**Phenomenal World** Joan D'Arc 2000-11 For centuries mankind has been exploring the nature of reality. The materialistic scientific worldview would have us believe that physically measurable phenomena are all that exist. Yet the answers to the key of reality go far beyond this mindset. This book explores the clues we have about the nature of reality, especially those aspects that cannot yet be proven. If we can understand the most baffling aspects of reality, then we will move closer toward understanding its ultimate cause and nature.

**Mutants and Mystics** Jeffrey J. Kripal 2011-11-15 "Account of how comic book heroes have helped their creators and fans alike explore and express a wealth of paranormal experiences ignored by mainstream science. Delving deeply into the work of major figures in the field--from Jack Kirby's cosmic superhero sagas and Philip K. Dick's futuristic head-trips to Alan Moore's sex magic and Whitley Strieber's communion with visitors--Kripal shows how creators turned to science fiction to convey the reality of the inexplicable and the paranormal they experienced in their lives. Expanded consciousness found its language in the metaphors of sci-fi--incredible powers, unprecedented mutations, time-loops and vast intergalactic intelligences--and the deeper influences of mythology and religion that these in turn drew from; the wildly creative work that followed caught the imaginations of millions. Moving deftly from Cold War science and Fredric Wertham's anticomics crusade to gnostic revelation and alien abduction, Kripal spins out a hidden history of American culture, rich with mythical themes and shot through with an awareness that there are other realities far beyond our everyday understanding."--Jacket.

*We Are Here! Visitors Without a Passport* Michel Zirger 2017-11-16 For the first time ever, painstaking investigation by the highly-respected French author and researcher Michel Zirger, has uncovered the truth about what really happened in the California Desert on November 20, 1952 when George Adamski and six witnesses encountered a man from a spacecraft in broad daylight. His name came to be known as "Orthon." The photographs taken that day have been enhanced using new, standard, digital techniques that now reveal the craft, the large mothership floating above and - most intriguingly - Orthon himself. The significance of this photographic validation of Adamski's claims becomes clear as we progress through the author's own contacts with apparent extraterrestrials in Japan, where he now lives, always with witnesses present. Zirger's own journey toward accepting the simple reality that intelligent life throughout the universe is human is amplified as he recounts the first-hand experiences of others, some untold until now. Richly illustrated with rare and often unpublished items, "We Are Here!" takes the reader on a journey that transcends mainstream ufology and, indeed, much twentieth-century history. It is a journey that reveals significant new truths about Humanity and our place in the Universe.

**Remote Viewing UFOs and the Visitors** Tunde Atunrase 2015-07-16 "I admire the lengths and considerable expense gone to in developing the content of this book. Without the author's determination and effort, we would not have these remote viewing gems from the legendary Joe McMoneagle. Even if that were the book's only virtue (which it is not), this would still be a valuable work of interest to generations to come." Paul H. Smith, Ph.D. (Major, US Army, ret.) Since 1460 BC, UFOs have been documented and recorded by witnesses all over the world. What are these mysterious objects of unknown origin? Where do they come from and more importantly... ..why are they here? This book provides some answers to these and many other questions using Remote Viewing - A psychic functioning protocol developed by the U.S. Military and supported by the US Government and numerous intelligence agencies including the CIA, to the tune of \$20 Million USD for over 22 years. Read exclusively for the first time what a former U.S Military Intelligence Officer and arguable the world's top Remote Viewer, Joseph W. McMoneagle discovered when tasked double blind with famous UFO cases that have baffled skeptics and believers for decades. What were the strange lights encountered by the crew of a Japan Airlines Flight in 1987 over the skies of Alaska and tracked on Radar? Did 70,000 Catholic devotees really witness the Sun dancing and hurtling towards them in 1917? What really happened to Travis Walton and his co-workers on November 5, 1975 in Arizona? What exactly was the strange object two US service men witnessed in a U.K. forest near Rendlesham in 1980? Discover astonishing new information, clues, possibilities and theories to these and many other cases, taking the reader on the ultimate psychic quest to find out if we really are alone in the Universe. The answers may be more shocking than we could ever have imagined"

*50 Popular Beliefs That People Think Are True* Guy P. Harrison 2012-01-03 "What would it take to create a world in which fantasy is not confused for fact and public policy is based on objective reality?" asks Neil deGrasse Tyson, science popularizer and author of *Astrophysics for People in a Hurry*. "I don't know for sure. But a good place to start would be for everyone on earth to read this book." Maybe you know someone who swears by the reliability of psychics or who is in regular contact with angels. Or perhaps you're trying to find a nice way of dissuading someone from wasting money on a homeopathy cure. Or you met someone at a party who insisted the Holocaust never happened or that no one ever walked on the moon. How do you find a gently persuasive way of steering people away from unfounded beliefs, bogus cures, conspiracy theories, and the like? This down-to-earth, entertaining exploration of commonly held extraordinary claims will help you set the record straight. The author, a veteran journalist, has not only surveyed a vast body of literature, but has also interviewed leading scientists, explored "the most haunted house in America," frolicked in the inviting waters of the Bermuda Triangle, and even talked to a "contrite Roswell alien." He is not out simply to debunk unfounded beliefs. Wherever possible, he presents alternative scientific explanations, which in most cases are even more fascinating than the wildest speculation. For example, stories about UFOs and alien abductions lack good evidence, but science gives us

plenty of reasons to keep exploring outer space for evidence that life exists elsewhere in the vast universe. The proof for Bigfoot or the Loch Ness Monster may be nonexistent, but scientists are regularly discovering new species, some of which are truly stranger than fiction. Stressing the excitement of scientific discovery and the legitimate mysteries and wonder inherent in reality, this book invites readers to share the joys of rational thinking and the skeptical approach to evaluating our extraordinary world.

**The Fast Movers** Margie Kay 2020-09 New Evidence that UFOs are among us...Prepare to be amazed at stunning proof the UFOs not only exist, but they are among us on a constant basis. In this collaborative effort, three seasoned UFO investigators share their independent investigations, experiences, and opinions, along with photographs of multiple high-speed UFOs that Kay coined "The Fast Movers." These objects are normally invisible to the naked eye, but can be captured on film, and with practice, the viewer can learn how to see them. The reader will learn techniques for capturing these extremely fast-moving inter-dimensional craft using the Quantum UFO Observation Technique with a video or still camera, and find out how to see the craft using Quantum Telepathy or Remote Viewing with the naked eye. See photos taken by Bill Spicer and Wayne Lawrence along with other witnesses, including NASA and the U.S. Navy. The proof is undeniable, and the conclusion is clear - we are not alone, and THEY ARE HERE.

*Rocket Dreams* Marina Benjamin 2003-05-25 In 1958, mankind's centuries-long flirtation with space flight became a torrid love affair. For a decade, tens of millions of people were enraptured -- first, by the U.S.-Soviet race to the moon, and finally, as America outstripped its rival, by Project Apollo alone. It is now more than three decades since the last man walked on the moon...more time than between the first moonwalk and the beginning of World War II. Apollo did not, as had been promised by a generation of visionaries, herald the beginning of the Space Age, but its end. Or did it? Project Apollo, like a cannonball, reached its apogee and returned to earth, but the trajectory of that return was complex. America's atmosphere -- its economic, scientific, and cultural atmosphere -- made for a very complicated reentry that produced many solutions to the trajectory problem. *Rocket Dreams* is about those solutions...about the places where the space program landed. In *Rocket Dreams*, an extraordinarily talented young writer named Marina Benjamin will take you on a journey to those landing sites. A visit with retired astronauts at a celebrity autograph show is a starting point down the divergent paths taken by the pioneers, including Edgar Mitchell, founder of the "church" of Noëtic Sciences. Roswell, New Mexico is a landing site of a different order, the "magnetic north" of UFO belief in the United States -- a belief that began its most dramatic growth precisely at the time that the path of the space program began its descent. In the vernacular, the third law of motion states that what goes up, must come down. Thus the tremendous motive force that energized the space program didn't just vanish; it was conserved and transformed, making bestsellers out of fantasy literature, spawning Gaia, and giving symbolism to the environmental movement. Everything from the pop cultural boom in ufology to the worldwide Search for Extra-Terrestrial Intelligence (SETI) feeds on the energy given off by America's leap toward space. *Rocket Dreams* is an eloquent tour of this Apollo-scarred landscape. It is also an introduction to some of the most fascinating characters imaginable: Some long dead, like the crackpot visionary Alfred Lawson, who saw in space flight a new stage of human evolution ("Alti-Man"), or Robert Goddard, the father of rocketry, whose workshop in Roswell stands only half a mile from shops selling posters of alien visitors. Others are very much alive -- like Stewart Brand, creator of the Whole Earth Catalog and partner with Gerard O'Neill in the drive to build free-floating space colonies, and SETI astronomer Seth Shostak, who has spent decades listening to the skies, hoping for the first contact with another intelligent species. Perceptive, original, and wonderfully written, informed by history, science, and an acute knowledge of popular culture, *Rocket Dreams* is a brilliant book by a remarkable talent.

**UFOs** John B. Alexander, Ph.D. 2011-02-15 Foreword by Jacques F. Vallee Introduction by Burt Rutan Commentary by Tom Clancy A never-before-heard firsthand account of a government insider's experience on the cutting edge of UFO exploration While still on active duty in the U.S. Army during the 1980s, Colonel John B. Alexander, Ph.D., created an interagency group to explore the controversial topic of UFOs. Participants came from the Army, Navy, Air Force, CIA, NSA, DIA, and the aerospace industry. All members held Top Secret clearance. What they discovered was not at all what was expected. *UFOs* covers the numerous cases they saw, and answers questions like: • What was really in Hanger 18? • Did

a UFO land at Holloman Air Force Base? • What happened at Roswell? • What is Majestic 12? • What is the Aviary? • What does the government know about UFOs? • What has happened with disclosure in other countries? • Has the U.S. reverse engineered a UFO? • Why don't presidents get access to UFO info? UFOs is at once a complete account of Alexander's findings, and a call to action. There are no conspiracy theories here—only hard facts—but they are merely the beginning. Serious research is needed in order to understand and anticipate the workings of UFOs, and John Alexander is leading the charge.

*Penetration: Special Edition Updated* Ingo Swann 2020-11-29 \*\*UPDATED WITH NEW MATERIAL FOUND IN HAROLD SHERMAN'S ARCHIVES\*\*\* Ingo Swann -- renowned psi researcher -- reveals a long-held secret series of experiences with a "deep black" agency whose apparent charter was simple: UFOs and extraterrestrials on the moon and worries about ET telepathic/mind control powers. The agency was so secret that it had no paper trail, and hence no written secrecy agreements. Only the verbal ones, which in Ingo's case expired several years ago. Now, in this era of burgeoning UFO "glasnost," he tells a story of meetings held in a secret underground facility not far from Washington DC, and of being taken to a remote location near the Arctic Circle to witness the expected arrival of a huge UFO over the surface of an Alaskan lake. This book discusses undeveloped human telepathy and contrasts it with the probable existence of fully developed alien telepathy, which may have many different forms. Ingo also explores the fact that we officially know far more than we're admitting about the Moon -- its origins, its atmosphere, its occupants and many other unusual features. Penetration is about one of the means by which we can learn more about those not of this earth (and vice-versa) -- telepathy. Do we have the means to answer some very important questions that many have been asking for quite a long time? Inside this book are the answers to some. PLUS...In a newly discovered missing chapter on his psychic probes of Mars ("9") to Penetration, Ingo asserts that there is a bigger question at play - the question as to "why do mass-consciousness humans, as it were, mass-consciously almost 'conspire' to avoid certain issues, and consistently so?" This inquiry, deep within Ingo's own awareness, is one that he would ponder until his passing in 2013. He no doubt wished to share this interrogation with the world back in 1998. Thus, while Neptune goes direct in Pisces, removing the veils, and providing an awakening of sorts, we have decided put Ingo's question to the world by including "9" along with Introductions by Dr. Krippner and Dr. Mitchell, an Afterword by Thomas M. McNear, Lieutenant Colonel, U.S. Army (Ret.), and recently discovered documents from Harold Sherman's Archives in this Updated Special Edition, all within an aptly named section entitled Subscript.

Research into resonant viewing crop circles and extraterrestrials shows our world to be vibrant, multidimensional, and full of mystery.

**The Seventh Sense** Lyn Buchanan 2009-11-24 For the past thirty years, the United States government has secretly trained a select corps of military personnel in the art of "remote viewing" -- the psychic ability to perceive the thoughts and experiences of others through the power of the human mind.... Now, for the first time, Lyn Buchanan -- a world-renowned expert on remote viewing and its potential -- tells the complete, candid story of his experiences. Assigned for nearly a decade to a clandestine U.S. Army intelligence group, Buchanan trained military personnel who utilized their inherent psychic abilities as a data-collection tool during the Iran hostage crisis, the Chernobyl disaster, and the Gulf War. In this incredible account, Buchanan tells how he was selected for his unique psychic abilities, and how he was transformed from an ordinary soldier into one of our nation's leading psychic spies. Working on top-secret government and military projects using "mental espionage" created permanent, life-altering changes within Buchanan. Now, after many years of analysis and interpretation, he reveals the techniques and mental exercises used to train remote viewers, and demonstrates that each of us carries a dormant psychic ability that we can explore and use ourselves. For anyone interested in a hard, scientific look at the reality of psychic covert operations in the world today, or anyone who has ever wondered if he or she could have the inherent skills to become a remote viewer, this fascinating chronicle of life as a psychic spy will reveal the answers.

**Dimensions** Jacques Vallee 2013-08 In DIMENSIONS, the first volume of a trilogy, Dr. Jacques Vallee reexamines the historical record that led to the modern UFO phenomenon and to the belief in alien contact. He then tackles the enigma of abduction reports, which come

from various times and various countries, as well as the psychic and spiritual components of the contact experience. In the last portion of the book, he notes the factors that inhibit research into the phenomenon--the triple coverup and political motivations--and concludes that the extraterrestrial theory is simply not strange enough to explain the facts.

Close Encounters Of The Fourth Kind C.D.B. Bryan 2011-11-02 Close Encounters of the Fourth Kind: cases in which personal contact between an individual or individuals is initiated by the "occupants" of the spacecraft. Such contact may involve the transportation of the individual from his or her terrestrial surroundings into the spacecraft, where the individual is communicated with and/or subjected to an examination before being returned. One might expect that a "scientific conference" devoted to people who have reported being kidnapped by "little green men" would be dismissed out of hand. But C.D.B. Bryan, the greatly admired journalist and author of Friendly Fire, did not dismiss it: the conference was to be held at the Massachusetts Institute of Technology and would have as its chairmen a Pulitzer Prize-winning Harvard psychiatry professor and a professor of physics from M.I.T. Bryan attended the conference throughout its five days. He approached the subject with no prior stand, no agenda, and an open (if slightly skeptical) mind. As the conference progressed, he was astonished by the quality of the stories told by the hundreds of men and women who came forward hesitantly and reluctantly with their utterly amazing—and utterly convincing—accounts of having been abducted and then examined aboard extraterrestrial spacecraft by spindly limbed, telepathic gray creatures with outsized foreheads dominated by huge, compelling, tear-shaped black eyes. What most astonished Bryan were the similarities found again and again in these accounts and the consistency of their details. It is here that

the heart of the mystery lies: as the Harvard professor John E. Mack asked at the conference, “If what the abductees are saying isn’t happening to them, then what is?” This question—and the possible answers—are at the center of this richly explicit, serious, and riveting book. Bryan recreates the conference. He interviews ufology’s most prominent psychiatrists, psychologists, hypnotherapists, researchers, physicists, physicians, and folklorists. He interweaves throughout the testimony of the abductees themselves, who tell us their stories in chilling detail. He presents, in depth, the Close Encounter experiences of two women whose stories he tells on the basis of both their spontaneous recollections of the events and their memories that were retrieved through sessions of hypnosis of which Bryan himself was a witness. Finally, Bryan examines the current theories—psychological, psychiatric, medical, parapsychological—that have been put forward by the unconvinced to explain the abduction phenomenon. Are the abductees suffering from some sort of false memory syndrome? . . . a multiple or dissociative personality disorder? . . . Are they fantasy-prone? *Close Encounters of the Fourth Kind* is a detailed, objective exploration—the most concrete to date—of one of the enduring and amazing mysteries of our time. It is a book that will equally fascinate believers and nonbelievers.

**Alien Intrusion** Gary Bates 2005 This is one of the most unique books ever offered by Master Books. Are there UFOs? Do aliens exist? What happened at Roswell, New Mexico in 1947? What is Area 51? **Battleground: Science and Technology [2 volumes]** Peter H. Denton 2008-10-30 The modern world is filled with debate and controversy, and science and technology—the most characteristic features of the modern world—are not immune. Science and technology are implicated in many if not all of the issues, troubles, and problems students are likely to come across in their classes and in their everyday lives. Science and technology serve as a primary pathway to understanding front page headlines on everything from war to AIDS, and from oil exploration to global warming. *Battleground: Science and Technology* examines the most hot-button issues involving science and technology and provides a balanced assessment of the arguments on all sides of the often strident debates. The approximately 100 issues examined in *Battleground: Science and Technology* include topics in the brain sciences, including the controversies over the cause of autism and the reliability of memory, as well as the debates over parapsychology; debates surrounding information technology, such as only privacy, the impact of video games on social behavior, and the advent of virtual reality; the complexity over drugs and medications, such as the testing of the efficacy of medications, the war on recreational drugs, and the costs of pharmaceutical research; and hot-button topics that are constantly in the news, such as evolution and creationism, DNA testing, stem-cell research, and genetically modified organisms. Each entry provides a list of accessible resources useful for further research.

simply be us, but from the future? This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants, using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past. Dr. Michael P. Masters, a professor of biological anthropology specializing in human evolutionary anatomy, archaeology, and biomedicine, explores how the persistence of long-term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc-shaped craft, which are likely the very devices that allow our future progeny to venture backward across the landscape of time. Moreover, these extraterrestrials are ubiquitously described as bipedal, large-brained, hairless, human-like beings, who communicate with us in our own languages, and who possess technology advanced beyond, but clearly built upon, our own. These accounts, coupled with a thorough understanding of the past and modern human condition, point to the continuation of established biological and cultural trends here on Earth, long into the distant human future.

**American Psychic** Marla Frees 2018-06-05 While shooting a TV commercial in Los Angeles, Marla Frees was given a message. The father of the actor sitting across from her wanted the actor to know he was happy about the new baby. But there was a twist—the father was deceased. The actor was shocked. Marla was God-smacked. Increasingly, messages from deceased loved ones and a powerful psychic awareness demanded her attention. Marla followed her heart, left acting, and never looked back. She now uses her gifts to help families from the heartland to Hollywood find healing. *American Psychic* tells the spiritual journey of a small-town girl who develops her psychic gifts and relationship with God on a synchronistic path that weaves through the trauma of her childhood, the drama of her acting career, and adventures in healing and transformation. Along the way, she's explored her abilities with U.S. military "psychic spies," assisted detectives on homicide cases, and delved into the science behind her abilities with physicist Thomas Campbell. Marla has learned to trust the voice of "Spirit," which never fails her. Marla Frees' story of spiritual transformation takes us into realms that will astonish, inspire—and heal.

Visitors Harold A. Skaarup 2000-09-04 Suppose you could communicate with a visitor who was not from this place, time-space or even this dimension? What would you want to ask them? The answers probably lie in what our own response would be if we were them. This book is based on a collection of interviews I have had with a few individuals who may have actually had such an experience. The idea is that if enough of us are ready to ask the questions and gain the answers, then our collective knowledge and understanding of the

"multiverse" about us can only continue to be enhanced. Sometimes the responses that you will read here are similar; often they are diametrically opposed to each other. An open but highly skeptical mind is extremely necessary if you are going to sift through the data that is presented in this book. The intent is that it should peak your curiosity to learn more about "visitors." In this way, we may be better informed and prepared, and thus in some sort of coherent shape to deal with their arrival. If you read this book, you must be well prepared to choose for yourself what you will or will not believe.

**Surfing the Psychic Internet** Daz Smith 2006-11-01 Surfing the psychic internet is a mystical journey into the hidden dimensions that surround us all. The psychic internet exists all around you, it flows through you, it is you. - By using and reading this book it's now time for you to explore its potential and surf the psychic internet for yourself.

*The Extraterrestrial Model* Dr. Michael P. Masters 2022-05-24 In *The Extraterrestrial Model*, Dr. Michael P. Masters posits that UFOs and "Aliens" are our future human descendants, coming back through time to visit and study their own hominin evolutionary past. As a professor of anthropology, Masters uses an abductive approach to logically infer the best explanation. He examines well-documented abductee experiences in the context of this time travel model, and considers other theories put forth to elucidate this complex and mysterious phenomenon. While no single model can account for all aspects of these encounters, in considering various contact cases across the world and through time, recurrent patterns emerge that may offer insight into what these objects are, who is inside, and from where—or potentially when—they are coming.

Remote Viewing David Morehouse 2012-08-30 Is it possible to see across space and time? Even those who accept that humans can reach beyond the conventional five senses typically think of psychics as "special" or "gifted" with unusual abilities. But David Morehouse teaches otherwise—all human beings, including you, have the innate capacity for remote viewing. David Morehouse was trained by the U.S. government in remote viewing—an exact scientific protocol for tapping the human power to gather information across space and time. In this comprehensive manual, he has taken his military training as an "operational" remote viewer and turned it into a step-by-step training system—one that teaches any serious reader how to unlock their natural abilities and become more than the physical world allows. Remote Viewing includes more than just a method for gathering information. It is a transformational tool instilling within you the absolute and irrefutable evidence that you are more than human—that you are extraordinarily human. As you gain experience and confidence as a viewer, you will tap into the collective unconscious that connects you to everything and everyone in the universe. Through David Morehouse's training, you will learn to touch the infinite source of life and knowledge that spiritual masters throughout human history have sought. David Morehouse's superiors in the DIA/CIA called him "the most exceptional candidate ever to have grasped this difficult intelligence collection methodology." What sets him apart as a teacher is his unparalleled ability to present the complexities of remote viewing in an accessible, logical, and artful manner. As more than 23,000 students have already discovered, David Morehouse has set a new and brilliant standard for teaching the scientific protocol of remote viewing. "You have the ability to do this," Morehouse says. "Something extraordinary is absolutely possible in your life." Now for the first time, he brings you his method for taking your first step into your ultimate potential in a single volume: *Remote Viewing: The Complete User's Manual for Coordinate Remote Viewing*, which also include a cool-down audio track. David Morehouse has found that this psychoacoustic "pink noise" track is especially effective for helping us enter the brainwave state of relaxed awareness needed for remote viewing.
