Unlocking the Magic of Facilitation Sam Killermann 2015-12-28 Have you ever been in a training and marveled at how quickly the time flew by? Genuinely enjoyed a meeting you were expecting to dread? Learned something powerful about a topic you thought wouldn't engage you? Experienced an intimate, vulnerable, transformative moment with a group of total strangers? Then you've witnessed the magic of facilitation. Like all magic tricks - though they seem to defy reason when you're spectating for the first time - once the secrets of facilitation are unveiled to you, you'll look back with a bland obviousness. Of course that's how it's done. In this book, co-authors and social justice facilitators Sam Killermann and Meg Bolger teach you how to perform the favorite tricks they keep up their sleeve. It's the learning they've accumulated from thousands of hours of facilitating, debriefing, challenging, and failing; it's the lessons from their mentors, channeled through their experience; it's the magician's secrets, revealed to the public, because it's about time folks have the privilege of looking behind the curtain of facilitation and thinking of course that's how it's done. This book highlights 11 key concepts every facilitator should know, that most facilitators don't even know they should know. They are sometimes-tiny things that show up huge in facilitation. It's a book for facilitators of all stripes, goals, backgrounds, and settings - and the digestible, enjoyable, actionable lessons would benefit anyone who is responsible for engaging a group of people in learning.

Glamour Stephen Gundle 2009-07-16 Glamour is one of the most tantalizing and bewitching aspects of contemporary culture - but also one of the most elusive. The aura of celebrity, the style of the fashion world, the vanity of the rich and beautiful, and the publicity-driven rites of café society are all imbued with its irresistible magnetism. But what exactly is glamour? Where does it come from? How old is it? And can anyone quite capture its magic? Stephen Gundle answers all these questions and more in this first ever history of the phenomenon, from Paris in the tumultuous final decades of the eighteenth century through to Hollywood, New York, and Monte Carlo in the twentieth and twenty-first centuries, from Napoleon to Marlene Dietrich and Marilyn Monroe, from Beau Brummell to Gianni Versace. Throughout, the book captures the excitement and sex appeal of glamour while exposing its mechanisms and exploring its sleazy and sometimes tragic underside. As Gundle shows, while glamour is exciting and magnetic, its promise is ultimately an illusion that can only ever be partially fulfilled.

Precalculus Jay P. Abramson 2014-10-23 "Precalculus is intended for college-level precalculus students. Since precalculus courses vary from one institution to the next, we have attempted to meet the needs of as broad an audience as possible, including all of the content that might be covered in any particular course. The result is a comprehensive book that covers more ground than an instructor could likely cover in a typical one- or two-semester course; but instructors should find, almost without fail, that the topics they wish to include in their syllabus are covered in the text. Many chapters of OpenStax College Precalculus are suitable for other freshman and sophomore math courses such as College Algebra and

Trigonometry; however, instructors of those courses might need to supplement or adjust the material. OpenStax will also be releasing College Algebra and Algebra and trigonometry titles tailored to the particular scope, sequence, and pedagogy of those courses."--Preface.

It explores curriculums from three unique perspectives- cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.
