Therapist Multiple Choice (TMC) Exam and Clinical Simulation Exam (CSE). It provides study hints, in-depth content review, and self-assessment questions with rationales to help you retain more information. Two practice exams on an accompanying Evolve website prepare you for the TMC Exam. In addition, twenty-two updated practice clinical simulation scenarios on Evolve offer invaluable CSE prep. Updated content reflects 2020 NBRC Detailed Content Outline and examination matrix so that you know exactly what to expect on the exams and can review each of the areas covered on the matrix. Exam Hints point out commonly tested items to help you determine what to study, how to plan your time, and improve test-taking skills. Special NBRC coding of topics corresponds to every topic covered on the NBRC Detailed Content Outline (DCO) so that you know exactly what to expect on the exams and can easily review each of the areas covered on the DCO. Self-study questions at the end of each chapter include an answer key with rationales to help you analyze areas of strengths and weaknesses in content learned. Additional analysis-type questions account for changes in the testing matrix. Rationales for each question provide feedback for correct and incorrect answers to help you understand why an answer is correct or incorrect and retain information better. Difficulty level codes (recall, application, analysis) for each question included with each NBRC topic to help you prepare for questions in a way that is most appropriate for that type of question (e.g., memorization for recall or synthesis for analysis). Twenty-two clinical simulations align in content and structure with the new 2020 NBRC Clinical Simulation Exam in both study mode and exam mode. In the untimed study mode you can select each scenario individually and choose to receive detailed feedback on the items that were selected, or on all possible items, upon completion. In the exam mode you take all 22 scenarios with a 4-hour time limit and receive feedback after completion. The clinical simulations can be found on the secured Evolve website and accessed by a pin code (access code in book). The software mimics that used on the actual NBRC CSE. Two 160-question versions of the Therapist Multiple Choice (TMC) Exam align in content and structure with the new 2020 NBRC TMC Exam. The untimed study (pretest) version provides immediate feedback on each question with a rationale about the correct and incorrect answers. The timed exam (posttest) version has a 3-hour limit. Feedback, including the correct answer and a rationale for the correct and the incorrect answers, is provided on each question upon completion. Final scores are given in the pretest and posttest versions, and the software for both versions mimics that used on the actual NBRC TMC Exam. The question sequence mixes with each repeated attempt, giving you a unique exam experience each time. This content can be found on the secured Evolve website and accessed by a pin code (access code in book).

Respiratory Care Dean Hess 2020 "RESPIRATORY CARE OVERVIEW--Respiratory therapists, also known as Respiratory Care Practitioners, play an integral role in the care of patients with cardiopulmonary disorders such as: Asthma, Emphysema, Bronchitis, & Lung Cancer. Respiratory therapists evaluate and treat all types of patients, ranging from premature infants whose lungs are not fully developed to elderly people whose lungs are diseased. Respiratory therapists provide temporary relief to patients with chronic asthma or emphysema, as well as emergency care to patients who are victims of a heart attack, stroke, drowning, smoke inhalation and/or severe burns, or shock. RTs work under the supervision of a physician to provide many therapeutic and diagnostic procedures and make recommendations based on these responses. They must also communicate with other members of the health care team, such as nurses and doctors, in order to follow the progress of patients and make the modifications to treatments as necessary"--

Sills 2015-03-16 Find out how and what to review for the all-new 2015 National Board of Respiratory Care (NBRC) Exam with *The Comprehensive Respiratory Therapist's Exam Review, 6th Edition*. It covers every topic in the NBRC Detailed Content Outline, providing study hints, in-depth content review, and self-assessment questions with rationales so you retain more information. Sills' latest review also offers students and practicing respiratory therapists realistic experience with the new Therapist Multiple Choice Exam (TM-CE) through a 140-question TM-CE practice test on its accompanying Evolve website. Self-study questions at the end of each chapter include an answer key with rationales to help you analyze your strengths and weaknesses in content learned. UNIQUE! Exam Hint boxes point out subjects that are frequently tested, helping you study, plan your time, and improve your test-taking skills. Rationales for each question provide feedback for correct and incorrect answers so you understand why an answer is correct or incorrect and retain information better. Difficulty level codes (recall, application, analysis) for each question on Evolve help you prepare for questions in the way that is most appropriate (e.g., memorization for recall or synthesis for analysis). Special NBRC coding of topics corresponds to every topic covered in the NBRC Detailed Content Outline (DCO) so you can easily review each of the testable topics. Secure Evolve website lets you experience the actual NBRC testing

Oxford Desk Reference: Critical Care Carl Waldmann 2008-11-27 Critical care medicine is an evolving speciality in which the amount of available information is growing daily and spread across a myriad of books, journals and websites. This essential guide brings together this information in an easy-to-use format. Up-to-date, relevant, and evidence-based information on the management of the critically ill is combined in one resource, ideal for the use of Intensive Care Units, High Dependency Units, acute medical or surgical wards, Accident and Emergency departments and operating theatres. The book is designed such that each subject will form a self-contained topic in its own right, laid out across two or four pages to facilitate the key aim of rapid and easy access to information. This makes the information included simple to find, read and absorb, so that the book can be consulted in the clinic or ward setting for information on the optimum management of a particular condition. With chapters written by internationally renowned critical care specialists and edited by the three of the leading figures in UK Critical Care, this book should be an essential resource for all critical care physicians.
