Citología e histología vegetal y animal Ricardo Paniagua Gómez-Álvarez 2007 Se han reelaborado y actualizado todos los temas. Dicha revisión ha supuesto cambios en la estructura interna de los capítulos, que subrayan las conexiones entre la morfología clásica y el avance constante en los conocimientos funcionales. Para ofrecer una visión completa de la célula, se han incluido aspectos propiamente moleculares, como las señales entre células y la regulación del ciclo celular. También se ha procurado resaltar algunos aspectos de la biología comparada en el apartado de histología, e introducir conceptos más prácticos en el apartado de histología vegetal. En el apartado de Histología vegetal se ha mejorado el texto que relaciona la estructura con la función, para darle un carácter más funcional y no sólo morfológico. Todo ello ha llevado a renovar parte de la iconografía, basada en micrografías de microscopía óptica y electrónica, esquemas y dibujos a todo color que facilitan y simplifican la comprensión del texto. Se ha hecho también un esfuerzo por proporcionar al lector un resumen de la bibliografía más apropiada para profundizar en los diferentes aspectos tratados. Se ha añadido un apéndice con el significado de las siglas utilizadas a lo largo del texto.

Histología y embriología del ser humano Aldo R. Eynard 2008-06-30 Durante mucho tiempo, la Histología y la Embriología fueron consideradas compartimientos casi estancos. Sin embargo, ¿se puede aprender y enseñar una de estas disciplinas sin tomar como referencia a la otra?; ¿es posible escribir sobre ellas sin los fundamentos de la Biología Celular?; ¿se pueden estudiar sus interacciones sin conocer la Biología Molecular subyacente?; ¿es factible referirse a la arquitectura del complejo ser humano sin contemplar los millones de años de evolución? Sin duda, en el marco de los paradigmas de aprendizaje actuales de estos campos, la respuesta es no. Esta obra cumple con el propósito de dar una respuesta pedagógica moderna a las frecuentes dificultades en la enseñanza y el aprendizaje de la Biología Celular, la Histología y la Embriología, mediante una integración armónica de sus contenidos.
