Human Resource Management Theory and Research on New Employment Relationships

Dianna L. Stone 2016-10-01 This volume of the series Research in Human Resource Management (HRM) focuses on a number of important issues in HRM and OB including performance appraisal, political skill, gratitude, psychological contracts, the philosophical underpinnings of HRM, pay and compensation messages, and electronic human resource management. For example, the first article by Cleveland and Murphy considers a very controversial issue (i.e., the reasons that organizations are abandoning the use of performance appraisal). The next article by Harris, Ferris, Summers, and Munyon is extremely interesting, and focuses on how composite political skills (e.g., social astuteness, interpersonal influence) helps individuals develop productive work relationships in organizations. The third article by Scandura and Sharif presents a very innovative model of gratitude in organizations, and the authors argue that gratitude is essential for maintaining positive social relations in organizations. The fourth article by Suazo and Stone-Romero provides an extremely comprehensive review of the theory and research on psychological contracts in organizations from 1960-2015. The subsequent article by Bae, Kang and Kim presents a very unique perspective on HRM, and considers the philosophical underpinnings of the field. The sixth article by Murray, Dulebohn, Roehling, and Werling presents a very innovative model to explain the role that organizational messages about changes in pay or compensation systems have on anticipatory pay satisfaction. The final article in the series by Johnson, Thatcher, and Burleson presents a thought-provoking framework for understanding the key role that information technology (IT) plays in the field of HRM. The series should be useful to researchers and doctoral students in the fields of HRM, OB, and Industrial and Organizational Psychology. It should also be relevant for doctoral courses and scientist-practitioners in these fields.

On a Scale Norbert Elliot 2005 Fear and Trembling? Shock and Awe? Which set of statements best describes the emotions surrounding the assessment of writing ability in educational settings? This book - the first historical study of its kind - begins with Harvard University's 1874 requirement that first-year student applicants submit a short composition as part of the admissions process; the book concludes with the College Board's 2005 requirement for an essay to be submitted as part of the new SAT(R) Reasoning Test. Intended for teachers who must prepare students to submit their writing for formal

assessment, administrators who must make critical decisions based on test scores, and policy makers who must allocate resources based on evaluation systems, On a Scale provides a much-needed historical and conceptual background to questions arising from national attention to student writing ability.
