Museum of Unheard (Of) Things Roland Albrecht 2015-11-05 MUSEUM OF UNHEARD (OF) THINGS is the catalogue raisonne of the world-famous "literary cabinet of curiosities" in Berlin, which holds the record of being the most visited museum in the German capital (if one offsets the number of visitors to the square meters of the exhibition space). The museum collects unique objects to which curator Roland Albrecht has patiently lent his ear in order to hear the unheard (of) story each of them has to tell. This book is the first publication to assemble all the 78 stories in the current collection, all categorized according to weight, translated into English for the first time. Included are unheard (of) tales about a clock of a Swiss inventor who promoted "New-Time"- where the day was only twenty hours long, an hour fifty minutes, and a minute fifty seconds-and was subsequently arrested by the authorities, the first portrait ID card in history created for Michel de Montaigne, a fork which reveals the secret history of a meeting of chefs in the Alps, the stone that inspired Thomas Mann to write many of his stories, or the scandalous relationship between the Brothers Grimm and alphabet soup. The book ends with a story about the museum itself which may make some readers ponder about the veracity of its existence. These extraordinary tales of seemingly ordinary objects invite the reader to imagine the world differently by listening more carefully and intimately to all the things that surround our everyday lives. "The present is always a story presented by the winners of history. With a gaze kindred to Walter Benjamin's, Albrecht collects things which appear utterly trivial in the given here and now. With patience kindred to Sigmund Freud's, he listens to them until they start revealing their stories. With a playful spirit kindred to Jorge Luis Borges, he writes them down. The result is a gentle but persistent wake-up call in the form of short stories, which cracks the tyranny of present and offers a glimpse into the unheard (of) world of things devoid of victors and losers, but full of tales that await to be told." - CODY EIKMAN "Berlin exists for Museum der Unerhorten Dinge, or maybe the whole world exists for this small museum. Finally its secrets have been translated into English

from German." - TOMOMI ADACHI"

Death of a Guru Rabindranath R. Maharaj 2004-01-22 Rabindranath R Maharaj was descended from a long line of Brahmin priests and trained as a Yogi. He meditated for many hours each day, but gradually disillusionment set in. In DEATH OF A GURU he describes vividly and honestly Hindu life and customs, tracing his difficult search for meaning and his struggle to choose between Hinduism and Christ. At a time when Eastern mysticism and religion fascinate many in the West, Maharaj offers fresh and important insights from the perspective of his own experience. DEATH OF A GURU has long been an excellent seller on HCB's backlist. It is the best-known Hindu to Christianity conversion story and has been used widely for evangelistic purposes. This edition carries an exciting new cover.

Science in the New Age David J. Hess 1993 Hess examines the arguments of people who accept the paranormal as part of a spiritual quest, parapsychologists who are seeking scientific explanations for a narrow range of paranormal phenomena, and skeptics who pooh-pooh the very notion. He finds that, despite their disagreements, they are forging a shared culture. Written for the nonspecialist. Paper edition (unseen), \$17.95. Annotation copyright by Book News, Inc., Portland, OR

A Way of Self-Knowledge Rudolf Steiner 1999-05 "I hope that reading this book can become a kind of inner conversation. If this conversation unfolds in such a way that it reveals the hidden inner forces that can be awakened in every soul, then reading this book may lead to genu-ine, inner soul work. As a result you may find yourself gradually impelled to undertake the journey of the soul that truly leads to vision of the spiritual world." --Rudolf Steiner Part one, "A Way of Self-Knowledge": Eight meditations that take the reader on a journey through human experience. Beginning with ordinary experience, Steiner offers ways to imagine and understand the physical body, the elemental (or etheric) body, the elemental world, the Guardian of the Threshold, the astral body, the I-body (or thought body), the nature of experience in suprasensory worlds, and ways of perceiving previous earthly lives. Part two, "The Threshold of the Spiritual World": Sixteen short chapters in which Steiner provides aphoristic thoughts on trusting one's thinking, cognition of the spiritual world, karma and reincarnation, the astral body and luciferic beings, how to recognize suprasensory consciousness, the true nature of love, and more. These two

complete books together represent Steiner's most personal statements about his own spiritual path. He speaks directly from experiences of cognitive research and explorations. Each of the meditations and aphorisms arises from his spiritual research and demonstrates how such spiritual research is to be undertaken. The "content" is Steiner's own, but readers can discover their own "content." Steiner's method of awareness--his path of attention to one's own experience--is universal and truly human. A Way of Self-Knowledge is a true sequel and complement to the classic of inner development, How to Know Higher Worlds. It lays out in a way that is accessible to anyone the road to self-knowledge and to the world of spirit. This Collected Works edition contains a new introduction, a chronology of Rudolf Steiner's life, and an index. Front cover image: Meditation by Jennifer Thomson (www.phoenixartsgroup.org) A Way of Self-Knowledge: And the Threshold of the Spiritual World is a translation of «Ein Weg zur Selbsterkenntnis des Menschen: In acht Meditationen» (GA 16) and «Die Schwelle dre geistigen Welt: Aphoristische Ausführungen» (GA 17).

Handbook of Mathematical Geodesy Willi Freeden 2018-06-11 Written by leading experts, this book provides a clear and comprehensive survey of the "status quo" of the interrelating process and cross-fertilization of structures and methods in mathematical geodesy. Starting with a foundation of functional analysis, potential theory, constructive approximation, special function theory, and inverse problems, readers are subsequently introduced to today's least squares approximation, spherical harmonics reflected spline and wavelet concepts, boundary value problems, Runge-Walsh framework, geodetic observables, geoidal modeling, ill-posed problems and regularizations, inverse gravimetry, and satellite gravity gradiometry. All chapters are self-contained and can be studied individually, making the book an ideal resource for both graduate students and active researchers who want to acquaint themselves with the mathematical aspects of modern geodesy.

Electromagnetic Interaction with Biological Systems James Lin 2012-12-06 Ever since the early 1940's, electromagnetic energy in the nonionizing spectrum has contributed to the enhanced quality of life in a variety of ways. Aside from their well-known roles in communication, entertainment, industry and science, electromagnetic energy has come into wide spread use in biology and medicine. In addition to the intended purposes, these energies produce other effects which have been shown to influence the life processes of living organisms. It is noteworthy that these energies are not only harmless in ordinary quantities but are actually necessary for modern life, indeed without which life as we know it would be impossible. The purpose of this book is to present a succinct summary of the interaction of electromagnetic fields and waves with biological systems as they are now known. The subject matter is interdisciplinary and is based primarily on presentations scheduled for a joint symposium at the XXII General Assembly of the International Union of Radio Science, held in Tel Aviv, Israel from Tuesday, August 25 to Wednesday, September 2, 1987. The symposium was jointly sponsored by the Bioelectromagnetics Society in cooperation with the International Radiation Protection Association. The choice of topics was made to facilitate the application and to stimulate the use of nonionizing

electromagnetic energy in biology and medicine, and to increase the awareness and to promote the consideration of radiation safety by electrical engineers and experimental physicists.

Back to a Future for Mankind Phd Dr Sc Ibrahim Karim 2010-05 This first-ever published collection of writings by Dr. Ibrahim Karim reflects the holistic essence of his worldview. Dr Karim is the founder of the Science of BioGeometry in the early 1970s. BioGeometry is the science that uses shapes, colors, motion and sound to induce harmony into the subtle energy qualities of the environment. At the core of this harmony is a subtle energy quality found in the transcendental centers of the forming process of nature and is the main quality in sacred power spots of humanity that give a spiritual dimension to the timeless monuments erected since the dawn of humanity. With his experience as an architect and a scientist Dr. Karim has synergized aspects of Pythagorean Harmonics, Subtle energy sciences, Radiesthesia, Geobiology, Building Biology, Sacred Architecture & modern wave theories to produce a new Physics of Quality from which the science of BioGeometry emerged. *BioGeometry bridges science and spirituality to produce a natural harmony into the environment. *BioGeometry provides a viable solution in transforming the quality of the effect that electromagnetic radiation has on living systems. Successful projects in Switzerland in collaboration & acknowledgment of Swiss authorities prove its efficiency to take our modern science into the future. *BioGeometry provides new solutions to Earth Radiation, which is a serious health hazard if not acknowledged in the location and design of our buildings. * A new energy-quality-based analysis of the Great Pyramid in Giza, reveals new knowledge on the foremost of the wonders of the world and on the essence of the great Ancient Egyptian civilization.

Possessed by Ghosts Wanda Pratnicka 2006-01 The book is aimed at all readers not just those who are interested in the esoteric. It introduces accessibly and surprisingly clearly the causes of the toxic relationships that arise between people and ghosts. It contains a large dose of psychology of the soul, testimony to the author's spiritual maturity. Ghosts are the souls of people who, after the death of their physical body, have not resolved to pass through to the other side of death's curtain. The reason for that is that, for various reasons, they overlooked their own deaths, didn't have the courage to go through to the other side or were detained or even pulled away from their road by those mourning the souls of their near ones. When they remain in the world of the living they possess people which can be the cause of very unpleasant and sometimes even tragic experiences. Starting with the mildest -- the presence of ghosts in a person causes severe mood swings ranging from powerful explosions of negative energy to deep depressions. They bring out severe states of anxiety, they tempt those possessed to commit suicide, they have a powerful influence on the psyche and are the cause of psychiatric illnesses. In addition, the diseases of the dead person very often transfer through the ghost to the person possessed. Wanda Pratnicka is an exorcist and psychotherapist of

world renown. Over the past thirty years she has helped many thousands of patients throughout the world.

The Sacred Matrix Dieter Duhm 2008-04-01 About the book: Is there a possibility left to put a stop to the global violence and to start a globalisation of peace? The answer offered in this book is: Yes, the dream of peace may become true. And that's serious: Acting on the assumption of the most recent scientific realisations the author develops the concept of a global peace force that initially comes from a few points on earth, Healing Biotopes, and that is able to change the existing system in a future orientated way. "In the field building of evolution it is not the right of the fittest that counts, but the success of the most comprehensive," is one of his assumptions. The transition from the matrix of violence to the Sacred Matrix of peace does not act on the logic of a power struggle, but on a change of program that is possible to conduct in every moment. Healing Biotopes are self-sufficient future communities, "greenhouses of trust," "acupuncture points of peace." They are centres in which post-capitalist technology is connected with ecology and social know-how. The author has been working with his team on the construction of the first prototype for more than 25 years.

Ultra High Dilution P.C. Endler 1994-01-31 The idea of editing this book was born in the winter of 1988/1989. Christian Endler was organizing the workshop 'Wasser und Information' (water and information) in Austria [1], and Jürgen Schulte was working on a publication of his results on atomic cluster

stabilities and long-range electromagnetic interaction in atomic clusters. It was Franz Moser from the Technical University of Graz who brought these two together. After a talk that Moser had given in Bremen, Schulte explained to him his ideas about clusters and long range interaction, and his concern about reliable theories and experiments in research on ultra high dilutions (UHD) and homoeopathy. He was suggested to be a speaker at the Austrian workshop. Reviewing the contributions of this workshop and the current literature on UHD and homoeopathy, especially the PhD thesis by Giesela King [2] and the excellent survey by Marco Righetti [3], we decided to work on a book in order to critically encourage more scientists to work and publish in this field with a high scientific standard. What we had in mind was a useful contribution to the goal to lift research on UHD and homoeopathy to an internationally acceptable scientific standard, to encourage international scientists to work in this area and to establish UHD and homoeopathy in academic science. Delayed by our individual academic careers in our specific fields, and delayed by lack of funds it took us about four years to finish this book.

The Trickster and the Paranormal George P. Hansen 2001-08-20 Paranormal and supernatural events have been reported for millennia. They have fostered history's most important cultural transformations (e.g., via the miracles of Moses, Jesus, Mohammed). Paranormal phenomena are frequently portrayed in the world's greatest art and literature, as well as in popular TV shows and movies. Most adults in the U.S. believe in them. Yet they have a marginal place in modern culture. No university departments are devoted to studying psychic phenomena. In fact, a panoply of scientists now aggressively denounces them. These facts present a deeply puzzling situation. But they become coherent after pondering the trickster figure, an archaic being found worldwide in mythology and folklore. The trickster governs paradox and the irrational, but his messages are concealed. This book draws upon theories of the trickster from anthropology, folklore, sociology, semiotics, and literary criticism. It examines psychic phenomena and UFOs and explains why they are so problematical for science.

Cosmic Marriage Reinhold Ebertin 2004-07 Reinhold Ebertin's first edition of this book was revised and updated in 1974 and contains a treasure of information on comparative charts for marriage. This detailed textbook presents numerous examples of the relationship between the cosmos, man and marital compatibility. Keys are given on how to recognize whether a cosmic marriage will develop harmoniously or not. Rules of comparative analysis and significant aspects include the Ascendant, Midheaven and Moon's Node. Most of the examples are given using the traditional delineation of chart connections, however midpoints and the use of Ebertin's 90 degree wheel in Cosmobiology are given as well.

Enlightenment Through Orbs Diana Cooper 2010-09 Intended as an introduction and initiation to a worldwide fascination, this experiential tool draws its

conclusions from the careful scrutiny of thousands of digital photographs containing orbs - visible proof of the presence of angels in the form of ghostly spheres. The book answers technical questions and offers practical guidance, such as who the orbs are, what purpose they serve, and how they can help. The dozens of full-color photos included within allow the orbs to enlighten and transform lives with their specific energies as well as provide tools for confidence, love, empowerment, hope, and spiritual expansion. Seekers will find the orbs especially enlightening, whether they are looking to make simple connections to angels and other spirit guides or ultimately to accelerate their own spiritual ascension.

High Dilution Effects on Cells and Integrated Systems C Taddei-Ferretti 1998-03-25 High dilution effects constitute a major problem on the frontier of biophysics. The reported effects on simple and complex biological systems range from in vitro and in vivo models to cellular metabolism regulation, the immune system, the nervous system, intoxicated organs and organisms, and developmental models. The physical properties of high dilutions have been considered, such as the organization properties of water molecules in the presence and after the presence of solute molecules, the energy characteristics of empty and full water clusters, and their dynamical interactions with proteins. Among the mechanisms responsible for the high dilution effects, a non-molecular transfer of information has been hypothesized. Contents: Introductory Lecture: Basic Research on High Dilution Effects (M Bastide) Biophysical Aspects: Hormesis (M Oberbaum) Effects of Metal High Dilutions on Cells and Integrated Systems (J Cambar et al.) Seven-digit numerical sequences form the basis of the system. For further specific conditions, eight-digit and nine-digit numbers are given in the table of contents, as well as throughout the book. The picture used in the design of the cover is an author's picture of

The Stepchildren of Science Heather Wolffram 2009 Leading the reader through the darkened séance rooms and laboratories of Imperial and inter-war Germany, The Stepchildren of Science casts light on the emergence of psychical research and parapsychology in the German context. It looks, in particular, at the role of the psychiatrist Albert von Schrenck-Notzing - a figure who fashioned himself as both propagandist and Grand Seigneur of German parapsychology - in shaping these nascent disciplines. In contrast to other recent studies in which occultism is seen as a means of dealing with or creating "the modern", this book considers the epistemological, cultural and social issues that arose from psychical researchers' and parapsychologists' claims to scientific legitimacy. Focusing on the boundary disputes between these researchers and the spiritualists, occultists, psychologists and scientists with whom they competed for authority over the paranormal, The Stepchildren of Science demonstrates that in the German context both proponents and opponents alike understood psychical research and parapsychology as border sciences.

The World of Ted Serios Jule Eisenbud 2021-07-13 SECOND EDITION. In The World of Ted Serios, Jule Eisenbud, a Denver based psychiatrist and psychical researcher, examined anomalous "thoughtographic" phenomena ostensibly produced by Ted Serios, a Chicago hotel elevator operator who claimed he could mentally produce images on unused Polaroid film. Because "instant" Polaroids were developed immediately, skeptics could not easily attribute success to darkroom chicanery. Eisenbud, a seasoned investigator of anomalous phenomena, conducted thousands of trials with Serios over a three-year period between 1964 and 1967. Hundreds of images were produced as well as so-called blackies and whities-Polaroids that were massively under or overexposed, produced either when the film hadn't been unwrapped or under other conditions clearly ruling out under or overexposure. Eisenbud and multiple witnesses tested Serios in different locations, often under conditions that seemed clearly to rule out fraud-for example, separated at considerable distance from the film or camera. Nevertheless, the images continued to appear, and sometimes they bore striking similarities to sealed "target" images Serios had been challenged to duplicate with his mind. Magician and debunker James Randi, as expected, claimed it was all fraudulent. But despite Eisenbud's substantial financial incentives to magicians to produce the same phenomena under the same conditions, neither Randi or others accepted the challenge. More than fifty years on, Jule Eisenbud's investigation into Ted Serios' thoughtography is one of the most intriguing cases in the annals of anomalous phenomena.

account of science's flirtation with the marginal and the marvelous" from the author of *Conjuring Science* (*Journal of the History of the Behavioral Sciences*). Séances were wildly popular in France between 1850 and 1930, when members of the general public and scholars alike turned to the wondrous as a means of understanding and explaining the world. Sofie Lachapelle explores how five distinct groups attempted to use and legitimize séances: spiritists, who tried to create a new "science" concerned with the spiritual realm and the afterlife; occultists, who hoped to connect ancient revelations with contemporary science; physicians, psychiatrists, and psychologists, who developed a pathology of supernatural experiences; psychical researchers, who drew on the unexplained experiences of the public to create a new field of research; and metapsychists, who attempted to develop a new science of yet-to-be understood natural forces. An enlightening and entertaining narrative that includes colorful people like "Allan Kardec"—a pseudonymous former mathematics teacher from Lyon who wrote successful works on the science of the séance and what happened after death—*Investigating the Supernatural* reveals the rich and vibrant diversity of unorthodox beliefs and practices that existed at the borders of the French scientific culture in the late nineteenth and early twentieth centuries. "What is science? . . . In her engaging book, Sophie Lachapelle probes for an answer by looking at the liminal realm between science and superstition and the attempt to render the supernatural explicable in naturalistic terms." —Isis "A welcome addition to the growing literature on spiritism, occultism and physical research in modern France." —*French History*
