Using Research Instruments Peter Birmingham 2003-12-08 Clear, accessible and practical, this guide introduces the first-time researcher to the various instruments used in social research. It assesses a broad range of research instruments - from the well-established to the innovative - enabling readers to decide which are particularly well suited to their research. The book covers: questionnaires interviews content analysis focus groups observation researching the things people say and do. This book is particularly suitable for work-based and undergraduate researchers in education, social policy and social work, nursing and business administration. It draws numerous examples from actual research projects, which readers can adapt for their own purposes. Written in a fresh and jargon-free style, the book assumes no prior knowledge and is firmly rooted in the authors' own extensive research experience. *Using Research Instruments* is the ideal companion volume to *The Researcher's Toolkit*. Together they offer a superb practical introduction to conducting a social research project.

Improving Practice and Performance in Basketball Aaron T. Scanlan 2019-11-18 Despite being one of the most popular sports worldwide, basketball has received limited research attention compared to other team sports. Establishing a strong evidence base with high-quality and impactful research is essential in enhancing decision-making processes to optimize player performance for basketball professionals. Consequently, the book entitled *Improving Performance and Practice in Basketball* provides a collection of novel research studies to increase the available evidence on various topics with strong translation to practice in basketball. The book includes work by 40 researchers from 16 institutions or professional organizations from 9 countries. In keeping with notable topics in basketball research, the book contains 2 reviews focused on monitoring strategies to detect player fatigue and considerations for travel in National Basketball Association players. In addition, 8 applied studies are also included in the book, focused on workload monitoring, game-related statistics, and the measurement of physical and skill attributes in basketball players. This book also has a strong focus on increasing the evidence available for female basketball players, who have traditionally been under-represented in the literature. The outcomes generated from this book should provide new

insights to inform practice in many areas for professionals working in various roles with basketball teams.

Instructional Models in Physical Education Michael Metzler 2017-06-30 Ensures that physical educators are fully armed with a comprehensive plan for incorporating instructional models in their teaching! *Instructional Models for Physical Education* has two primary goals for its readers. The first is to familiarize them with the notion of model-based instruction for physical education, including the components and dimensions that determine a model's pattern of teaching and how to select the most effective model for student learning in a particular unit. The second goal is to describe each of the instructional models in such a way to give readers enough information to use any of the models with confidence and good results. The book includes everything readers will need for planning, implementing, and assessing when teaching with instructional models. It will help readers incorporate research-based practices in their lessons, adapt activities to include students of varying abilities, and teach to standards. Models tied to NASPE standards! The author has revised the third edition to show how using the instructional models can help teachers meet specific NASPE standards. The book demonstrates the connection of NASPE standards with the models and clarifies that connection for students. In addition, a table in each of the model chapters shows explicitly how the model aligns with NASPE standards.

Signs of Water Robert Boschman 2022-02-15 Water is more important than ever

before. It is increasingly controversial in direct proportion to its scarcity, demand, neglect, and commodification. There is no place on the planet where water is not, or will not be, of critical concern. *Signs of Water* brings together scholars and experts from five continents in an interdisciplinary exploration of the theoretical approaches, social and political issues, and anthropogenic hazards surrounding water in the twenty-first century. From the kitchen taps of Detroit, Michigan to the water-harvesting infrastructure of Tokyo, from the Upper Xingu Basin of Brazil to the Sunda Deep of the Java Trench, these essays flow through time and place to uncover the many issues surrounding water today. Asking key theoretical questions, exposing threats to vital water systems, and proposing paths forward, *Signs of Water* brims with histories, ontologies, and political struggles. Bringing together local experiences to tell a global story, it centers water as history, as politics, and as a human right.

The Malay Art of Self-Defense Sheikh Shamsuddin 2005 Silat Seni Gayong is an art of self-defense, a fighting art but one that also emphasizes the development of the self, becoming a better person, and serving humanity. Sometimes compared to a tiger ready to devour its prey, Gayong helps practitioners develop and increase physical fitness, flexibility, mental conditioning, and self-confidence. Author Sheikh Shamsuddin, who has studied Gayong for 25 years, introduces this little-known practice to Western readers in this first book on the subject in English. The most comprehensive study in any language on Gayong and its customs, *The Malay Art of Self-Defense* explores in depth the system, techniques, crucial elements, and philosophies involved. Also covered are the art's history, profiles of the most notable practitioners, and an informative Q&A collected from various martial art practitioners to expand readers' knowledge and appreciation. Included are photos of Gayong demonstrations, traditional training centers, customs, and events.

The Challenges of Educational Leadership Michael Bottery 2004-09-14 'It should be essential reading at the National College for School Leadership' - Michael Duffy, Times Educational Supplement, Friday Magazine 'This book continues Michael Bottery's principled and persuasive assault on the application by policymakers of fashionable, shallow and decontextualised solutions (in this case leadership) to fundamental problems and issues in the definition, design and purposes of education. It is distinguished by its embeddedness in wider social science ideas and debates, enabling the challenges that schools and teachers face to be set in context, and by its sharp assessment of the impact of decades of the erosion of trust and meaning on educational work' - Jenny Ozga, Professor of Educational Research, Centre for Educational Sociology, University of Edinburgh In this book Mike Bottery presents critical issues about the purposes of educational leadership. He examines how 'official' concepts of leadership are driven by demands which are not always to the educational, political, or social benefit of practitioners. This book will help educational leaders and aspiring educational leaders to examine their own values and practice.

Standards-Based and Responsive Evaluation Robert E. Stake 2003-10-30 The book begins with the main strategic choices an evaluator needs to make between approaches: quantitatively, by explicating criteria, needs, standards, and performances, or qualitatively, by studying the activity, aspirations,

problems, and accomplishments of the participants and critical observers. After reading the text, students will have a better appreciation of evaluation as a process that needs to be custom-fit to the situation. Throughout the book, Stake presents evaluation as a series of choices for the reader: - To remain independent or to join with program staff or stakeholders - To value personal experience as evidence or to shun it as biased - To aid development formatively or to assess the existing program summatively - To use issues, goals, gains, efficiency, or problem solving as the key conceptual structure - To invest small or large in trying out and validating data-gathering procedures - To support the standards and ethical codes of professional associations

Historical Atlas of Indonesia Robert Cribb 2013-02-01 This pioneering volume traces the history of the region which became Indonesia, from early times to the present day, in over three hundred specially drawn full-colour maps with detailed accompanying text. In doing so, the Atlas brings fresh life to the fascinating and tangled history of this immense archipelago. Beginning with the geographical and ecological forces which have shaped the physical form of the archipelago, the Historical Atlas of Indonesia goes on to chart early human migration and the changing distribution of ethnic groups. It traces the kaleidoscopic pattern of states in early Indonesia and their gradual incorporation into the Netherlands Indies and eventually into the Republic of Indonesia.

K-12 Physical Education Manitoba. Dept. of Education 1981 This physical education curriculum guide for kindergarten through twelfth grade has two main components. The first is a program overview that includes information relating to program organization and implementation for early, middle, and senior grades. The second section contains suggested activities and teaching notes for realizing specific program objectives. The overall goals are that students should: (1) develop physical wellbeing; (2) develop desired movement patterns through the neuromuscular system; (3) express ideas, thoughts, and feelings with confidence through physical activity; (4) develop independence in pursuing physical activity throughout life; (5) develop safety and survival practices; and (6) develop positive social interactions through a variety of physical activities. These goals remain constant throughout the entire program, although the objectives which prepare students to reach the goals vary according to stages of maturation and learning. Developmental characteristics, time allotments, lesson plans, activities, class organization, and evaluation methods are outlined for early, middle, and senior grades. Appendixes contain an equipment list, a safety checklist, a sample lesson plan, a discussion of legal liability, and a bibliography. (JD)

Realities of Teachers' Work Sandra Acker 1999-04-01 The Realities of Teacher' Work: Never a Dull Moment follows the fortunes of the teachers at Hillview Primary School over ten years. It explores what it is like to be a primary or elementary school teacher in an urban school with about 200 children, mixed in

social class and ethnicity, and suggests what we may learn from them for the future. Sandra Acker links her research with other literature on teachers' work, and describes the school as a workplace, focusing on four key features: the characteristics of the children, the school's physical setting, the available resources, and the ethos of the school. She successfully places us in the classroom giving vivid images of daily interactions with the children, and shows too how teaching extends far beyond the classroom door. The book explores the caring culture that has developed among the teachers and helps them to cope with the difficulties they encounter. It also considers the school as located in the wider community by looking at changes in teachers' careers over time and the effects on Hillview of recent educational reform. This book shows us how and why we need to revise our assumptions about schools and teachers and see them not as isolated individuals in closed classrooms and self-contained schools, but as an integral part of a much broader community. Above all, it shows that teaching is hard, demanding work that is influenced by workplace cultures and the gendered expectations society holds about teachers.

Contemporary Issues in Business and Economics Chia-Lin Chang 2020-07-01 This book is a collection of high-impact papers accepted and presented at the 2019 Vietnam's Business and Economics Research Conference (VBER2019) organised by Ho Chi Minh City Open University held on 18th-20th July 2019. The Special Issue is associated with a broad coverage of the contemporary issues in Business and Economics in Vietnam and other emerging markets reflecting a key theme of VBER2019: Vietnam's Place in the Asia Pacific Region. A total of 14 papers were published from more than the 120 submissions to the VBER2019 Conference. Published papers had been undergone a rigorous reviewing process conducted by the Journal of Risk and Financial Management. The papers incorporated in this book address contemporary issues in business and economics from Vietnam and other emerging markets in the Asian region from various angles such as economics, finance, and statistics to management science. At the time of writing this note, some of the papers have attracted more than 1000 downloads in 3 months. In particular, a paper on "Foreign Direct Investment and Economic Growth from Developing Countries in the Short Run and Long Run" by Trang Thi-Huyen Dinh and her team has attracted almost 6000 downloads in 3 months. These statistics indicate that the papers published in this Special Issue have attracted the wide interest of readers. Among these 14 published papers, three main areas of important contemporary issues in Business and Economics in the Asian region can be identified. First, a block of papers deals with various important and fundamental issues in the emerging markets the Asian region, from exchange rate regime, financial inclusion, and financial development to energy consumption and environmental degradation. On the issue of CO2 emissions, energy consumption and economic growth in the ASEAN, Vo, Vo, and Le utilized various time series econometrics approaches. Key findings from this paper indicate that there are no long-run relationships among carbon dioxide (CO2) emissions, energy consumption, renewable energy, population growth, and economic growth in the Philippines and Thailand, but a relationship does exist in Indonesia, Myanmar, and Malaysia. Loo, in his paper on financial inclusion for the ASEAN, concluded that advancing internet capability and availability present investors an opportunity to offer financial technology or Fintech to meet the need for financial services in this digital era. Second, a challenge in quantitative studies for a single country, such as Vietnam, with limited

data is generally noted. However, various empirical studies on Vietnam's business and economics issues have been conducted. Nguyen, Quan, and Pham examined the cultural distance and entry mode of foreign direct investment in Vietnam. A key finding from their paper is that when there is a great cultural difference between Vietnam and their home country, foreign-invested firms prefer wholly owned subsidiaries over equity joint ventures. Within the Vietnamese market, Pham, Vo, Ho, and McAleer conducted a study on the issue of corporate financial distress. The authors conclude that the corporate financial distress prediction model, which includes accounting factors with macroeconomic indicators, performs much better than alternative models. In addition, the evidence confirms that the global financial crisis (GFC) had a damaging impact on each sector, with the Health & Education sector demonstrating the most impressive recovery post-GFC, and the utilities sector recording a dramatic increase in bankruptcies post-GFC. At another extreme of the spectrum, Van and Nguyen considered that competitive context, social influences, the understanding of managers about corporate social responsibility (CSR), and the internal environment of companies are the four drivers of CSR. The authors also argued that in the four drivers, competitive context has the strongest impact on adopting CSR. Third, last but not least, various papers focus on an important aspect of public finance. For an example, Pham, Pham, and Ly documented the effect of double taxation treaties on the bilateral trade of Vietnam with ASEAN member states, thereby making an extensive comparison with its EU partner countries. Their findings indicate the significant contributions of the tax treaties to Vietnam's trade performance, not exclusively with ASEAN but also with EU partner countries. In addition, regarding public finance for Vietnam, Nguyen, Vo, Ho, and Vo investigated the contribution of fiscal decentralisation to economic growth across provinces in Vietnam. For the first time in Vietnam, the fiscal decentralisation index together its two subcomponents, including fiscal importance and fiscal autonomy, are developed. Findings from this paper indicate that while fiscal importance and an overall level of fiscal decentralisation have provided negative impact on provincial economic growth, fiscal autonomy has a positive impact on economic growth across provinces in Vietnam.

Quality in Education Jerry Arcaro 1995-05-01 Although hundreds of school improvement programs have been launched in the United States over the past quarter century, very few of them have been successful. The author of *Quality in Education: An Implementation Handbook*, an experienced quality expert who specializes in education, believes that many of these programs could have succeeded had their developers understood and applied the theories and methods of Total Quality Management (TQM). This book explains how to avoid the pitfalls

that doomed previous efforts to failure, and apply TQM to build a strong foundation for success. Beginning with the basic concepts and tools, this book is your complete guide as you embark on your quality journey. The handbook explains the importance of making a commitment to change and establishing a shared vision of quality, and discusses tools and techniques for overcoming resistance and developing a quality culture. The book covers new methods you can use to manage change, and includes exercises to help you apply the ideas in your organization. Examples from successful schools demonstrate how Total Quality Management can be applied to every area of education, from classroom management to building maintenance. Quality in Education: An Implementation Handbook teaches you how to make fundamental changes to the way people in your district or school view education and themselves as educators. Using the principles and methods in this book, you can realize the tremendous benefits of quality - continuous improvement in every educational process.

Intelligence Reframed Howard E. Gardner 2000-09-18 Harvard psychologist Howard Gardner has been acclaimed as the most influential educational theorist since John Dewey. His ideas about intelligence and creativity - explicated in such bestselling books as Frames of Mind and Multiple Intelligences (over 200,000 copies in print combined) - have revolutionized our thinking. In his groundbreaking 1983 book Frames of Mind, Howard Gardner first introduced the theory of multiple intelligences, which posits that intelligence is more than a single property of the human mind. That theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world. Now in Intelligence Reframed, Gardner provides a much-needed report on the theory, its evolution and revisions. He offers practical guidance on the educational uses of the theory and responds to the critiques leveled against him. He also introduces two new intelligences (existential intelligence and naturalist intelligence) and argues that the concept of intelligence should be broadened, but not so absurdly that it includes every human virtue and value. Ultimately, argues Gardner, possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species, but also perhaps even a working definition of the species. Gardner also offers provocative ideas about creativity, leadership, and moral excellence, and speculates about the relationship between multiple intelligences and the world of work in the future.

Cognitive Tools for Learning Piet A.M. Kommers 2012-12-06 Hypermedia technology needs a creative approach from the outset in the design of software to facilitate human thinking and learning. This book opens a discussion of the potential of hypermedia and related approaches to provide open exploratory learning environments. The papers in the book are based on contributions to a NATO Advanced Research Workshop held in July 1990 and are grouped into six sections: - Semantic networking as cognitive tools, - Expert systems as cognitive tools, - Hypertext as cognitive tools, - Collaborative communication tools, - Microworlds: context-dependent cognitive tools, - Implementing cognitive tools. The book will be valuable for those who design, implement and evaluate learning programs and who seek to escape from rigid tactics like programmed instruction and behavioristic approaches. The book presents principles for exploratory systems that go beyond existing metaphors of instruction and provokes the reader to think in a new way about the cognitive level of human-computer interaction.
