The History and Social Influence of the Potato Redcliffe N. Salaman 1985-11-21 A reissue of a scholarly classic considers the influence of the potato on the social structure and economy throughout history wherever men adopted it as a mainstay of their diets.

IMF Staff papers, Volume 42 No. 3 International Monetary Fund. Research Dept. 1995-01-01 This paper analyzes long-term exchange rate modeling. The paper reviews the literature that tests for a unit root in real exchange rates and the closely related work on testing for a unit root in the residual from a regression of the nominal exchange rate on relative prices. It argues that the balance of evidence is supportive of the existence of some form of long-term exchange rate relationship. The paper highlights that the form of this relationship, however, does not accord exactly with a traditional representation of the long-term exchange rate.

Staff Paper 1990

Simple Heuristics that Make Us Smart Gerd Gigerenzer 2000-10-12 Simple Heuristics That Make Us Smart invites readers to embark on a new journey into a land of rationality that differs from the familiar territory of cognitive science and economics. Traditional views of rationality tend to see decision makers as possessing superhuman powers of reason, limitless knowledge, and all of eternity in which to ponder choices. To understand decisions in the real world, we need a different, more psychologically plausible notion of rationality, and this book provides it. It is about fast and frugal heuristics--simple rules for making decisions when time is pressing and deep thought an unaffordable luxury. These heuristics can enable both living organisms and artificial systems to make smart choices, classifications, and predictions by employing bounded rationality. But when and how can such fast and frugal heuristics work? Can judgments based simply on one good reason be as accurate as those based on many reasons? Could less knowledge even lead to systematically better predictions than more knowledge? Simple Heuristics explores these questions, developing computational models of heuristics and testing them through experiments and analyses. It shows how fast and frugal heuristics can produce adaptive decisions in situations as varied as choosing a mate, dividing resources among offspring, predicting high school drop out rates, and playing the stock market. As an interdisciplinary work that is both useful and engaging, this book will appeal to a wide audience. It is ideal for researchers in cognitive psychology, evolutionary psychology, and cognitive science, as well as in economics and artificial intelligence. It will also inspire anyone interested in simply making good decisions.

Competition Science Vision 2003-11 Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Capital Markets, CDFIs, and Organizational Credit Risk Charles Tansey 2010 Can Community Development Financial Institutions (CDFIs) get unlimited amounts of low cost, unsecured, short- and long-term funding from the capital markets based on their organizational credit risk? Can they get pricing, flexibility, and procedural parity with for-profit corporations of equivalent credit risk? One of the key objectives of this book is to explain the reasons why the answer to the two questions above remains "no." The other two key objectives are to show the inner workings of what has been done to date to overcome the obstacles so that we don't have to retrace the same steps and recommend additional disciplines that position CDFIs to take advantage of the mechanisms of the capital markets once the markets stabilize.
