The Basketball Chronicles of Mister Jennings Keith Jennings 2016-03-16 My story is different, but I'm sure every small player that wanted to become a professional basketball player can relate to what I had to go through. I'm 5'7" and there are so many small basketball players that get overlooked because of their size. I want to be the voice for those players. I was blessed by God with the talent and love to be a basketball player. Through God's grace and timing, basketball has shown me parts of the world that I would've never visited and the great support that I received from my family and friends will never be forgotten or taken for granted...dream big, work for it and see what happens! Growing up in the Jennings' household during basketball season was something I loved and respected. Basketball in the morning, basketball in the evening, basketball at night, basketball in the house, basketball in the gyms, basketball at the dunk courts, basketball on television, basketball movies, basketball without a basketball, I just couldn't get enough and then it turned into a memory bank. Memories of family basketball, memories of high school basketball, memories of college basketball, memories of the NBA, memories of European basketball, memories of good games, bad games, great games, and injuries. If the good outweighs the bad you'll be happy to share your story with anyone that asks. You have to understand that a lot of people never gave me a chance. My family believed in me and I believed in myself, and I worked so hard I get chills just thinking about it. The memories don't stop until you stop. I found out very quickly that short basketball players need to be special. Looking back on it, I realized that the short players that I liked were special. Mugsy Boges was 5'3," Spud Webb was 5'7" and could dunk (he won the NBA dunk contest back in the day), Calvin Murphy was a flat out scorer, and the list goes on and on. At this present time there are only 10 basketball players under 6' that have played 3 years or more in the NBA. I felt like I was special because I played basketball on all major levels: high school, college, NBA and European professional basketball. I'm going to take you through a series of events that I believe gave me the opportunity to not only have my basketball dreams come true, but to also be able to make money doing something I love. Have you ever been to a place where you feel at peace with yourself? If you haven't, I hope you find it before your time on this earth is done. My peace is basketball. It doesn't matter what is going on in my life, I can grab a basketball, find a rim and the rim

doesn't even have to have nets. I'll forget everything and just play. It's a great feeling. I believe dreams come true. Mine did and yours can too. You just need to be patient, work hard, don't listen to the negative people (haters), and believe in your own abilities. I did. I had to deal with all of those things and it shaped me to be the man that I am today.

Terminated for Reasons of Taste Chuck Eddy 2016-08-25 In *Terminated for Reasons of Taste*, veteran rock critic Chuck Eddy writes that "rock'n'roll history is written by the winners. Which stinks, because the losers have always played a big role in keeping rock interesting." Rock's losers share top billing with its winners in this new collection of Eddy's writing. In pieces culled from outlets as varied as the Village Voice, Creem magazine, the streaming site Rhapsody, music message boards, and his high school newspaper, Eddy covers everything from the Beastie Boys to 1920s country music, Taylor Swift to German new wave, Bruce Springsteen to occult metal. With an encyclopedic knowledge, unabashed irreverence, and a captivating style, Eddy rips up popular music histories and stitches them back together using his appreciation of the lost, ignored, and maligned. In so doing, he shows how pop music is bigger, and more multidimensional and compelling than most people can imagine.

Sacred Playgrounds Jacob Sorenson 2021-07-01 Sacred Playgrounds explores the wisdom of camping ministry for Christian education and faith formation, examining its rich history and fundamental characteristics with compelling stories, groundbreaking research, and theological grounding. Christian summer camp is an integral part of the ecology of faith formation in North America, though it has received surprisingly little attention in the scholarly community until now. Camping ministry is often dismissed as simple fun and games or a brief spiritual high that does not last. However, camp experiences often serve as deeply relational and immersive faith experiences that have lasting impacts on participants. Five fundamental characteristics combine dynamically in the effective camp experience: participatory, faith-centered, safe space, relational, and unplugged from home. Together, they open the space for participants to consider new understandings of God, to have time for deep self-reflection, and to build intentional Christian community. These camp experiences are essential components in a larger ecology of faith formation, including the home and congregation. The insight and evidence presented in this book demonstrate that the contributions of camping ministry must be taken seriously among scholars, Christian educators, and ministry professionals.

Long-Term Athlete Development Istvan Balyi 2013-09-04 Long-Term Athlete Development describes how to systematically develop sporting excellence and increase active participation in local, regional, and national sport organizations. This resource describes the long-term athlete development (LTAD) model, an approach to athlete-centered sport that combines skill instruction with long-term planning and an understanding of human development. By learning about LTAD, sport administrators and coaches will gain the knowledge and tools to enhance participation and improve performance and growth of athletes. This text offers the first in-depth and practical explanation of the LTAD model. Long-Term Athlete Development integrates current research on talent development and assessment into practice to help sport leaders plan athletic development across the life span or design detailed programs for a particular group, including those with physical and cognitive disabilities. Authors Balyi, Way, and Higgs—pioneers and veteran LTAD facilitators—critique current talent development models, discuss the limitations of the LTAD model, and demonstrate the benefits of LTAD as a new approach. By integrating knowledge of these models, readers are able to analyze their own programs and take steps to improve sport and coaching philosophies and reach adherence and performance goals. Explanations and visuals of concepts help readers understand the state of knowledge in talent identification and long-term athlete development. Chapter-opening vignettes offer examples of how the LTAD model can be used to alleviate common issues. Listings at the end of each chapter offer sources for further study, and reflection questions guide readers in applying the content. The text offers a logical presentation of current research:

- Key factors that guide and shape the LTAD model, such as physical literacy, the differences between early- and late-specialization sports, and variations in trainability across the life span
- Information on the time needed to develop excellence in sport and how periodization of training is related to the developmental stage of the athlete
- The seven stages of LTAD, from development of fundamental movement skills to training for elite competition and the transition to lifelong physical activity
- Considerations in the development of optimal programs for participants passing through each of the seven stages

Long-Term Athlete Development is an essential guide to improving the quality of sport, developing high-performance athletes, and creating healthy, active citizens. It offers parents, coaches, and sport administrators a deeper understanding of the LTAD model, helping them create an enjoyable, developmentally appropriate environment for both competitive athletes and enthusiastic participants.
