The Roots of Justice Lawrence M. Friedman 2017-10-10 Focusing on a single county at a time when the population grew from 24,000 to 246,000, the authors combine statistical analysis of documentary sources, contemporary newspaper accounts, and exploration in criminal case files to give a detailed reconstruction of the operations of the county's entire criminal justice system. By tracing the process from arrest to trial, sentencing, and punishment, this study will have a profound effect on our perception of American criminal justice. Originally published in 1981. A UNC Press Enduring Edition -- UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.

Wrightslaw Special Education Legal Developments and Cases 2019 Peter Wright 2020-07-10

Wrightslaw Special Education Legal Developments and Cases 2019 is designed to make it easier for you to stay up-to-date on new cases and developments in special education law. Learn about current and emerging issues in special education law, including: * All decisions in IDEA and Section 504 ADA cases by U.S. Courts of Appeals in 2019 * How Courts of Appeals are interpreting the two 2017 decisions by the U.S. Supreme Court * Cases about discrimination in a daycare center, private schools, higher education, discrimination by licensing boards in national testing, damages, higher standards for IEPs and "least restrictive environment" * Tutorial about how to find relevant state and federal cases using your unique search terms

School and Community Catherine Lindsay 2014-05-17 School and Community discusses a research project that surveys the role of the school in the community as seen by students and their parents and community agencies. It identifies several factors that influence the conceptions and attitudes of students and parents towards education and in particular, the efficacy of contact and communication between schools and parents. This book begins by describing the two schools that participated in the survey and identifying the survey methods that were carried out to collect information. After presenting data on parents' occupations and work ambitions of the students, it discusses the implications of contact and communication between parents and school. Finally, this book investigates the views of community agencies concerning the schools' interaction with them. Teachers who are confronted with problems of communication with parents and community agencies will find this text useful.

The Art of Access David Cuillier 2019-07-12 "The Art of Access is a must-have book for any journalism student or professional reporter. It will ensure that a journalist understands the importance of authentic documents to establish the credibility of news stories and how crucial it is to obtain those documents no matter the obstacles public officials may create to prevent access." —Brant Houston, University Of Illinois Whatever you're trying to learn about the world—as a journalist or as an informed citizen—public records often hold the key. But what records, where? And how to get them? Gaining access to records is an art, one that requires an organized approach and a good understanding of human behavior. *The Art of Access: Strategies for Acquiring Public Records, Second Edition* is a how-to guide for putting the law into action and using ingenuity to pry records loose. FOI experts and longtime journalists David Cuillier and Charles N. Davis present strategies for dealing with the officials who stand between you and the information you seek. They explore new developments in technology and research and the latest online innovations and tools to help you rethink the information-gathering process and develop a document state of mind.

The Hart-Fuller Debate in the Twenty-First Century Peter Cane 2010-02-16 This book presents the papers and comments on those papers delivered at a colloquium held at the Australian National University in December 2008 to celebrate 50 years since the publication in the *Harvard Law Review* of the famous and wide-ranging debate between HLA Hart and Lon L Fuller. These essays do not re-run that debate and they are not confined to discussion of the jurisprudential issues canvassed by Hart and Fuller. Rather they pick up on strands in the debate and re-think them in the light of social, political and intellectual developments in the past 50 years and changed ways of understanding law and other normative systems. This collection looks forward rather than backward using the debate as a point of departure and inspiration.

Medical Misadventures Alistair Fraser-Moodie 2018-03-28 A memoir looking at the ups and downs of a doctor's life. A 'warts and all' examination of the NHS through the last 50 years. The book also looks at the looming crisis in the NHS when the number of doctors will dramatically fall.

The Premed Playbook Guide to the Medical School Interview Ryan Gray 2017-03-07 The Premed Playbook: Guide to the Medical School Interview is the only book needed to prepare premed students for their medical school interviews. Through interviews with Admissions Committee members and others, Dr. Gray has compiled the most comprehensive book on this subject. Premed students want to know what to expect, but more importantly they need to see examples of what successful applicants have done. The Premed Playbook not only gives them close to 600 potential interview questions, it also gives them real answers and feedback from interview sessions that Dr. Gray has held with students.

Violet Alex De Tres 2017-06-08 Nobles of Heaven and of the Underworld are more than Angels and Demons. They vigilantly watch over mankind and the delicate balance between good and evil. Without these guardians keeping the peace, Angels would rule the earth with an iron fist, while Demons would choose to revel in its destruction. Violet is a Guardian Angel, and a Noble of Heaven, whose many talents include the ability to read the hearts of men, which more often than not, gets her into trouble. Especially when her gaze turns to a handsome young artist, who frequents Central Park in New York. Takara is a Noble of the Underworld, with a reputation of being aloof, and a recluse. He lives among men as a world famous painter, whose gifts include painting living portraits known as Captures. He has always been content to paint all things beautiful, be they heavenly or otherwise, but finds himself drawn to Violet for her elegance and innocence. But most of all for her perfect violet eyes. When an unforeseen accident places Violet at Takara's feet, the sparks between them will threaten the oldest peace treaty between the two realms. Will they become the catalyst that dooms mankind? M/M Gay, Fantasy, Romance

Medical Conflicts in Early Modern London Margaret Pelling 2006-05-06 Physicians have had a major role in framing the middle-class values of modern western society, especially those relating to the professions. This book questions the bases of this hegemony, by looking first at the early modern physician's insecurities in terms of status and gender, and then at the wider world of medicine in London which the College of Physicians sought to suppress. The College's proceedings against irregular practitioners constitute a case-study in the regulation of an occupation critical for the well-being of contemporary Londoners. However, the College was, it is argued, an anomalous body, detached from most other forms of male authority in the urban context, and its claims lacked social recognition. It used stereotyping to construct an account designed for higher authority, but at the same time, its regulatory efforts were constantly undermined by the effects of patronage. The so-called irregular practitioners emerge as extremely diverse in country of origin, religious belief, and levels of formal education, yet the

full analysis provided here also shows that most were literate, and that a significant number later became members of the College. Many were London artisans, barber-surgeons and apothecaries who can be seen as the 'excluded middle' between the two better-known extremes of the physician and the quack. In suppressing artisan practitioners, the College was also seeking to suppress contractual or 'citizen' medicine, an alternative system of structuring relations between the active patient and the practitioner which was fully integrated in contemporary urban custom and practice, but which has since disappeared. The College's selective account also inadvertently reveals the existence of female artisans who practised medicine outside the household routinely and for payment. Although distorted by the College's proximity to the Crown and to elite patrons, the Annals of the College give access to the rich variety of medical practice in early modern London and to the forms of resistance and self-presentation with which those outside the College justified, or denied, their identity as practitioners.

The Psychiatric Interview in Clinical Practice, Third Edition Roger A. MacKinnon, M.D. 2015-10-20
Much has changed in the critical interval since the last edition of *The Psychiatric Interview in Clinical Practice* was published. This new, third edition provides an up-to-date examination of the psychiatric interview that reflects changes introduced in DSM-5, while continuing to recognize that describing symptoms and establishing a diagnosis should command only a portion of the clinician's attention, and that a patient's personal history must be elicited and character structure addressed in the clinical engagement. Significant advances have been made in biological psychiatry, and research in genetics, cognitive neuroscience, psychopharmacology, brain imaging, and the neurosciences in general continues apace, informing the culture of psychiatry and providing growing insight into the etiology of mental illnesses. However, the book reflects the authors' belief that virtually all major psychiatric disorders are complex amalgams of genetic disposition and environmental influences. In this context, the psychiatric interview is a vitally important dialogue, and effective strategies are modeled through the use of clinical vignettes taken from the authors' experience. Topics and features of this new edition include: * An updating of diagnostic considerations to reflect the publication of DSM-5.* A chapter on interviewing the patient with dissociative identity disorder (DID), which is now recognized as an entity distinct from other psychopathological conditions and rooted in childhood trauma. The frequency of DID in the ambulatory setting has been repeatedly demonstrated and speaks to the need to accurately diagnose and treat this often-debilitating disorder.* An entirely updated chapter on interviewing the traumatized patient.* A section on interviewing the patient of different background. The book emphasizes that the subjective experience of being "different" is universal and that psychiatry is enriched by recognizing and exploring that experience, validating its existence, and attempting to understand how it influences the patient's life.* Continued emphasis on and inclusion of relevant case vignettes drawn from the authors' clinical experiences.* Structural consistency across chapters, with sections on psychopathology and psychodynamics, differential diagnosis, management of the interview, transference and countertransference, and so forth, which reinforces skills acquisition and makes the text easy to use. By creating a text that is aligned with DSM-5 while continuing to stress the importance of eliciting the patient's subjective experience and achieving a therapeutic dialogue, the authors of *The Psychiatric Interview in Clinical Practice* have done a great service to the profession and provided much-needed guidance to mental health clinicians and trainees.

Responsibility 1986

Introduction to Health Care Dakota Mitchell 2016-02-01 INTRODUCTION TO HEALTH CARE, Fourth Edition, provides an easy-to-read introduction to the foundational skills necessary for a range of health care professions. This trusted text offers a comprehensive, yet highly accessible survey of both soft skills and basic clinical skills for those entering health care training programs or considering a career in health care. To prepare you for the realities of modern practice, the authors emphasize core competencies required by all health care professions, including communication, infection control, and professionalism. The text features a strong focus on developing critical thinking skills (thinking like a health care professional) through a five-step problem-solving model that includes assessing a situation, considering alternatives, choosing an appropriate alternative, evaluating the results, and revising as needed. This unique approach makes INTRODUCTION TO HEALTH CARE, Fourth Edition, an ideal resource to help you transition from simple memorization to effective application of professional skills in a real-world setting.
