Vanishing Act Art Wolfe 2015-01 In this astonishing book, legendary wildlife photographer Art Wolfe turns to one of nature's most fundamental survival techniques: the vanishing act. His portraits show animals and insects disappearing into their surroundings, using deceptions, disguises, lures, and decoys to confuse the eyes of both predator and prey. In a world where nothing is as it appears to be, a lion blends into the tall grass in the late-afternoon sun, or a harp seal disappears against his snowy backdrop. Pastel orchids can suddenly morph into predatory praying mantises, while lizard heads become tails. What at first appears to be a torn and decomposing leaf on a forest floor in Peru suddenly sprouts legs and starts walking: it is a leaf-mimic katydid. Spotting each cryptic animal amid Wolfe's clever compositions is both a fun and an informative challenge. At a time when many species are performing permanent vanishing acts due to habitat loss and human encroachment, this book showcases the beauty and evolutionary extremes of animal behavior and artfully illustrates the tenacious will to stay alive in an eat-or-be-eaten world.

True North: Peary, Cook, and the Race to the Pole Bruce Henderson 2006-02-17 "Nail-biting true adventure."--Kirkus Reviews In 1909, two men laid rival claims to this crown jewel of exploration. A century later, the battle rages still. This book is about one of the most enduring and vitriolic feuds in the history of exploration. "What a consummate cur he is," said Robert Peary of Frederick Cook in 1911. Cook responded, "Peary has stooped to every crime from rape to murder." They had started out as friends and shipmates, with Cook, a doctor, accompanying Peary, a civil engineer, on an expedition to northern Greenland in 1891. Peary's leg was shattered in an accident, and without Cook's care he might never have

walked again. But by the summer of 1909, all the goodwill was gone. Peary said he had reached the Pole in September 1909; Cook scooped him, presenting evidence that he had gotten there in 1908. Bruce Henderson makes a wonderful narrative out of the claims and counterclaims, and he introduces fascinating scientific and psychological evidence to put the appalling details of polar travel in a new context.

Canadian Environments Robert C. Thomsen 2005 Responding to the comprehensive topic 'Old Environments - New Environments', scholars from a variety of disciplines reflect the various connotations that the term 'environment' carries in a Canadian context. Whether moving within the realm of foreign policy, visual arts, constitutional questions, tourism, nature preservation or aboriginal rights, these essays put the capaciousness and cohesiveness of the nation to the test by illustrating the pressures enforced upon it by multiculturalism, the claims for self-determination, anti-confederate agitation and globalisation. The environments scrutinised are many and various, but within each the linchpin remains the quest for identity on the part of the individual, the group or the nation at large. Individually as well as collectively, the essays in this volume constitute an important contribution to the ongoing debate on Canadianness.

Gold in the Snow 2014-04-23 Who among us hasn't treasured memories of yesteryear told to us by our 'elders'? Aleta Miller has gathered vignettes and woven them into a tapestry of life in a Sierra Gold Rush mining town exotically named Port Wine (near Whiskey Diggins and Poker Flat). She has captured the essence of California's pioneer spirit, mining nuggets of real life stories that lay buried under yesteryear's journalism: Two story deep snowdrifts compete with a mountain visitor in a Locomobile. Civil War politics blend in with birth pains of the new California statehood. Downhill ski races lift spirits of beleaguered residents of Port Wine and La Porte, also known as Rabbit Creek. Uncontrollable fires gut reconstructed towns with diabolical regularity. In addition, we meet colorful characters who have touched the hills including Black Bart, Dutch Kate, Bret Harte, the Blue Lake Monster and Sasquatch. There is something for everyone in this delightful read. Aleta Farren Miller, as a young girl, became enamored of California gold country history during occasional visits to the Davis Motor Mine. The mine tunneled into a mountainside within a mile of Port Wine, CA. It was operated by Aleta's cousins Fred and Durward Davis and produced a modest quantity of gold. Aleta was enchanted by the remoteness of the location as well as by the surroundings which have

changed very little over the last 100 years. Passing encounters with "old timers" and whimsical poetry adorning grave sites in the Pioneer Cemetery stimulated a growing interest. Many of her relatives and even a pet parrot are buried there. With the help of her mother, Rilla Farren Cross, other family members, the archives of Bancroft Library at U.C. Berkeley, and The Mountain Messenger Newspaper at Downieville, CA, the interest culminated in Aleta investing almost a decade undertaking this collection of what now may be classified as journalistic memorabilia. We are indebted to her instinctive ability to sort out and preserve this remarkable collection of memories. Her own background and personal experiences make her uniquely capable of understanding and synthesizing the insight that she gained from that time in California history.

Swimming in Darkness Lucas Harari 2019-12-03 Pierre is a young man at a crossroads. He drops out of architecture school and decides to travel to Vals in the Swiss Alps, home to a thermal springs complex located deep inside a mountain. The complex, designed by architect Paul Zumthor, had been the subject of Pierre's thesis. The mountain holds many mysteries; it was said to have a mouth that periodically swallowed people up. Pierre, sketchbook in hand, is drawn to the enigmatic powers of the mountain and its springs, and attempts to uncover the truth behind them in the secret rooms he discovers deep within the complex. But he finds his match in a man named Valeret who is similarly obsessed, and who'd like nothing more than to eliminate his competitor. Gorgeously illustrated, *Swimming in Darkness* is an intriguing, noirish graphic novel about uncovering the powerful secrets of the natural world.

Across the Top of the World James Delgado 2009-12-01 The centuries-long quest for the fabled Northwest Passage rivals the story of Antarctic exploration for heroism, drama, and tragedy. Expedition after expedition set off in search of a sea route connecting Europe with Asia's riches; each expedition suffered extreme hardship and ended in defeat, until Roald Amundsen finally succeeded in 1903-06. *Across the Top of the World* brings this incredible saga to life through exhaustive research, grim firsthand accounts, and hundreds of dramatic images. Paintings, engravings, and photos of the intrepid men and their ships, as well as of relics and archaeological sites, provide a poignant and compelling link with the past, while landscapes and seascapes of the harsh yet beautiful Arctic illustrate the challenges that faced explorers. Covering all the major expeditions in detail, and written with passion and authority, this book is both a scholarly reference and an eminently readable history of Arctic exploration.

Ice Blink Scott Cookman 2001-03-07 "Absorbing.artfully narrat[es] a possible course of events in the expedition's demise, based on the one official note and bits of debris (including evidence of cannibalism) found by searchers sent to look for Franklin in the 1850s. Adventure readers will flock to this fine regaling of the enduring mystery surrounding the best-known disaster in Arctic exploration."--Booklist "A great Victorian adventure story rediscovered and re-presented for a more enquiring time."--The Scotsman "A vivid, sometimes harrowing chronicle of miscalculation and overweening Victorian pride in untried technology.a work of great compassion."--The Australian It has been called the greatest disaster in the history of polar exploration. Led by Arctic explorer Sir John Franklin, two state-of-the-art ships and 128 hand-picked men---the best and the brightest of the British empire---sailed from Greenland on July 12, 1845 in search of the elusive Northwest Passage. Fourteen days later, they were spotted for the last time by two whalers in Baffin Bay. What happened to these ships---and to the 129 men on board---has remained one of the most enduring mysteries in the annals of exploration. Drawing upon original research, Scott Cookman provides an unforgettable account of the ill-fated Franklin expedition, vividly reconstructing the lives of those touched by the voyage and its disaster. But, more importantly, he suggests a human culprit and presents a terrifying new explanation for what triggered the deaths of Franklin and all 128 of his men. This is a remarkable and shocking historical account of true-life suspense and intrigue.

Tarzan Economics 2021-05-18 Taking the lessons learned from his years studying the rise and fall of the modern music industry, Spotify's Chief Economist has crafted "a compelling and generous read" (Scott Galloway) that provides the tools to recognize and adapt to disruption in any industry. As the chief economist at Spotify, Will Page has had the best seat in the house for witnessing—and harnessing—the power of disruptive change. Music has often been the canary in the coal mine for major technological and societal shifts, and if there's one thing Page learned from the digital revolution, it's that businesses must be ready to pivot. Drawing practical lessons from a variety of fresh case studies covering Radiohead, Starbucks, and even Groucho Marx, Page examines the eight principles that disruption has

thrown into sharp relief as keys to survival in any sector. Businesses need to be ready and willing to change and, if necessary, be prepared to rebuild entire organizations and business models to do so. Pivoting through disruption has everything to do with being able to see the revolutionary changes around the corner, recognizing your strengths, and having the confidence to let go of the old vine of doing business and grab onto the new. A rare book of economics offering actionable takeaways in easy-to-understand language, Tarzan Economics is the must-read book for anyone staring at their own Napster moment and wishing they knew how to fail-safe their business.

Should We Fear Russia? Dmitri Trenin 2016-11-02 Since the outbreak of the Ukraine crisis, there has been much talk of a new Cold War between the West and Russia. Under Putin's authoritarian leadership, Moscow is widely seen as volatile, belligerent and bent on using military force to get its way. In this incisive analysis, top Russian foreign and security policy analyst Dmitri Trenin explains why the Cold War analogy is misleading. Relations between the West and Russia are certainly bad and dangerous but - he argues - they are bad and dangerous in new ways; crucial differences which make the current rivalry between Russia, the EU and the US all the more fluid and unpredictable. Unpacking the dynamics of this increasingly strained relationship, Trenin makes a compelling case for handling Russia with

pragmatism and care rather than simply giving into fear.

In 'Racing the White Silence,' Canadian journalist Adam Killick follows the racers and their dogs for two weeks, taking readers not only into the heartland of the Yukon and Alaska, but into the minds of the extraordinary people who dare to race. Equally important to this story are the dogs - determined animals with a truly astonishing physiology that allows them to outperform racehorses. And then, there is the land - inaccessible, sparsely populated, and unforgiving. With eight pages of Killick's own photographs, 'Racing the White Silence' is a mesmerizing eye-witness account of the strength and courage of both man and animal, and a portrait of the great Canadian North.
