Social Origins of Educational Systems Margaret S. Archer 2013-03-05 First published in 1979, this now classic text presents a major study of the development of educational systems, focusing in detail on those of England, Denmark, France, and Russia - chosen because of their present educational differences and the historical diversity of their cultures and social structures. Professor Archer goes on to provide a theoretical framework which accounts for the major characteristics of national education and the principal changes that such systems have undergone. Now with a new introduction, Social Origins of Educational Systems is vital reading for all those interested in the sociology of education. Previously published reviews: 'A large-scale masterly study, this book is the most important contribution to the sociology of education since the second world war as well as being a substantial contribution to the consolidation of sociology itself.' - The Economist 'I cannot improve on her own statement of what she is trying to do: 'The sociological contribution consists in providing a theoretical account of macroscopic patterns of change in terms of the structural and cultural factors which produce and sustain them'...Unquestionably, this book is an impressive work of scholarship, well planned conceptually and uniting its theoretical base with a set of four thoroughly and interestingly researched case-studies of the history of the educational systems of Denmark, England, France and Russia.' - British Journal of the Sociology of Education 'This magnificent treatise seriously explores many of the most recalcitrant questions about institutional systems.' - Journal of Curriculum Studies 'A gargantuan and impressive socio-historical enterprise.' - Encounter '...a major achievement.' - New Society

Collected Poems Federico García Lorca 2018-08-14 A revised edition of this major writer's complete poetical work And I who was walking with the earth at my waist, saw two snowy eagles and a naked girl. The one was the other and the girl was neither. -from "Qasida of the Dark Doves" Federico García Lorca was the most beloved poet of twentieth-century Spain and one of the world's most influential modernist writers. His work has long been admired for its passionate urgency and haunting evocation of sorrow and loss. Perhaps more persistently than any writer of his time, he sought to understand and accommodate the numinous sources of his inspiration. Though he died at age thirty-eight, he left behind a generous body of poetry, drama, musical arrangements, and drawings, which continue to surprise and inspire. Christopher Maurer, a leading García Lorca scholar and editor, has brought together new and substantially revised translations by twelve poets and translators, placed side by side with the Spanish originals. The seminal volume *Poet in New York* is also included here in its entirety. This is the most comprehensive collection in English of a poet who—as Maurer writes in his illuminating introduction—"spoke unforgettably of all that most interests us: the otherness of nature, the demons of personal identity and artistic creation, sex, childhood, and death."

Blason poétique Alison Saunders 1981 This book - the first full-length study of the blason poétique examines the evolution of this French genre in the course of the sixteenth century, but also traces its earliest heraldic origins and indicates its subsequent development into the seventeenth century. The blason is treated in general but attention is concentrated particularly upon the anatomical blasons and contreblassons written by Clément Marot and his contemporaries in the 1530s and 1540s with a

reevaluation of their chronology in the light of hitherto «lost» editions, and an examination of the poems themselves and their debt both to the native French tradition and to Italian influences. Parallels are traced with contemporary illustrated verse, and the study attempts to demonstrate how - far from being an ephemeral eccentricity - the genre fits into the overall pattern of sixteenth-century French verse.

Ekphrasis, Imagination and Persuasion in Ancient Rhetorical Theory and Practice Ruth Webb 2016-04-29

This is a study of ekphrasis, the art of making listeners and readers 'see' in their imagination through words alone, as taught in ancient rhetorical schools and as used by Greek writers of the Imperial period (2nd-6th centuries CE). The author places the practice of ekphrasis within its cultural context, emphasizing the importance of the visual imagination in ancient responses to rhetoric, poetry and historiography. By linking the theoretical writings on ekphrasis with ancient theories of imagination, emotion and language, she brings out the persuasive and emotive function of vivid language in the literature of the period. This study also addresses the contrast between the ancient and the modern definitions of the term ekphrasis, underlining the different concepts of language, literature and reader response that distinguish the ancient from the modern approach. In order to explain the ancient understanding of ekphrasis and its place within the larger system of rhetorical training, the study includes a full analysis of the ancient technical sources (rhetorical handbooks, commentaries) which aims to make these accessible to non-specialists. The concluding chapter moves away from rhetorical theory to consider the problems and challenges involved in 'turning listeners into spectators' with a particular focus on the role of ekphrasis within ancient fiction. Attention is also paid to texts that lie at the intersection of the modern and ancient definitions of ekphrasis, such as Philostratos' *Imagines* and the many ekphraseis of buildings and monuments to be found in Late Antique literature.

Women's Writing in Italy, 1400–1650 Virginia Cox 2008-06-16 Winner, 2009 Best Book Award, Society for the Study of Early Modern Women Winner, 2008 PROSE Award for Best Book in Language, Literature, and Linguistics. Professional and Scholarly Publishing Division of the Association of American Publishers This is the first comprehensive study of the remarkably rich tradition of women's writing that flourished in Italy between the fifteenth and early seventeenth centuries. Virginia Cox documents this tradition and both explains its character and scope and offers a new hypothesis on the reasons for its emergence and decline. Cox combines fresh scholarship with a revisionist argument that overturns existing historical paradigms for the chronology of early modern Italian women's writing and questions the historiographical commonplace that the tradition was brought to an end by the Counter Reformation. Using a comparative analysis of women's activities as artists, musicians, composers, and actresses, Cox locates women's writing in its broader contexts and considers how gender reflects and reinvents conventional narratives of literary change.

Capability, Belonging and Equity in Higher Education Professor Penny Jane Burke 2016-02-25 Student equity in higher education is often framed by constructions of capability that imply that intelligence, potential and ability is innate. The assumption that underpins many national widening participation agendas, namely that all students with the potential to benefit from higher education should have fair access to higher education regardless of social background, is problematic (Archer & Leathwood 2003). The problem rests in the suggestion that 'potential' to benefit from higher education is an attribute that can be straightforwardly identified in order to ensure fair access. It also implies that potential to benefit from higher education is about natural talent, ability and/or intelligence and is detached from social, cultural and educational dis/advantage and inequalities (Morley & Lugg 2009, p. 41). This mixed methods project draws on extant data from a 2014 pilot study examining students' beliefs about ability, intelligence and how this is related to levels of confidence. The extant data was generated through a survey instrument drawing on the work of Carol Dweck (2000; 2013). As part of the National Centre for Student Equity in Higher Education (NCSEHE) funded study, further qualitative data were generated. In total, 772 students were surveyed, 41 students took part in either focus groups or in-depth interviews and 19 university lecturers participated in focus groups or were individually interviewed. The aim of the project was to: * explore and identify the different meanings attached to 'capability' in particular contexts (such as subject or course); * consider the ways these meanings shape the experiences, practices and sense of belonging of students from non-traditional backgrounds; and * help improve the educational opportunities and completion rates for university students from non-traditional (non-ATAR) and other

Advances in the Analysis of Spanish Exclamatives Ignacio Bosque 2017-02-08 *Advances in the Analysis of Spanish Exclamatives* is the first book entirely devoted to Spanish exclamatives, a special sentence type often overlooked by contemporary linguists and neglected in standard grammatical descriptions. The

seven essays in this volume, each by a leading specialist on the topic, scrutinize the syntax--as well as the semantic and pragmatic aspects--of exclamations on theoretical grounds. The book begins by summarizing, commenting on, and evaluating previous descriptive and theoretical contributions on Spanish exclamatives. This introductory overview also contains a detailed classification of Spanish exclamative grammatical types, along with an analysis of their main properties. Special attention is devoted in the book throughout to the syntactic structures displayed by exclamative patterns; the differences between exclamations and other speech acts (specifically questions and imperatives); the peculiar semantic denotation of exclamative words and their relationship to quantifiers denoting high degree; the semantics of adjectives and adverbs expressing extreme evaluation; the form and interpretation of negated and embedded exclamatives; the properties of optative utterances; and the different ways in which expressive contents are related to unexpected reactions of the speaker, as well as possible knowledge shared by interlocutors. This groundbreaking volume provides a complete and accurate picture of Spanish exclamation by integrating its numerous component parts.
