Affective Health and Masculinities in South Africa Hans Reihling 2020-04-24 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Fernando Sor Fernando Sor 1998-06 The present new Urtext edition of Sor's didactic pieces takes a different approach to that taken by other editions even recent ones. In preparing the material for publication, Chanterelle strove to maintain a close adherence to the composer's own statements regarding the pieces as they appear in his various writings. At the same time, each individual reference was evaluated against other available historical evidence to determine the extent to which it truly repesents Sor's applied technique, the way he actually performed these pieces himself. Bireli Lagrene: Gypsy Jazz Guitar Artistry Bireli Lagrene 2018-09-12 In the tradition of Django Reinhardt, Biréli Lagrène is one of most highly regarded Gypsy jazz, bebop, and fusion guitarists of recent decades. Once regarded as a child prodigy, he has performed with such legendary players as Benny Goodman, Stéphan Grappelli, Al Di Meola, Paco de Lucía, John McLaughlin and countless others. Given that roster, one might assume that Lagrène is quite advanced in years, but this is not the case; the fact is, he was drawn to the guitar as a child of four, and after auditioning at the intermission, was invited onstage with Grapelli for the second half- when he was only ten years old. While Lagrène is primarily an ear player, he has collaborated with TAGA Publishing to produce an exceptional book filled with insightful tips on playing the Gypsy jazz style. Biréli Lagrène: Gypsy Jazz Guitar Artistry introduces the intermediate jazz guitarist to the essential rhythms used in Gypsy jazz accompaniment, as well as to the vocabulary needed to improvise in the Gypsy jazz style. Not for the faint of heart, the book includes online audio recordings of 33 rhythm exercises and licks to incorporate the right feel or panache in your own Gypsy jazz performance style. The musical examples are written in either chord symbols or standard notation and tablature. Includes access to online audio.

The Rejection of Consequentialism Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents

need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.
