City Halls and Civic Materialism Swati Chattopadhyay 2014-03-14 The town hall or city hall as a place of local governance is historically related to the founding of cities in medieval Europe. As the space of representative civic authority it aimed to set the terms of public space and engagement with the citizenry. In subsequent centuries, as the idea and built form travelled beyond Europe to become an established institution across the globe, the parameters of civic representation changed and the town hall was forced to negotiate new notions of urbanism and public space. **City Halls and Civic Materialism: Towards a Global History of Urban Public Space** utilizes the town hall in its global historical incarnations as bases to probe these changing ideas of urban public space. The essays in this volume provide an analysis of the architecture, iconography, and spatial relations that constitute the town hall to explore its historical ability to accommodate the "public" in different political and social contexts, in Europe, Asia, Australia, Africa and the Americas, as the relation between citizens and civic

authority had to be revisited with the universal franchise, under fascism, after the devastation of the world wars, decolonization, and most recently, with the neo-liberal restructuring of cities. As a global phenomenon, the town hall challenges the idea that nationalism, imperialism, democracy, the idea of citizenship - concepts that frame the relation between the individual and the body politic -- travel the globe in modular forms, or in predictable trajectories from the West to East, North to South. Collectively the essays argue that if the town hall has historically been connected with the articulation of bourgeois civil society, then the town hall as a global spatial type -- architectural space, urban monument, and space of governance -- holds a mirror to the promise and limits of civil society.

Indian Reserved Water Rights John Shurts 2003-03-01 In its 1908 decision for *Winters v. United States*, the Supreme Court affirmed a lower-court ruling that the United States and the Gros Ventre and Assiniboine Indians had reserved rights to water in the Milk River through an 1888 treaty which created the Fort Belknap Indian Reservation in Montana. Since 1908 the *Winters* decision, or Indian reserved water rights doctrine, has played an important and controversial role in the West. *Indian Reserved Water Rights* is the first book-length historical study of the *Winters* case and the early use of the reserved water doctrine. In the book, John Shurts explains how the litigation and its outcome fit well within the existing legal context and into ongoing efforts at water development in the Milk River Valley. He also examines the life of the *Winters* Doctrine during its earliest years, primarily through a study of water-rights litigation on the Uintah Reservation in Utah.
