors has the attainment of well-being proven most difficult? How does well-being differ within and between different populations groups that, for a variety of socially created reasons, have been the most disadvantaged (e.g., children, the aged, women, the poor, racial, ethnic, and sexual minorities)?

Quality of Secondary Education in India Charu Jain 2017-09-27 This book provides useful insights into quality issues in secondary education in India and addresses the important questions of why there is need to improve the

quality of education; how one can measure the quality of education; and the ways to improve quality. The analysis in this book is conceptually designed at three levels: national level performance and linkages; state level progress, disparities and linkages; and determinants of quality education at school level for measuring students learning outcomes and efficient teaching practices. The authors have used both quantitative and qualitative methods to probe into the various issues related to the quality of secondary education at micro and macro levels. This book provides a methodological framework to scholars attempting to measure and evaluate the quality of secondary education under various settings. It provides interesting insights into the identification of factors determining quality outcomes. The chapters discuss issues related to quality concepts, research methodologies, comparative analysis, key challenges, socio-economic linkages of secondary education, quality of education from students' and teachers' perspectives, quality measurement and policy suggestions. This is a valuable resource for researchers and students in the area of economics of education, education planning and administration, development studies and economics. This book is also useful for educational administrators and policy makers.

Vision of Education in India Muchkund Dubey 2020-11-01 The present volume seeks to review education in India through a matrix of nation-building, democratization process, identity, power, social and economic divisions, and social hierarchies. The book revisits the vision of education of some of the great Indian philosophers and leaders, deconstructs some of the seminal documents on education in India, brings out the significant role played by the people's movement in shaping education, and analyses the trends and progress in the implementation of educational programmes and policies. Please note: This title is co-published with Aakar Books, New Delhi. Print edition not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan, Maldives or Bhutan)

Inclusive Education : Practices and Challenges Dr. Deepa Sikand Kauts 2021-09-11 This book is an attempt to create awareness among practitioners and to strengthen the focus on inclusion in their strategies and future plans for education and highlight the areas that need particular attention to promote inclusive education and strengthen policy development. With this, we would move a step further and look into the current research trends in inclusive education as well as policy backdrops which provide us with the fair idea that how this idea of equity pedagogy is being propagated in the national educational policies of our country and further their translations in the Indian education realm. Papers compiled exhibit major concerns, issues, challenges and various practices for ensuring inclusion and inclusive pedagogical strategies for effective inclusive education. The researchers have also taken into account the social, cultural and learning diversities and the factors that facilitate to spot and remove barriers to learning and participation in education. It has the power to widen the scope of universal education by promoting access to all

learners and accelerating educational equity too. This book also focuses on how stakeholders can contribute to the continuous growth of inclusive education and its implications for society, communities, schools and classrooms as well to provide clarity on theoretical and research perspectives to promote the integration of theory and practice of inclusive education. The volume will be highly beneficial for teachers, parents, policymakers, administrators and students who care about the needs of the learners and the development of an equitable education system in our country.

India: Preparation for the World of Work Matthias Pilz 2016-01-27 This book explores how the Indian education and training system prepares young people for the world of work and for the requirements of the employment market – because India is a leading industrialised nation with a very young population and a high demand for a skilled workforce. Indian experts write from a course-specific perspective, offering a comprehensive picture of educational policy, curriculum design and cultural characteristics. The virtual absence of a formalised system of vocational training in India underlines the importance of this research.

Student Learning in South Asia Halil Dunder 2014-05-30 This book analyzes the performance of South Asian educational systems and identifies the causes and correlates of student learning outcomes. Drawing on successful initiatives both in the region and elsewhere in the world, it offers an insightful approach to setting priorities for enhancing the quality of school education in South Asia.

2030 Agenda and India: Moving from Quantity to Quality Sachin Chaturvedi 2019-10-19 This book presents a selection of multifaceted development issues involving social, economic and environmental aspects, in order to inspire and guide implementation of the United Nations' SDGs. It focuses on economic development, human well-being and sustainable pathways, with special attention to financial and knowledge resources, as well as measurement concepts. In doing so, the book draws a distinction between sustainability and sustainable pathways by refraining from dealing with broader and more direct environmental sustainability issues like climate change, environmental degradation and sustainable energy. The choice of topics, apart from their relevance for India, was guided by their importance in connection with multiple SDG goals. In addition to revealing the intricacies of systemic relationships and the dilemmas they create in policy choices, the book examines the role of actors and the critical importance of partnerships to help readers comprehend the breadth of diversities and inter-linkages involved. The roles of the central and state governments, the parliament and the state assemblies, the civil society, UN agencies and district-level authorities are separately explored in depth. Sharing valuable insights, the book encourages policymakers, practitioners and scholars to move towards a sustainable and equitable economy, and supports them in their efforts.

Teacher Reforms Around the World Motoko Akiba 2013 During the past decade, many countries have implemented a large-scale reform to improve teacher quality. These reforms have targeted a range of teacher policies including those on recruitment into teaching, pre-service teacher education, certification, hiring and placement, induction and professional development, teacher evaluation, career structure, and compensation. The current global focus on improving teacher quality provides a unique opportunity to learn from the successes and failures of teacher reforms around the world. Previous books on teacher reforms and policies tended to focus on descriptions of teacher policies and their backgrounds, and we have limited knowledge about how these policies were implemented and how they impacted teachers. This edited book fills this knowledge gap by focusing on implementations and outcomes of teacher reforms. The chapters are based on empirical studies that evaluated the implementations and outcomes of major teacher reforms in the countries from various parts of the world: North and South America, Asia and Oceania, Europe, Middle East and Africa. The concluding chapter discusses the lessons learned from these empirical studies and provides recommendations for policymakers around the world who are attempting to improve teacher quality and student learning through teacher reforms.

India International Monetary Fund. Asia and Pacific Dept 2017-02-22 The Indian economy has recorded strong growth in recent years, helped by a large terms of trade gain, positive policy actions including implementation of key structural reforms, a return to normal monsoon rainfall, and reduced external vulnerabilities. Inflation has remained low after the collapse in global commodity prices, a range of supply-side measures, and a relatively tight monetary stance. Key macroeconomic challenges include persistently-high household inflation expectations and large fiscal deficits, which limit policy space for supporting growth through demand measures. Supply bottlenecks and structural impediments are the main constraints to medium-term growth and job creation.
