Summary of Jesse Mecham's You Need a Budget Swift Reads 2021-01-29 Buy now to get the insights from Jesse Mecham's *You Need a Budget*. Sample Insights: 1) Budgeting is not about a spreadsheet detailing what you need to spend in a month. This system lacks flexibility and doesn't allow you to prioritize your spending, especially if there isn't enough money for everything. 2) Your budget is all about thinking ahead. Just make sure you don't forecast future money. That cash will be great when it hits your account, but you're only concerned with making sure the money you have today gets you closer to your goals.

Giving Kids a Fair Chance James J. Heckman 2017-09-08 A top economist weighs in on one of the most urgent questions of our times: What is the source of inequality and what is the remedy? In *Giving Kids a Fair Chance*, Nobel Prize-winning economist James Heckman argues that the accident of birth is the greatest source of inequality in America today. Children born into disadvantage are, by the time they start kindergarten, already at risk of dropping out of school, teen pregnancy, crime, and a lifetime of low-wage work. This is bad for all those born into disadvantage and bad for American society. Current social and education policies directed toward children focus on improving cognition, yet success in life requires more than smarts. Heckman calls for a refocus of social policy toward early childhood interventions designed to enhance both cognitive abilities and such non-cognitive skills as confidence and perseverance. This new focus on preschool intervention would emphasize improving the early environments of disadvantaged children and increasing the quality of parenting while respecting the primacy of the family and America's cultural diversity. Heckman shows that acting early has much greater positive economic and social impact than later interventions—which range from reduced pupil-teacher ratios to adult literacy programs to expenditures on police—that draw the most attention

in the public policy debate. At a time when state and local budgets for early interventions are being cut, Heckman issues an urgent call for action and offers some practical steps for how to design and pay for new programs. The debate that follows delves deeply into some of the most fraught questions of our time: the sources of inequality, the role of schools in solving social problems, and how to invest public resources most effectively. Mike Rose, Geoffrey Canada, Charles Murray, Carol Dweck, Annette Lareau, and other prominent experts participate.

Issues in Educating Students With Disabilities John Wills Lloyd 2014-05-01 The contributors to this volume represent the most prominent researchers and thinkers on issues in educating students with and without disabilities. The book captures the most current thinking, research, and analysis on the full range of issues in educating students with learning disabilities, from its definition to the most recent case law and interpretations of federal law on educating these students in the general education classroom. The contributors' words speak sufficiently, mellifluously, and exactly about their contributions to the education of all students, in particular those with disabilities. This book of essays was written to pay tribute to Barbara D. Bateman, who -- along with Sam Kirk -- coined the term "learning disabilities." Its content reflects the significance of her contributions to the field of special education.

Eager to Learn National Research Council 2001-01-22 Clearly babies come into the world remarkably receptive to its wonders. Their alertness to sights, sounds, and even abstract concepts makes them inquisitive explorers--and learners--every waking minute. Well before formal schooling begins, children's early experiences lay the foundations for their later social behavior, emotional regulation, and literacy. Yet, for a variety of reasons, far too little attention is given to the quality of these crucial years. Outmoded theories, outdated facts, and undersized budgets all play a part in the uneven quality of early childhood programs throughout our country. What will it take to provide better early education and care for our children between the ages of two and five? *Eager to Learn* explores this crucial question, synthesizing the newest research findings on how young children learn and the impact of early learning. Key discoveries in how young children learn are reviewed in language accessible to parents as well as educators: findings about the interplay of biology and environment, variations in learning among individuals and children from different social and economic groups, and the importance of health, safety, nutrition and interpersonal warmth to early learning. Perhaps most significant, the book documents how very early in life learning really begins. Valuable conclusions and recommendations are presented in the areas of the teacher-child relationship, the organization and content of curriculum, meeting the needs of those children most at risk of school failure, teacher preparation, assessment of teaching and learning, and more. The book discusses: Evidence for competing theories, models, and approaches in the field and a hard look at some day-to-day practices and activities generally used in preschool. The role of the teacher, the importance of peer interactions, and other relationships in the child's life. Learning needs of minority children, children with disabilities, and other special groups. Approaches to assessing young children's learning for the purposes of policy decisions, diagnosis of educational difficulties, and instructional planning. Preparation and continuing development of teachers. *Eager to Learn* presents a comprehensive, coherent picture of early childhood learning, along with a clear path toward improving this important stage of life for all children.

Observing Policy-Making in Indonesia Erhard Friedberg 2016-10-03 This book analyzes policy-making and implementation in Indonesia. Conducted at the School of Government and Public Policy (Indonesia), the research presented here provides original insights into the country’s public policy processes by exploring the conditions on the ground that shape implementation. The studies brought together in this volume are based on fieldwork involving interviews with various stakeholders, first-hand observations, and the collection of original documents and data. They address policy issues ranging from health insurance, district recruitment, community empowerment, and solid waste management, to tourism and the status of refugees. The result is a wealth of case-study data on policy implementation experiences in Indonesia that will benefit students, academics and practitioners alike.

Public Policy Sara R. Rinfret 2022-01-11 Public Policy: A Concise Introduction is a student-friendly textbook that quickly connects readers to the inner workings of public policy. The text condenses early chapters on theory and the policy-making process, allowing students to take up key policy challenges – such as immigration, education, and healthcare - much earlier in the semester. Not every student starts out engaged in public policy, so place your students – both majors and non-majors alike – in the driver's seat by fostering their analytical skills early and spend the rest of the semester discussing policy issues, examining data, and debating current policy examples that matter most to them. The Second Edition has been updated to include how we can collectively use public policy to raise individuals from the margins and address inequities that exist in our system. Recent policy questions include: "How do we shape our country's health care system?", "How do we address increases in costs of tuition?", and "Did the COVID-19 pandemic positively or negatively shape our public education system?"

"Sesame Street" and the Reform of Children's Television Robert W. Morrow 2008-12-08 “[An] accessible, well-

researched introduction to the people and principles behind the show's creation . . . Essential." —Choice (An Outstanding Academic Title of the Year) By the late 1960s more than a few critics of American culture groused about the condition of television programming and, in particular, the quality and content of television shows for children. In the eyes of the reform-minded, commercial television crassly exploited young viewers; its violence and tastelessness served no higher purpose than the bottom line. The Children's Television Workshop (CTW)—and its fresh approach to writing and producing programs for kids—emerged from this growing concern. Sesame Street—CTW's flagship hour-long show—aimed to demonstrate how television could help all preschoolers, including low-income urban children, prepare for first grade. In this engaging study Robert W. Morrow explores the origins and inner workings of CTW, how the workshop in New York scripted and designed Sesame Street, and how the show became both a model for network television and a thorn in its side. Through extensive archival research and a systematic study of sample programs from Sesame Street's first ten seasons, Morrow tells the story of Sesame Street's creation; the ideas, techniques, organization, and funding behind it; its place in public discourse; and its ultimate and unfortunate failure as an agent of commercial television reform. "An insightful look at American children's television." —Library Journal

The Family Book Todd Parr 2011-06-01 There are so many different types of families, and THE FAMILY BOOK celebrates them all in a funny, silly, and reassuring way. Todd Parr includes adopted families, step-families, one-parent families, and families with two parents of the same sex, as well as the traditional nuclear family. His quirky humor and bright, childlike illustrations will make children feel good about their families. Parents and teachers can use this book to encourage children to talk about their families and the different kinds of families that exist.

Qualitative Nursing Research Janice M. Morse 1991 Qualitative Nursing Research addresses many of the problematic issues in qualitative research. Leading qualitative methodologists from orientations in phenomenology, grounded theory and ethnography contribute chapters on their favourite issues, which also form the bases for the 'dialogues' which alternate with each chapter. With the exception of a few chapters that describe a single method, the problems discussed relate to every qualitative nursing project: improving the use of self; examining one's own culture; some myths and realities of qualitative sampling; debates about counting and coding data; and ethical issues in interviewing.
