Bulova Aaron Sigmond 2018-03-06 **Bulova: A History of Firsts** chronicles the extraordinary American watch company in a fittingly unusual manner: by recounting an epic, multi-generational picaresque that runs from the Gilded Age up through present-day New York City. Joseph Bulova, the man behind the movement by which America would set its time, was an iconoclastic industrialist who introduced standardized mass production to fine mechanical watchmaking, fostering in turn a corporate culture of innovation that endures today. Less a traditional corporate history than an exactingly curated periodical, this profound new title features eight visually captivating chapters comprising an essay each by luminaries including style journalists David Coggins and Matthew Hranek, music-industry legend Nile Rodgers, advertising writer Stuart Elliott, noted horology authority Jack Forster and more, all edited by luxury historian Aaron Sigmond.

The Rolex Story Franz-Christoph Heel 2014-05-28 The brand with the crown is recognized worldwide as an invaluable sports implement and luxury product. In little more than one hundred years, it has become one of the most successful and innovative watch brands on the planet. Rolex manufactures more than a half a million wristwatches per year while maintaining an outstanding reputation and near-perfect quality. From the beginning, the sponsorship of statesmen, movie stars, and athletes has driven its success, but the company has expanded to include more than just the rich and famous. The Rolex Oyster became the first watch to defy the elements when, in 1927, Mercedes Gleitze wore one while she swam the English Channel. In 1933, the company patented the first automatic winding mechanism. Learn more about this history and read updated reports written about new Rolex ideas and performance tests featured in the German watch magazine Armbanduhren (Wristwatch) from the past 15 years.

100 Superlative Rolex Watches John Goldberger 2008 "Rolex was established in 1908, a century ago, so one hundred years have passed from that day to the publication of this volume in which the author, John Goldberger, illustrates what he considers to be the 100 most beautiful examples ever produced. One hundred years of life, and one hundred examples, traced back through time thanks to painstaking research, with the collaboration of some of the most renowned collectors in the world, and photographed to show the characteristics of the movement, case and dial of each example in the best possible way. The top one hundred, we could say, also to narrow down the field of research, which would otherwise have been incredibly vast, to grasp the essence of a brand that has probably contributed more than any other to the development of the wristwatch. Giampiero Negretti Over 700 colour illustrations and 400 descriptions provide the collector and watch enthusiast with invaluable information on reference numbers, watchcases, faces, movements, related calibres and the year of production of each watch. The book is divided into seven chapters: Watches with a destiny; Oyster; Chronograph and moon phases; Oyster chronograph and moon phases; Datejust, Day-Date; Sport Models; Cosmograph."--BOOK JACKET.

Dongri to Dubai - Six Decades of the Mumbai Mafia Hussain Zaidi 2012-08-10 Dongri to Dubai is the first ever attempt to chronicle the history of the Mumbai mafia. It is the story of notorious gangsters like Haji Mastan, Karim Lala, Varadarajan Mudaliar, Chhota Rajan, Abu Salem, but above all, it is the story of a young man who went astray despite having a father in the police force. Dawood Ibrahim was initiated into crime as a pawn in the hands of the Mumbai police and went on to wipe out the competition and eventually became the Mumbai police's own nemesis. The narrative encompasses several milestones in the history of crime in India, from the rise of the Pathans, formation of the Dawood gang, the first ever supari, mafia's nefarious role in Bollywood, Dawood's move to Karachi, and Pakistan's subsequent alleged role in sheltering one of the most wanted persons in the world. This story is primarily about how a boy from Dongri became a don in Dubai, and captures his bravado, cunningness, focus, ambition, and lust for power in a gripping narrative. The meticulously researched book provides an in-depth and comprehensive account of the mafia's games of supremacy and internecine warfare.

This model is one of the world's most famous Rolex watches; classic, beautiful, functional, useful and elegant. In 2008 a new chapter of this watch, the Day-date II (ø 41 mm) and in 2015 the new Day-Date 40. Furthermore: the first Rolex Day-Date, 1800 series, "pie-pan" dials, 18000 series, personalized dials, special series, vintage advertisements, box, papers, Oysterquartz Day-Date, 18200 and 18300 series, Day-Date II, Day-Date 40 and much more. We can read from an official Rolex document: « THE BIRTH OF THE "DATEJUST" AND THE "DAY-DATE" Not satisfied with having realized a selfwinding waterproof watch, we decided to dedicate ourselves to studying the calendar watch. This is how the "Datejust", which clearly indicates the date on the dial in a small aperture with a Cyclops lens which enlarges it so as to make it easier to read, was born. The next stage was the launch of the "Day-Date", a perfected model which also indicates, with letters, the days of the week. The day and the date automatically change every evening at midnight. » These are the words of Roger Federer, a living tennis legend, about his Day-Date II: "The reason I like my Day-Date so much is because it is a legendary watch, elegant but with a certain spirit, with a touch of modernity added to its stylish black dial".

The Wristwatch Handbook Ryan Schmidt 2016-09 ·A fantastic reference work for the novice or the seasoned watch enthusiast·Fully illustrated with 470 color photographs·Brand-Agnostic. Features a vast array of timepieces from over 90 manufacturers·Despite the functional obsolescence of the mechanical wristwatch (our phones and computers tell more accurate time) the early 21st Century has seen a boom in the development, production, and appreciation of all things horological. Whether it is presented to the collector as an alternative investment, as a feat of micro-mechanical technology, or as a showcase of artisanal mastery, the mechanical wristwatch has never possessed more forms, functions or facets than it does today. The Wristwatch Handbook is written from the epicenter of a renaissance, a place in time between the Quartz revolution and the rise of the smart device - where the mechanical wristwatch is the antidote to the microprocessor and the permanent buzz of your inbox. From the multi-axis tourbillon, to the split-second chronograph, to the sidereal sky chart, The Wristwatch Handbook covers it all and does so with more than 470 rich illustrations from over 90 of the World's leading brands.The book is separated into two sections. The first section provides the reader with a comprehensive understanding of the mechanical movement. Its chapters explore power, transmission, distribution and regulation illustrating the basic concepts before considering the innovation and complexity that takes place further toward the cutting edge. From the fifty-day power reserve, to the constant force mechanism, and the 1,000Hz mechanical escapement, section 1 will allow the reader to understand and appreciate what is happening beneath the dial of their watch. Section two allows the reader to take this understanding and apply it to the vast range of complications (functions) that exist in modern horology. Each chapter showcases a distinct category of complication. For example, the regatta timer, pulsometer, and

monopusher chronograph join a host of others in a chapter entitled 'Recording Lapses of Time'; The power reserve indicator, dynamograph, and crown position indicator are featured in a chapter for 'Power and Performance Indication'; The moon phase indicator, annual calendar, and planetarium can be found in the 'Astronomical Complications' chapter. Once the functional categories are exhausted, the final three chapters explore whimsical complications that have little regard for practical function, novelty time indication, and the 'super-complicated' watch - a rare breed of timepiece that houses an intimidating host of complications featured throughout the book. Upon completion of *The Wristwatch Handbook* the reader will be able to identify even the most exotic complication from across the room, and be able to share their appreciation and understanding of what makes it so useful and compelling. *The Wristwatch Handbook* is "brand agnostic", using only those watches that most aptly illustrate the given subject-matter. As a consequence the book places equal emphasis on the classic and the cutting edge, on watches produced in large volume or exclusive runs, by industry-leading technology or at the hand of a master. In doing so the book provides an unparalleled range of watches from over 90 brands, allowing the reader to determine for themselves which brands, complications, and styles they will build their collection from.

Resilience of Luxury Companies in Times of Change Gabriella Lojacono 2021-08-23 *Resilience of Luxury Companies in Times of Change* is a book for executives and Masters' level students taking courses in luxury management. It offers an insight into the current and emergent business models and strategies luxury companies apply to remain resilient in times of change. It explores a variety of business models answering the following key questions: What is each brand's value proposition used to attract a consumer's willingness to pay? What is each brand's target audience? How do brands navigate and expand their markets? And how do luxury companies organize their resources to design and develop products and services to continually sell to their customers? The answers to these questions provide the foundation of a luxury company's business strategy and, as a result, its brand architecture. The authors also explore the patterns that have emerged in the ownership, management and the manufacturing in luxury goods companies, where dominance is usually found in certain countries. This book focuses on six key industries in the luxury product sector: fashion, automotive, hospitality, furniture, cosmetics and jewellery. It provides an international perspective with examples drawn from Europe, USA, the Middle East, China and Japan. Through these examples and cases, the authors analyze how luxury companies are facing the challenges posed by external shocks and an extensive need for digitalization. Using concepts and theories from macroeconomics (such as globalisation) and corporate and business strategy, the book aims to connect the dots between theory and practice. *Resilience of Luxury Companies in Times of Change* provides perspectives of the past, present and future – how luxury companies have evolved over time and managed to stay resilient despite the challenges they have faced through the different eras.

The Mating Mind Geoffrey Miller 2011-12-21 At once a pioneering study of evolution and an accessible and lively reading experience, *The Mating Mind* marks the arrival of a prescient and provocative new science writer. Psychologist Geoffrey Miller offers the most convincing—and radical—explanation for how and why the human mind evolved. Consciousness, morality, creativity, language, and art: these are the traits that make us human. Scientists have traditionally explained these qualities as merely a side effect of surplus brain size, but Miller argues that they were sexual attractors, not side effects. He bases his argument on Darwin's theory of sexual selection, which until now has played second fiddle to Darwin's theory of natural selection, and draws on ideas and research from a wide range of fields, including psychology, economics, history, and pop culture. Witty, powerfully argued, and continually thought-provoking, *The Mating Mind* is a landmark in our understanding of our own species.

But I hadn't come across a book that actually moved me until I picked up *A Man and His Watch*. The volume is filled with heartfelt stories." —T: The New York Times Style Magazine Paul Newman wore his Rolex Daytona every single day for 35 years until his death in 2008. The iconic timepiece, probably the single most sought-after watch in the world, is now in the possession of his daughter Clea, who wears it every day in his memory. Franklin Roosevelt wore an elegant gold Tiffany watch, gifted to him by a friend on his birthday, to the famous Yalta Conference where he shook the hands of Joseph Stalin and Winston Churchill. JFK's Omega worn to his presidential inauguration, Ralph Lauren's watch purchased from Andy Warhol's personal collection, Sir Edmund Hillary's Rolex worn during the first-ever summit of Mt. Everest . . . these and many more compose the stories of the world's most coveted watches captured in *A Man and His Watch*. Matthew Hranek, a watch collector and NYC men's style fixture, has traveled the world conducting firsthand interviews and diving into exclusive collections to gather the never-before-told stories of 76 watches, completed with stunning original photography of every single piece. Through these intimate accounts and Hranek's storytelling, the watches become more than just timepieces and status symbols; they represent historical moments, pioneering achievements, heirlooms, family mementos, gifts of affection, and lifelong friendships.
