China's International Investment Strategy Julien Chaisse 2019-02-21 Since China adopted its 'open door' policy in 1978, which altered its development strategy from self-sufficiency to active participation in the world market, its goal has remained unchanged: to assist the readjustment of China's economy, to coordinate its modernization programs, and to improve its quality of life. With the 1997 launch of the 'Going Global' policy, an outward focus regarding foreign investment was added, to circumvent trade barriers and improve the competitiveness of Chinese firms. In order to accommodate inward and outward investment, China's participation in the international investment regime has underpinned its efforts to join multilateral investment-related legal instruments and conclude international investment agreements. This collection, compiled by award-winning scholar Professor Julien Chaisse, explores the three distinct tracks of China's investment policy and strategy: bilateral agreements including those with the US and the EU; regional agreements including the Free Trade Area of the Asia Pacific; and global initiatives, spear-headed by China's presidency of the G20 and its 'Belt and Road initiative'. The book's overarching topic is whether these three tracks compete with each other, or whether they complement one another - a question of profound importance for the country's political and economic future and world investment governance.

Science Achievement in the Middle School Years Albert E. Beaton 1996 The Third International Mathematics and Science Study is the largest and most ambitious study ever undertaken by the International Association for the Evaluation of Educational Achievement. Forty-five countries collected data in more than 30 languages. Five grade levels were tested in the two subject areas. This report describes the science achievement of seventh and eighth graders, emphasizing the results from the eighth-grade assessment. Results are presented for the 41 countries that completed all the steps necessary to appear in this report. Singapore was the top performing country at both grade levels, with Colombia, Kuwait, and South Africa performing at the lowest levels. Perhaps the most striking finding was the large difference in average achievement between the top-performing and bottom-performing countries. Results provided a chain of overlapping countries, with most countries having an average achievement similar to that of a cluster of others, but with large differences between the top and bottom of the chain. In most countries and internationally, boys outperformed girls at both grade levels. The majority of eighth graders in nearly every country indicated that they liked science, but not all students had positive feelings about the subject. Home factors were strongly related to achievement in every participating country, but relationships between science achievement and instructional practices were less clear within and across countries. Six appendixes present information on study methodology and selected achievement results for some countries. (Contains 61 tables, 23 appendix tables, 19 figures, and 1 appendix figure.) (SLD)

Das Recht vor den Herausforderungen neuer Technologien Kazushige Asada 2006
English summary: This volume contains articles written by Japanese and German legal scholars on aspects of the development and use of new technologies - above all biotechnology, genetic engineering and the new electronic media. The authors paint a multi-faceted picture of the law's function, which eclipses national characteristics in the development and use of new technologies. German description: Im Juli 2004 beschäftigten sich japanische und deutsche Juristen in Tübingen mit dem Thema Das Recht vor den Herausforderungen neuer Technologien. Im Mittelpunkt des Symposiums stand die Frage, inwieweit unterschiedlichen institutionellen und kulturellen Rahmenbedingungen verhaftete Rechtssysteme wie die Deutschlands und Japans konvergierende Muster und Werte zur rechtlichen Regelung und Steuerung in Bezug auf die Entwicklung und die Nutzung neuer Technologien herausgebildet haben. Herkömmlicher Disziplinentrennung folgend, wurde dabei zwischen zivil- und wirtschaftsrechtlichen, öffentlichrechtlichen und strafrechtlichen Aspekten der Entwicklung und Nutzung neuer Technologien - unter diesen vor allem der Bio- und Gentechnologie und der neuen elektronischen Medien - unterschieden. Dieser Band versammelt die auf dem Symposium gehaltenen, gründlich überarbeiteten Vorträge der japanischen und deutschen Referenten. Zusammen genommen zeichnen die Beiträge ein facettenreiches Bild von der doppelten, nationale Besonderheiten überlagernden Funktion des Rechts bei der Entwicklung und dem Einsatz neuer Technologien: einerseits ist diesen (unter Beachtung historisch gewachsener und geschützter Rechtsgüter und Interessen) eine Grenze zu ziehen, andererseits sind sie als Instrumente sowohl des nationalen und internationalen Wettbewerbs als auch des zivilisatorischen Fortschritts zu stimulieren und zu fordern.

Carbon Pricing: What Role for Border Carbon Adjustments? Ian W.H. Parry 2021-09-27

This Climate Note discusses the rationale, design, and impacts of border carbon adjustments (BCAs), charges on embodied carbon in imports potentially matched by rebates for embodied carbon in exports. Large disparities in carbon pricing between countries is raising concerns about competitiveness and emissions leakage, and BCAs are a potentially effective instrument for addressing such concerns. Design details are critical, however. For example, limiting coverage of the BCA to energy-intensive, trade-exposed industries facilitates administration, and initially benchmarking BCAs on domestic emissions intensities would help ease the transition for emissions-intensive trading partners. It is also important to consider how to apply BCAs across countries with different approaches to emissions mitigation. BCAs are challenging because they pose legal risks and may be at odds with the differentiated responsibilities of developing countries. Furthermore, BCAs provide only modest incentives for other large emitting countries to scale carbon pricing—an international carbon price floor would be far more effective in this regard.

Criminal Justice Policy and Planning Wayne N. Welsh 2016-03-31 Unlike other textbooks on the subject, *Criminal Justice Policy and Planning: Planned Change, Fifth Edition*, presents a comprehensive and structured account of the process of administering planned change in the criminal justice system. Welsh and Harris detail a simple yet sophisticated seven-stage model, which offers students and practitioners a full account of program and policy development from beginning to end. The authors thoughtfully discuss the steps: analyzing a problem; setting goals and objectives; designing the program or policy; action planning; implementing and monitoring; evaluating outcomes; and reassessing and reviewing. Within these steps, students focus on performing essential procedures, such as conducting a systems analysis, specifying an impact model, identifying target populations, making cost projections, collecting monitoring data, and performing evaluations. In reviewing these steps and procedures, students can develop a full appreciation for the challenges inherent in the process and understand the tools that they require to meet those challenges. To provide for a greater understanding of the material, the text uses a wide array of real-life case studies and examples of programs and policies. Examples include policies such as Restorative Justice, Justice Reinvestment, Stop-and-Frisk, and the Brady Act, and programs such as drug courts, community-based violence prevention, and halfway houses. By examining the successes and failures of various innovations, the authors demonstrate both the ability of rational planning to make successful improvements and the tendency of unplanned change to result in undesirable outcomes. The result is a powerful argument for the use of logic, deliberation, and collaboration in criminal justice innovations.

Linking Global Trade and Human Rights Daniel Drache 2014-03-20 "The concept of policy space is critical to understanding the impact of globalization on public policy in the twenty-first century. For the purposes of this book, a policy space is an arena where national governments have the freedom and capacity to design and implement public policies of their own choosing (Grindle & Thomas, 1991; Koivusalo et. al., 2010). In market economies, policy spaces reflect the insight that certain realms of public life should be governed by collective decision making designed to advance the public interest whereas in other realms markets reign (Drache, 2001). The spatial metaphor expresses, in other words, the claim that there are certain sites where government action has legitimacy. Ultimately, national policy spaces matter because

they provide opportunities for governments to be innovative in the development of public policy on these sites, especially in terms of advancing social justice goals (Jacobs, 2004). The unifying theme of this book is that there are major reconfigurations of social and economic policy spaces for national governments on the international landscape during the hard economic times that follow global financial crises. After the 2008 financial crisis, state action extended into new areas and was being deployed in new and innovative ways from the Cash for Clunkers program in the US to successful anti-poverty programs in Brazil. In India the national Rural Employment Scheme to guarantee a minimum number of paid hours annually to hundreds of millions of its poorest is the largest social welfare scheme in the world"--

Business Model Generation Alexander Osterwalder 2013-02-01 Business Model Generation is a handbook for visionaries, game changers, and challengers striving to defy outmoded business models and design tomorrow's enterprises. If your organization needs to adapt to harsh new realities, but you don't yet have a strategy that will get you out in front of your competitors, you need Business Model Generation. Co-created by 470 "Business Model Canvas" practitioners from 45 countries, the book features a beautiful, highly visual, 4-color design that takes powerful strategic ideas and tools, and makes them easy to implement in your organization. It explains the most common Business Model patterns, based on concepts from leading business thinkers, and helps you reinterpret them for your own context. You will learn how to systematically understand, design, and implement a game-changing business model--or analyze and renovate an old one. Along the way, you'll understand at a much deeper level your customers, distribution channels, partners, revenue streams, costs, and your core value proposition. Business Model Generation features practical innovation techniques used today by leading consultants and companies worldwide, including 3M, Ericsson, Capgemini, Deloitte, and others. Designed for doers, it is for those ready to abandon outmoded thinking and embrace new models of value creation: for executives, consultants, entrepreneurs, and leaders of all organizations. If you're ready to change the rules, you belong to "the business model generation!"

Trans-Pacific Partnership Agreement Abhijit Das 2017-11-27 Despite the United States withdrawing from the Trans-Pacific Partnership (TPP) Agreement, its template of rules remains highly relevant for future negotiations on international trade. This book helps to evaluate the legal provisions of this pact, its background and its possible evolutionary path. There is a view in the policy discourse that India should actively embrace the norms contained in the Agreement. *Trans-Pacific Partnership Agreement: A Framework for Future Trade Rules?* offers a balanced and objective analysis of the likely impact of the TPP template of rules on developing countries such as India and significantly contributes to the ongoing debate regarding India's ideal stance. This book will be useful for policymakers, trade lawyers, policy analysts, academics, economists and government officials, especially those from developing countries.

Project Planning, Scheduling, and Control in Construction Calin M. Popescu 1995-03-20 Critical Path Method (CPM) and Performance Evaluation and Review Technique (PERT) are widely recognized as the most effective methods of keeping large, complex construction projects

onschedule, under budget, and up to professional standards. But these methods remain underused because they are poorly understood and, due to a host of unfamiliar terms and applications, may seem more complicated than they really are. This encyclopedia brings together, in one comprehensive volume, all terms, definitions, and applications related to the time and cost management of construction projects. While many of these terms refer to ancient and venerable building practices, others have evolved quite recently and refer specifically to modern construction and management techniques. Sources include hundreds of professional books, trade journals, and research publications, as well as planning and scheduling software vendor literature. The detailed glossary of all applicable terms includes a cross-referenced listing of examples that describe real-world applications for each term supplied. An extensive bibliography covers all applicable books, articles, and periodicals available on project planning, scheduling, and control using CPM and related subjects. This book is an important quick reference and desktop information resource for construction planners, schedulers, and controllers, as well as civil engineers and project managers. It is also the ultimate research tool for educators, students, or anyone who seeks to improve their understanding of the management of modern construction projects.

Intellectual Property Rights in a Fair World Trade System Annette Kur 2011-01-01
Intellectual Property law (IP) - particularly in relation to international trade regimes - is increasingly finding itself challenged by rapid developments in the technological and global economic landscapes. In its attempt to maintain a responsive legislative system that is interacting successfully with global trade rules, IP is having to respond to an increasing number of actors on an international level. This book examines the problems associated with this undertaking as well as suggesting possible revisions to the TRIPS agreement that would make it more relevant to the environment in which today's IP mechanisms are operating. The overall aim is to find an adequate response to the 'IP balance dilemma'. The theme is pursued throughout various topics, including a look at what this means in relation to economy in a country like China, and also considering how IP is increasingly having to reconcile itself with human rights issues.

ASFA Advisory Board Meeting, UMT, Terengganu, Malaysia, 22-26 September 2019 Food and Agriculture Organization of the United Nations 2020-01-09 The 47th bi-annual Meeting of the Aquatic Sciences and Fisheries Abstracts (ASFA) Advisory Board was hosted by the University of Malaysia Terengganu and took place from 22 to 26 September 2019 in Terengganu, Malaysia. The Meeting was attended by 34 participants from: 21 National ASFA Partners, 1 UN ASFA Partner, 2 International ASFA Partners, 2 Collaborating Centres and the ASFA Publishing Partner. This meeting was a key milestone in gearing the ASFA transition towards a new business model, with many changes already proceeding. Partners showed support for ASFA's future direction and plans, and committed to contributing their skills, expertise and time as far as their capacities allow. A number of major changes were approved by Partners, including a new Publishing Agreement and new FAO project to administer the ASFA Trust Fund. Overall, the progress made at the meeting ensures ASFA is on track to adopt its new Business Model by the end of its 50th Anniversary year (2021). This contains the Minutes of the meeting and the working documents (Annexes 1-19).

Mega-Regional Trade Agreements Thilo Rensmann 2017-07-20 This book provides an in-depth analysis of "Mega-Regionals", the new generation of trans-regional free-trade agreements (FTAs) currently under negotiation, and their effect on the future of international economic law. The main focus centres on the EU-US Transatlantic Trade and Investment Partnership (TTIP), the Trans-Pacific Partnership (TPP) and the EU-Canada Comprehensive Economic and Trade Agreement (CETA), but the findings are also applicable to similar agreements under negotiation, such as the Regional Comprehensive Economic Partnership (RCEP). The specific features of Mega-Regional Trade Agreements raise a number of issues with respect to their potential effect on the current system of international trade and investment law. These include the consequences of Mega-Regionals for the most-favoured-nation (MFN) principle, their relation to the multilateral system of the World Trade Organization (WTO), their democratic legitimacy and their interaction with existing bilateral investment treaties (BITs). The book is intended for academics and practitioners working in the field of international economic law.

Should Core Labor Standards Be Imposed Through International Trade Policy? Keith Eugene Maskus 1999 August 1997 Weak provision of core labor standards in developing countries has complex effects on competitiveness and trade. The problem cannot be treated effectively by imposing trade sanctions, but should instead be approached through programs aimed directly at poverty reduction, education reforms, and disclosure of information. Numerous proposals have surfaced recently to incorporate a clause about labor standards in the rules of the World Trade Organization (WTO). Such a clause would require each WTO member to recognize and enforce certain core labor standards: forbidding forced labor, discrimination, and the exploitation of child workers and guaranteeing the rights of workers to associate freely and engage in collective bargaining with employers. Failure to provide core labor standards would subject a country to international trade sanctions. Maskus analyzes links between core labor standards and international trade policy. He develops a series of simple models to see whether limiting core labor standards in export sectors of developing countries can improve the countries' price competitiveness in export markets. He concludes that deficient provision of

core labor standards generally diminishes export competitiveness rather than improving it, because of the distortionary effects of those deficiencies. In other words, concerns about the negative impact on industrial countries of limited wage, employment, and labor standards in developing countries are largely misplaced- one exception: exploiting child labor could expand exports in highly labor-intensive sectors. But wage spillovers into industrial economy labor markets must be trivial, and there is no empirical evidence that the use of child labor provides measurable competitive advantages. Do international trade sanctions serve a legitimate, effective role in penalizing countries that fail to observe core labor standards? Maskus points out that trade restrictions are blunt, indirect instruments and may be counterproductive, harming the people they are designed to help and ineffective in achieving stated goals. Thus, including in WTO rules a social clause guaranteeing core labor standards would reduce global efficiency for a small gain. Some approaches- compensation programs from wealthy countries, focused on poverty reduction and better access to education- be more effective and less costly than trade restrictions. At the same time, the International Labor Organization could improve its monitoring and publicity efforts, to raise international consciousness about labor standards. This paper-a product of the Development Research Group-is part of a larger effort in the group to analyze trade barriers facing developing countries.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
