**Creating the Built Environment** Leslie Holes 2003-09-02 We spend most of our lives in buildings and almost every building is unique. The purpose of this book is to explain what buildings are and to provide an integrated overview of how they are built and sustained. The book does not presume any specialist knowledge of buildings, seeking instead to explain why the different groups involved in designing, constructing, managing and occupying them follow certain procedures. It is particularly concerned with the generation and circulation of information between these groups. In taking this view, the book considers the recommendations of Sir Michael Latham's 1994 report *Constructing the Team* which called for better cohesion and communication between specialists in the construction industry.

**Magna Carta and Its Gifts to Canada** Carolyn Harris 2015-05-02 A deep and gorgeous study of the Magna Carta and how it still influences our world. The year 2015 marks the 800th anniversary of the Magna Carta, the Great Charter imposed on King John by his barons in the thirteenth century to ensure he upheld traditional customs of the nobility. Though it began as a safeguard of the aristocracy, over the past 800 years, the Magna Carta has become a cornerstone of democratic ideals for all. After centuries of obscurity, the Magna Carta was rediscovered in the seventeenth century, and has informed numerous documents upholding human rights, including the American Declaration of Independence, the French Declaration of the Rights of Man, and the United Nations' Universal Declaration of Human Rights. For Canadians, it has informed key documents from the Royal Proclamation of 1763 that shaped the then-British Colonies and their relations with First Nations, to the Charter of Rights and Freedoms. This book complements the 2015 Magna Carta Canada exhibition of the Durham Cathedral Magna Carta and Charter of the Forest.

A Parents' Guide to Music Lessons The Open The Open Courses Library 2019-11-21 A Parents' Guide to Music Lessons Introducing children to music, like introducing them to reading, should not wait for formal classes to start. Just as you read to your very young children, you should sing to them (whether you consider yourself a decent singer or not), dance with them, teach them singing games like "Ring Around the Rosy", and share with them the music that you like. Exposing them to classical music, using the many videos, books, and tapes available, can't hurt, either, but at a very young age they will be most engaged by what engages you. In some communities, there are parent/child group classes that introduce children to the basic concepts of music. To find out what's available in your area, check with any group that organizes extra-curricular activities for young children. This may be your local park district, YMCA, public library, music academy, community college, or local university. The emphasis at a very young age should be on how fun music is. Chapter Outline: A Parents' Guide to Music Lessons Home Music Practice Checklists A Guide to Great Home Music Practice Stage Fright and the Young Instrumentalist The Open Courses Library introduces you to the best Open Source Courses.

Constructionalization and Constructional Changes Elizabeth Closs Traugott 2013-11 This book develops an approach to language change based on construction grammar in order to reconceptualize grammaticalization and lexicalization. The authors show that language change proceeds by micro-steps involving every aspect of

grammar including pragmatics and discourse functions. A new and productive approach to historical linguistics.

*Photovoltaic Water Pumping Systems* Tamer Khatib 2020-11-23 Photovoltaic Water Pumping Systems: Concept, Design and Methods of Optimization looks at the potential of effectively designed PVPS and how they can be commercially efficient and economically competitive to grid connected or diesel generator (DG) based pumping systems. The low energy conversion efficiency of PV modules, nonlinearity of PV module/array I-V characteristics and the unique maximum power operation point are major challenges of this technology, this book provides readers with design and optimization methods, codes and critical analysis of the recent developments in PV pumping systems. Focusing on system feasibility and suitable applications with design procedures, this reference presents a critical analysis of PVPS field performance, modeling and control strategies using artificial intelligence techniques. A suitable text for researchers, engineers and graduate students who are working in the field of photovoltaics and pumping and systems. Uses open source Matlab codes for PV pumping system optimization Provides global cases studies and design examples for comparison Includes a data source sheet for proposed systems for successful implementation methods

**The Rejection of Consequentialism** Samuel Scheffler 1994-08-11 In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

*The Universal Enemy* Darryl Li 2019-12-10 No contemporary figure is more demonized than the Islamist foreign fighter who wages jihad around the world. Spreading violence, disregarding national borders, and rejecting secular norms, so-called jihadists seem opposed to universalism itself. In a radical departure from conventional wisdom on the topic, *The Universal Enemy* argues that transnational jihadists are engaged in their own form of universalism: these fighters struggle to realize an Islamist vision directed at all of humanity, transcending racial and cultural difference. Anthropologist and attorney Darryl Li reconceptualizes jihad as armed transnational solidarity under conditions of American empire, revisiting a pivotal moment after the Cold War when ethnic cleansing in the Balkans dominated global headlines. Muslim volunteers came from distant lands to fight in Bosnia-Herzegovina alongside their co-religionists, offering themselves as an alternative to the US-led international community. Li highlights the parallels and overlaps between transnational jihads and other universalisms such as the War on Terror, United Nations peacekeeping, and socialist Non-Alignment. Developed from more than a decade of research with former fighters in a half-dozen countries, *The Universal Enemy* explores the relationship between jihad and American empire to shed critical light on both.

*How Words Change Meaning* Antoine Meillet 2018-12-05 The language has for first condition the existence of human societies which it is his side constantly used and essential instrument; except historical accident, the limits of the various languages tend to coincide with those of social groups called nations; the lack of unity of language is the sign of a recent State, as in Belgium, or artificially constituted, as in Austria. The language is so eminently a social fact. Indeed, it exactly fits the definition proposed Durkheim; a language exists independently of the individuals who speak it, and although it has no reality outside the sum of these individuals, it is however, due to its generality, external to each of them; which shows, is that it does not depend on any of them to change and deviation individual usage causes a reaction. This reaction has no more often than other sanction than the ridicule to which she exposes the man who does not like everyone else. But in modern civilized States, she goes up to exclude public jobs, by reviews, those who do not comply with the use allowed by a given social group. The characters of exteriority to the individual and coercion by which Durkheim defined the social fact appear in the language with the last evidence.

**Writing History as a Prophet** Elisabeth Wesseling 1991-12-05 This is a postmodernist history of the historical novel with special attention to the political implications of the postmodernist attitude toward the past. Beginning with the poetics of Sir Walter Scott, Wesseling moves via a global survey of 19th century historical fiction to modernist innovations in the genre. Noting how the self-reflexive strategy enables a novelist to represent an episode from the past alongside the process of gathering and formulating historical knowledge, the author discusses the elaboration of this strategy, introduced by novelists such as Virginia Woolf and William Faulkner, in the work of, among others, Julian Barnes, Jay Cantor, Robert Coover and Graham Swift. Wesseling also shows how postmodernist writers attempt to envisage alternative sequences for historical events. Deliberately distorting historical facts, authors of such uchronian fiction, like Thomas Pynchon, Ishmael R. Read, Salman Rushdie and Gunter Grass, imagine what history looks like from the perspective of the losers,

rather than the winners.

**The Oxford Handbook of Management Theorists** Morgen Witzel 2013-02-28 The Handbook will evaluate the ideas and influence of 25 major management theorists, examining their impact on the evolution of management as a discipline. Chapters will review the contributions of these theorists in light of their contemporary context and each other, from the pioneers to post-war theorists and later business school theorists.

**Beyond Sovereignty** Tom Farer 1996-05-30 "Seventeen distinguished experts tackle profound issues related to titled subject. Farer's lively introduction furnishes clear, insightful framework; subsequent chapters provide strong theoretical and empirical bases with high-quality scholarship. Statesreceiving case study attention, however, are limited; key ones such as Brazil and Argentina are not included"--Handbook of Latin American Studies, v. 57.

*The Military Enlightenment* Christy L. Pichichero 2017-11-15 The Military Enlightenment brings to light a radically new narrative both on the Enlightenment and the French armed forces from Louis XIV to Napoleon. Christy Pichichero makes a striking discovery: the Geneva Conventions, post-traumatic stress disorder, the military "band of brothers," and soldierly heroism all found their antecedents in the eighteenth-century French armed forces. From Louis XIV through Napoleon, from Canada to the Caribbean and India, the military was one of the few institutions of the Old Regime to transform progressive theories into practice, actually operationalizing the Enlightenment. Pichichero isolates and examines a crisis in consciousness that has characterized attitudes toward war from the eighteenth century until today. The demands of global political power warrant an ever more formidable and efficient fiscal-military state, and at the same time, awareness of the "human factor" generates the desire to minimize the devastation of war on cities and landscapes, and civilians, as well as the mind, body, and heart of the soldier. Readers of *The Military Enlightenment* will be startled to learn of the many ways in which French military officers, administrators, and medical personnel advanced ideas of human and political rights, military psychology, and social justice.

**Who Guards the Guardians and How** Thomas C. Bruneau 2009-06-03 The continued spread of democracy into the twenty-first century has seen two-thirds of the almost two hundred independent countries of the world adopting this model. In these newer democracies, one of the biggest challenges has been to establish the proper balance between the civilian and military sectors. A fundamental question of power must be addressed—who guards the guardians and how? In this volume of essays, contributors associated with the Center for Civil-Military Relations in Monterey, California, offer firsthand observations about civil-military relations in a broad range of regions including Latin America, Africa, Asia, and Eastern Europe. Despite diversity among the consolidating democracies of the world, their civil-military problems and solutions are similar—soldiers and statesmen must achieve a deeper understanding of one another, and be motivated to interact in a mutually beneficial way. The unifying theme of this collection is the creation and development of the institutions whereby democratically elected civilians achieve and exercise power over those who hold a monopoly on the

use of force within a society, while ensuring that the state has sufficient and qualified armed forces to defend itself against internal and external aggressors. Although these essays address a wide variety of institutions and situations, they each stress a necessity for balance between democratic civilian control and military effectiveness.

**Masculinities in South Africa** explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

**Bar Balto** Faïza Guène 2012 Joel, aka 'The Rink' (because his bald patch is shiny enough to skate on), the unpopular owner of the only bar in town has been murdered. There are so many suspects, it's not so much a question of who did kill him as who didn't. There's Magalie, the temperamental teenager obsessed with Paris Hilton; her troublemaker boyfriend, Tani; Tani's mother, Madame Levi; her unemployed, daytime-TV addicted husband; Yeznig, their younger son, who has learning difficulties but perfect memory recall; and newcomers Ali and Nadia, the Muslim twins struggling to fit in. As the tension mounts and we're still none the wiser, the ending is as tragic as it is unexpected.
