Hawking Hits on the Information Highway Laura L. Finley 2008 This book examines the phenomenon of online drug and drug paraphernalia sales, drug recipes, and information about drugs. Discussing the availability of products and advice regarding prescription drugs, steroids, and illicit drugs, the book also offers a profile of who is buying, selling, and sharing these products and this information. Additionally, Hawking Hits on the Information Highway examines the rise of drug testing as a vehicle of the war on drugs, and looks at how the Web has been used to market products and tips for cheating on drug tests. The book identifies the challenges for law enforcement and other bodies in policing the Web, and details how Internet-based sales are altering the war on drugs. This groundbreaking book will particularly benefit students in college courses specifically addressing drugs, criminology, and law enforcement, and will be useful in any course examining wider social issues.

The Economic Sociology of Immigration Alejandro Portes 1995-06-22 "Portes suggests that immigration constitutes an especially appropriate Mertonian 'strategic research site' for economic sociology in that it provides very good opportunities for investigating the embeddedness of economic relationships in social situations....the contributors expand the conventional domain of economic

sociology quite literally in both time and space."—Contemporary Sociology "Alejandro Portes and his splendid band of collaborators make clear that the causes, processes, and consequences of migration vary dramatically from group to group, that a group's history makes a profound difference to its fate in the American economy. They have produced a sinewy book, a book worth arguing with."—Charles Tilly, Columbia University *The Economic Sociology of Immigration* forges a dynamic link between the theoretical innovations of economic sociology with the latest empirical findings from immigration research, an area of critical concern as the problems of ethnic poverty and inequality become increasingly profound. Alejandro Portes' lucid overview of sociological approaches to economic phenomena provides the framework for six thoughtful, wide-ranging investigations into ethnic and immigrant labor networks and social resources, entrepreneurship, and cultural assimilation. Mark Granovetter illustrates how small businesses built on the bonds of ethnicity and kinship can, under certain conditions, flourish remarkably well. Bryan R. Roberts demonstrates how immigrant groups' expectations of the duration of their stay influence their propensity toward entrepreneurship. Ivan Light and Carolyn Rosenstein chart how specific metropolitan environments have stimulated or impeded entrepreneurial ventures in five ethnic populations. Saskia Sassen provides a revealing analysis of the unexpectedly flexible and vital labor market networks maintained between immigrants and their native countries, while M. Patricia Fernandez Kelly looks specifically at the black inner city to examine how insular cultural values hinder the acquisition of skills and jobs outside the neighborhood. Alejandro Portes also depicts the difference between the attitudes of American-born youths and those of recent immigrants and its effect on the economic success of immigrant children.

Designing Gifted Education Programs and Services Scott J. Peters 2021-11-05 This book is intended to support educators in the design and implementation of comprehensive gifted education plans. From planning to actual implementation, this book takes the reader from goals and purpose to assessing student needs and program design. The authors begin with a broad overview of best practices in programming and services, highlighting connections to student needs, programming standards, and state laws. Their recommendations include philosophical, cultural, and practical considerations and data-based decision making. In this book, Peters and Brulles guide the reader through the process of determining the most optimal programming methods for schools to take based on their individual needs and circumstances. With this book, schools will be able to design and develop programs and/or services that lay the foundation necessary to ensure all students are appropriately challenged.

Ghost Boys Jewell Parker Rhodes 2018-04-17 A heartbreaking and powerful story about a black boy killed by a police officer, drawing connections through history, from award-winning author Jewell Parker Rhodes. Only the living can make the world better. Live and make it better. Twelve-year-old Jerome is shot by a police officer who mistakes his toy gun for a real threat. As a ghost, he observes the devastation that's been unleashed on his family and community in the wake of what they see as an unjust and brutal killing. Soon Jerome meets another ghost: Emmett Till, a boy from a very different time but similar circumstances. Emmett helps Jerome process what has happened, on a journey towards recognizing how historical racism may have led to the events that ended his life. Jerome also meets Sarah, the daughter of the police officer, who grapples with her father's actions. Once again Jewell Parker Rhodes deftly weaves historical and socio-political layers into a gripping and poignant story about how children and families face the complexities of today's world, and how one boy grows to understand American blackness in the aftermath of his own death.

Reading Interventions for the Improvement of the Reading Performances of Bilingual and Bi-dialectal Children Dr. Afra Johnson 2015-10-29 The book explores the remedial pedagogy applied during intervention designed to improve the students' metacognitive processes of learning new English-language knowledge. Today's globalization and technology on social behaviors demand that school-age students acquire reading skills by the use of audio-visual practices. The linguistic integrations during the intervention processes combined with direct instruction produced an individualized awareness of improvements in comprehension. Each student cognitively processed the audio input and visual text. My findings were related to the cultural practices of ESOL and ELL students to counteract the mismatch between home and school language frameworks. This type of technique encourages students to use the concepts of the English language related to what they hear, read, and speak within and outside of the school environment.

The Education Triple Cocktail Brahm Fleisch 2018-08-15 The Education Triple Cocktail brings together rigorous quantitative and qualitative research on a new approach to improving foundational teaching

and learning for schoolchildren living in working-class, poor and remote rural communities in resource-constrained systems like South Africa. At the core of this book is the theory and evidence for a powerful, new, interlocking and mutually reinforcing change model. Inspired by the AIDS treatment story, the three-pronged approach of structured daily lesson plans, appropriate and high-quality educational materials, and one-on-one instructional coaching to help teachers transform their instructional practices in early grade classrooms, shows that it will improve learning outcomes. For education systems defined by low levels of early grade learning and profoundly unequal outcomes, The Education Triple Cocktail offers a theoretically informed, evidence-based way forward. This book will be of immense use to teachers, students of Education, policymakers and parents.

The New Immigrants and American Schools Marcelo M. Suárez-Orozco 2022-01-27 This six-volume set focuses on Latin American, Caribbean, and Asian immigration, which accounts for nearly 80 percent of all new immigration to the United States. The volumes contain the essential scholarship of the last decade and present key contributions reflecting the major theoretical, empirical, and policy debates about the new immigration. The material addresses vital issues of race, gender, and socioeconomic status as they intersect with the contemporary immigration experience. Organized by theme, each volume stands as an independent contribution to immigration studies, with seminal journal articles and book chapters from hard-to-find sources, comprising the most important literature on the subject. The individual volumes include a brief preface presenting the major themes that emerge in the materials, and a bibliography of further recommended readings. In its coverage of the most influential scholarship on the social, economic, educational, and civil rights issues revolving around new immigration, this collection provides an invaluable resource for students and researchers in a wide range of fields, including contemporary American history, public policy, education, sociology, political science, demographics, immigration law, ESL, linguistics, and more.

Renewal Harold Kwalwasser 2012-03-16 Renewal offers a clear picture of how to move away from the mass-production style of education that most schools offered throughout the twentieth century to a new, more innovative, and flexible model that can meet this country's promise of truly educating every child and preparing each of them for the challenges ahead.

Grandma Gatewood's Walk Ben Montgomery 2014-04-01 Winner of the 2014 National Outdoor Book Awards for History/Biography Emma Gatewood told her family she was going on a walk and left her small Ohio hometown with a change of clothes and less than two hundred dollars. The next anybody heard from her, this genteel, farm-reared, 67-year-old great-grandmother had walked 800 miles along

the 2,050-mile Appalachian Trail. And in September 1955, having survived a rattlesnake strike, two hurricanes, and a run-in with gangsters from Harlem, she stood atop Maine's Mount Katahdin. There she sang the first verse of "America, the Beautiful" and proclaimed, "I said I'll do it, and I've done it." Grandma Gatewood, as the reporters called her, became the first woman to hike the entire Appalachian Trail alone, as well as the first person—man or woman—to walk it twice and three times. Gatewood became a hiking celebrity and appeared on TV and in the pages of Sports Illustrated. The public attention she brought to the little-known footpath was unprecedented. Her vocal criticism of the lousy, difficult stretches led to bolstered maintenance, and very likely saved the trail from extinction. Author Ben Montgomery was given unprecedented access to Gatewood's own diaries, trail journals, and correspondence, and interviewed surviving family members and those she met along her hike, all to answer the question so many asked: Why did she do it? The story of Grandma Gatewood will inspire readers of all ages by illustrating the full power of human spirit and determination. Even those who know of Gatewood don't know the full story—a story of triumph from pain, rebellion from brutality, hope from suffering.

Discovering Statistics Daniel T. Larose 2015-11-05 Dan Larose's Discovering Statistics is the ideal text for instructors who want to teach the basics of statistical computation as well as how to interpret and apply the results of those computations. Using real data, contemporary examples, step-by-step solutions, extensive pedagogy, and support for common statistical software options, the text familiarizes students with essential computational skills, while helping them build the conceptual understanding needed to interpret and explain their findings. As a result, Discovering Statistics helps students develop a solid and lasting "statistical sense" that will prove valuable throughout their academic and professional careers.
