Behavior and Psychology (formerly Obesity), 18(7):1330--1335. Nearly 100 college--aged students and their parents completed retrospective questionnaires of parental feeding practices regarding the college students' childhood. The results showed that parental monitoring and restriction of food intake had a significant impact on their

SOTIPS MANUAL October 2013 - robertmcgrath.us

contained in this manual. The scale is designed to score individuals at intake and thereafter every six months. SOTIPS item scores are intended to reflect an individual's relative treatment and supervision need on each dynamic risk factor. The SOTIPS total score is intended to provide an estimation of an individual's overall
