**The Darker Side of the Renaissance** Walter Mignolo 2003 An exploration of the role of the book, the map, and the European concept of literacy in the conquest of the New World

Science and Politics Jean Jacques Salomon 1973

The Barbarians Alessandro Baricco 2014-01-07 From one of Italy's most respected literary voices, a manifesto on the state of global culture and how connectivity is changing the way we experience it. For the gatekeepers of traditional high culture, the rise of young ambitious outsiders has indeed seemed like nothing short of a barbarian invasion. In this concise and powerful manifesto, Alessandro Baricco explores a handful of realms that have been "plundered"-wine, soccer, music, and books-and extrapolates that it is not a case of old values against new but a widespread mutation that we are all part of, leading toward a different way of having experiences and creating meaning.

**The Powers of Literacy (RLE Edu I)** Bill Cope 2014-06-17 Literacy remains a contentious and polarized educational, media and political issue. What has emerged from the continuing debate is a recognition that literacy in education is allied closely with matters of language and culture, ideology and discourse, knowledge and power. Drawing perspectives variously from critical social theory and cultural studies, poststructuralism and feminisms, sociolinguistics and the ethnography of communication, social history and comparative education, the contributors begin a critical interrogation of taken-for-granted assumptions which have guided educational policy, research and practice.

**El español, lengua pluricéntrica** Sebastian Greußlich 2019-12-09 Fragen der Norm wurden für das Spanische bis weit ins 20. Jahrhundert ausschließlich von der Real Academia Española geklärt. Unter den Vorzeichen der Globalisierung und der sich immer stärker etablierenden Konzeption der Plurizentrik teilt die Sprachakademie diese Rolle zunehmend mit neuen Akteuren. Neben den Akademien in Spanischamerika treten vor allem die Massenmedien auf dem Feld der spanischen Sprachkultur in Erscheinung. In Fragen praktischer Sprachkodifikation kooperieren sie systematisch mit den Sprachakademien, zugleich aber fordern sie diese heraus, indem sie den Sprachgebrauch der Hispanophonie jenseits von Sprachpolitik und Didaktik mit eigenen, massenkommunikativ vermittelten Normen prägen. Die Beiträge des Bandes beleuchten diesen Zusammenhang empirisch. Las cuestiones referentes a la norma del español, hasta bien entrado el siglo XX, se han resuelto exclusivamente en el seno de la Real Academia Española. Bajo los auspicios de la globalización y del pluricentrismo lingüístico, la Academia de la Lengua va compartiendo esta función con nuevos actores. Aparte de las Academias hispanoamericanas, estos son ante todo los medios de comunicación masiva. En la práctica de la codificación lingüística, dichos medios colaboran sistemáticamente con las Academias de la Lengua; al mismo tiempo que las desafían marcando el uso de la lengua mediante sus normas propias, más allá de la política lingüística y la enseñanza de la lengua. Las contribuciones reunidas en este volumen abren perspectivas teóricas, ideológicas y empíricas sobre este fenómeno.

**The Language of New Media** Lev Manovich 2002-02-22 A stimulating, eclectic account of new media that finds its origins in old media, particularly the cinema. In this book Lev Manovich offers the first systematic and rigorous theory of new media. He places new media within the histories of visual and media cultures of the last few centuries. He discusses new media's reliance on conventions of old media, such as the rectangular frame and mobile camera, and shows how new media works create the illusion of reality, address the viewer, and represent space. He also analyzes categories and forms unique to new media, such as interface and database. Manovich uses concepts from film theory, art history, literary theory, and computer science and also develops new theoretical constructs, such as cultural interface, spatial montage, and cinegratography. The theory and history of cinema play a particularly important role in the book. Among other topics, Manovich discusses parallels between the histories of cinema and of new media, digital cinema, screen and montage in cinema and in new media, and historical ties between avant-garde film and new media.

**Refiguring Life** Evelyn Fox Keller 1995 Refiguring Life begins with the history of genetics and embryology, showing how discipline-based metaphors have directed scientists' search for evidence. Keller continues with an exploration of the border traffic between biology and physics, focusing on the question of life and the law of increasing entropy. In a final section she traces the impact of new metaphors, born of the computer revolution, on the course of biological research. Keller shows how these metaphors began as objects of contestation between competing visions of the life sciences, how they came to be recast and appropriated by already established research agendas, and how in the process they ultimately came to subvert those same agendas. Refiguring Life explains how the metaphors and machinery of research are not merely the products of scientific discovery but actually work together to map out the territory along which new metaphors and machines can be constructed. Through their dynamic interaction, Keller points out, they define the realm of the possible in science. Drawing on a remarkable spectrum of theoretical work ranging from Schroedinger to French psychoanalyst Jacques Lacan, Refiguring Life fuses issues already prominent in the humanities and social sciences with those in the physical and natural sciences, transgressing disciplinary boundaries to offer a broad view of the natural sciences as a whole. Moving gracefully from genetics to embryology, from physics to biology, from cyberscience to molecular biology, Evelyn Fox Keller demonstrates that scientific inquiry cannot pretend to stand apart from the issues and concerns of the larger society in which it exists.

*What the Best College Teachers Do* Ken Bain 2011-09-01 Winner of the Virginia and Warren Stone Prize awarded annually by Harvard University Press for an outstanding book on education and society What makes a great teacher great? Who are the professors students remember long after graduation? This book, the conclusion of a fifteen-year study of nearly one hundred college teachers in a wide variety of fields and universities, offers valuable answers for all educators. The short answer is—it's not what teachers do, it's what they understand. Lesson plans and lecture notes matter less than the special way teachers comprehend the subject and value human learning. Whether historians or physicists, in El Paso or St. Paul, the best teachers know their subjects inside and out—but they also know how to engage and challenge students and to provoke impassioned responses. Most of all, they believe two things fervently: that teaching matters and that students can learn.

**Experience And Education** John Dewey 2007-11-01 Experience and Education is the best concise statement on education ever published by John Dewey, the man acknowledged to be the pre-eminent educational theorist of the twentieth century. Written more than two decades after Democracy and Education (Dewey's most comprehensive statement of his position in educational philosophy), this book demonstrates how Dewey reformulated his ideas as a result of his intervening experience with the progressive schools and in the light of the criticisms his theories had received. Analyzing both "traditional" and "progressive" education, Dr. Dewey here insists that neither the old nor the new education is adequate and that each is miseducative because neither of them applies the principles of a carefully developed philosophy of experience. Many pages of this volume illustrate Dr. Dewey's ideas for a philosophy of experience and its relation to education. He particularly urges that all teachers and educators looking for a new movement in education should think in terms of the deeped and larger issues of education rather than in terms of some divisive "ism" about education, even such an "ism" as "progressivism." His philosophy, here expressed in its most essential, most readable form, predicates an American educational system that respects all sources of experience, on that offers a true learning situation that is both historical and social, both orderly and dynamic.

White on Black Jan Nederveen Pieterse 1992-01-01 White on Black is a compelling visual history of the development of European and American stereotypes of black people over the last two hundred years. Its purpose is to show the pervasiveness of prejudice against blacks throughout the western world as expressed in stock-in-trade racist imagery and caricature. Reproducing a wide range of illustrations--from engravings and lithographs to advertisements, candy wrappings, biscuit tins, dolls, posters, and comic strips--the book challenges the hidden assumptions of even those who view themselves as unprejudiced. Jan Nederveen Pieterse sets Western images of Africa and blacks in a chronological framework, including representations from medieval times, from the colonial period with its explorers, settlers, and missionaries, from the era of slavery and abolition, and from the multicultural societies of the present day. Pieterse shows that blacks have been routinely depicted throughout the West as servants, entertainers, and athletes, and that particular countries have developed their own comforting black stereotypes about blacks: Sambo and Uncle Tom in the United States, Golliwog in Britain, Bamboula in France, and Black Peter in the Netherlands. Looking at conventional portrayals of blacks in the nursery, in sexual arenas, and in commerce and advertising, Pieterse analyzes the conceptual roots of the stereotypes about them. The images that he presents have a direct and dramatic impact, and they raise questions about the expression of power within popular culture and the force of caricature, humor, and parody as instruments of oppression.

*Past and Present of the Verbs to Read and to Write* Emilia Ferreiro 2003 "Emilia Ferreiro is one of the great thinkers in the Americas on the issues surrounding literacy. Three of her most important lectures are presented in this book. Her views have changed the systems of education in her own country, Mexico, and have had a radical impact on education in Brazil, where she is the recipient of the country's highest distinction. Her ideas have ideological and political implications for policies regarding publishing (including the publishing of textbooks), access to books and the development of readers all over the world." "Although poor countries have not overcome illiteracy, rich countries are finding that a basic education does not guarantee fully functional readers. While some of us are fluent in the language of hypertext, e-mail and the virtual pages of non-existent books, there are others who have not mastered newspapers or books." "If democracy is incompatible with an illiterate citizenry, full democracy requires an ability to read that goes beyond the deciphering of words. This ability is the right of children who will grow up as free citizens in a world where linguistic and cultural diversity are as important as biodiversity."--BOOK JACKET.

**Un Elefante Ocupa Mucho Espacio** Elsa Bornemann 2004-06-01

Comparative Education Research Mark Bray 2014-06-09 Approaches and methods in comparative education are of obvious importance, but do not always receive adequate attention. This second edition of a well-received book, containing thoroughly updated and additional material, contributes new insights within the longstanding traditions of the field. A particular feature is the focus on different units of analysis. Individual chapters compare places, systems, times, cultures, values, policies, curricula and other units. These chapters are contextualised within broader analytical frameworks which identify the purposes and strengths of the field. The book includes a focus on intra-national as well as cross-national comparisons, and highlights the value of approaching themes from different angles. As already demonstrated by the first edition of the book, the work will be of great value not only to producers of comparative education research but also to users who wish to understand more thoroughly the parameters and value of the field.

Mathematics Education and Technology-Rethinking the Terrain Celia Hoyles 2009-10-09 Mathematics Education and Technology-Rethinking the Terrain revisits the important 1985 ICMI Study on the influence of computers and informatics on mathematics and its teaching. The focus of this book, resulting from the seventeenth Study led by ICMI, is the use of digital technologies in mathematics teaching and learning in countries across the world. Specifically, it focuses on cultural diversity and how this diversity impinges on the use of digital technologies in mathematics teaching and learning. Within this focus, themes such as mathematics and mathematical practices; learning and assessing mathematics with and through digital technologies; teachers and teaching; design of learning environments and curricula; implementation of curricula and classroom practice; access, equity and socio-cultural issues; and connectivity and virtual networks for learning, serve to organize the study and bring it coherence. Providing a state-of-the-art view of the domain with regards to research, innovating practices and technological development, Mathematics Education and Technology-Rethinking the Terrain is of interest to researchers and all those interested in the role that digital technology plays in mathematics education.
