*Police Integrity in South Africa* Sanja Kutnjak Ivkovich 2020-05-28 Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement. In 1994, as the country's apartheid system was replaced with a democratic order, the new government faced the significant challenge of transforming the South African police force into a democratic police agency—the South African Police Service (SAPS)—that would provide unbiased policing to all the country's people. More than two decades since the initiation of the reforms, it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity. This book offers a unique perspective by providing in-depth analyses of police integrity in South Africa. It is a case study that systematically and empirically explores the contours of police integrity in a young democracy. Using the organizational theory of police integrity, the book analyzes the complex set of historical, legal, political, social, and economic circumstances shaping police integrity. A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers, probing their familiarity with official rules, their expectations of discipline within the SAPS, and their willingness to report misconduct. The book also examines the influence of the respondents' race, gender, and supervisory status on police integrity. Written in a clear and direct style, this book will appeal to students and scholars of criminology, policing, sociology, political science, as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations.

**Violence, Trauma, and Trauma Surgery** Mark Siegler 2020-02-27 This unique and innovative title offers a comprehensive exploration of the intersection of ethics, violence, trauma, and trauma surgery. Underscoring that the causes of violence include a wide range of

socioeconomic factors, including poverty and the lack of economic opportunity, and that violence often occurs in impoverished and underserved communities, various authors from a wide range of disciplines outline how intentional violence toward another person is multidimensional and complex. Many of the authors use Chicago as a framework for their chapter discussion, but there are similarities in many urban settings throughout the United States and abroad. Part I of the book, *Ethical Issues Related to Violence*, includes seven chapters that examine ethical issues related to violence. Each of these chapters discusses a different but intersecting aspect of how violence challenges ethical standards in medicine and health. Part II, *Ethical Issues Related to Trauma and Trauma Surgery*, offers eight chapters that address various aspects of ethical issues related to trauma and trauma surgery. Part III, *Additional Concerns Relating to Violence and Trauma*, describe a series of issues relating to violence and trauma, including surgical procedures, psychological distress, and geographic disparities in access to trauma care. Developed by nationally renowned thought leaders in the field, *Violence, Trauma, and Trauma Surgery* is a major and novel contribution to the clinical literature and will be of great interest to all physicians, clinicians, researchers, social scientists, students, policymakers, hospital administrators and community leaders concerned with understanding and improving outcomes relating to violence, trauma, and trauma surgery.

**War in the Shallows** John Darrell Sherwood 2015-09-16 *War in the Shallows*, published in 2015 by the Naval History and Heritage Command, is the authoritative account of the U.S. Navy's hard-fought battle along Vietnam's rivers and coastline from 1965-1968. At the height of the U.S. Navy's involvement in the Vietnam War, the Navy's coastal and riverine forces included more than 30,000 Sailors and over 350 patrol vessels ranging in size from riverboats to destroyers. These forces developed the most extensive maritime blockade in modern naval history and fought pitched battles against Viet Cong units in the Mekong Delta and elsewhere. *War in the Shallows* explores the operations of the Navy's three inshore task forces from 1965 to 1968. It also delves into other themes such as basing, technology, tactics, and command and control. Finally, using oral history interviews, it reconstructs deckplate life in South Vietnam, focusing in particular on combat waged by ordinary Sailors. Vietnam was the bloodiest war in recent naval history and *War in the Shallows* strives above all else to provide insight into the men who fought it and honor their service and sacrifice. Illustrated throughout with photographs and maps. Author John Darrell Sherwood has served as a historian with the Naval History and Heritage Command (NHHC) since 1997. -- Provided by publisher.

2021-08-26 This book aims to serve as a comprehensive resource for a myriad of crime and mental health topics and issues in the African criminal justice system from a psycho-criminological perspective. *Crime, Mental Health and the Criminal Justice System in Africa: A Psycho-Criminological Perspective* is an ideal primary text for courses in criminology, criminal justice, and forensic psychology, as well as a source of reference for practitioners who deal with offenders or victims. "For a long time, African historiography has been viewed and interpreted from Eurocentric perspectives. This book is a timely contribution towards infusing Afrocentric perspectives in African scholarship by indigenous scholars. The authors' interdisciplinary topical approach, covering a gamut of topics ranging from African criminology, through mental health and psychology, to criminal justice systems, has lent a decolonizing voice toward African literary pursuit and thereby laid a solid foundation for further research by other scholars. I highly recommend it to readers, academic institutions and researchers on Africa." – Emmanuel Onyeozili, Ph.D., Professor of Criminology and Criminal Justice, Department of Criminal Justice, University of Maryland Eastern Shore, USA "This edited volume by an array of experts from West and Southern Africa has given a refreshing voice to psycho-criminological narratives in the continent. In a region of the world in which there is insufficient documentation of the patterns, determinants and outcomes of criminal behaviour, this book offers a culturally competent and contemporary flavour to an ancient discourse. Its focus on new areas of concern such as online dating scams, kidnapping and the mental health of officials in the criminal justice system compellingly captures the potential reader and gives good value for time. It is warmly recommended for its breadth of coverage, the authority of its claims and the multi-disciplinary outlook of its authors." – Adegboyega Ogunwale, MBBS, FWACP, Consultant Psychiatrist, Forensic Unit, Neuropsychiatric Hospital, Aro, Ogun State, Nigeria "This collection represents a significant step in the study of mental health, crime and criminal justice in sub-Saharan Africa. The breadth of topics covered is impressive, with each contribution based on methodologically-sound empirical analyses. It deserves to become a key reference for students, researchers and policy makers interested in suicide, drug use, violence, the work of prison officers, criminal investigations, and police-community interactions." – Justice Tankebe, Ph.D., Lecturer, Institute of Criminology, University of Cambridge, UK "Mental health and criminal justice issues are growing problems facing the world today. Questions about whether mental health affects crime or whether involvement in the criminal justice system affects an individual's health have become part of national policy discussion. This nicely written book brings together eminent scholars and experts with extensive experience in their various fields to address these and other questions related to crime, mental health, and criminal justice in Africa. The editors did well to coordinate the efforts of the contributors into a valuable piece. I highly recommend it for all who are interested in the nexus between crime, mental health, and criminal justice systems." – Francis D. Boateng, Ph.D., Assistant Professor, Department of Criminal Justice and Legal Studies, University of Mississippi, USA

**International Police Cooperation** Frederic Lemieux 2013-01-11 The globalization of threats and the complexity of international security issues represents a greater challenge for international policing in (re)shaping inter-agency interaction, and makes effective international police cooperation more necessary than ever before. This book sets out to analyse the key emerging issues and theory and practice of international police cooperation. Paying special attention to the factors that have contributed to the effective working of police cooperation in practice and the problems that are encountered, this book brings together original research that examines opportunities and initiatives undertaken by agencies (practices and processes introduced) as well as the impact of external legal, political, and economical pressures.

Contributors explore emerging initiatives and new challenges in several contexts at both national and international levels. They adopt a diversity of approaches and theoretical frameworks to reach a broader understanding of current and future issues in police cooperation. Forms of police cooperation and trends in crime control are examined, drawing upon the following disciplines: criminology, ethics, organizational science, political science, and sociology.

**Narkomania** Jennifer J. Carroll 2019-06-15 Against the backdrop of a post-Soviet state set aflame by geopolitical conflict and violent revolution, Narkomania considers whether substance use disorders are everywhere the same and whether our responses to drug use presuppose what kind of people those who use drugs really are. Jennifer J. Carroll's ethnography is a story about public health and international efforts to quell the spread of HIV. Carroll focuses on Ukraine where the prevalence of HIV among people who use drugs is higher than in parts of sub-Saharan Africa and unpacks the arguments and myths surrounding medication-assisted treatment (MAT) in Ukraine. What she presents in Narkomania forces us to question drug policy, its uses, and its effects on "normal" citizens. Carroll uses her findings to explore what people who use drugs can teach us about the contemporary societies emerging in post-Soviet space. With examples of how MAT has been politicized, how drug use has been tied to ideas of "good" citizenship, and how vigilantism towards people who use drugs has occurred, Narkomania details the cultural and historical backstory of the situation in Ukraine. Carroll reveals how global efforts supporting MAT in Ukraine allow the ideas surrounding MAT, drug use, and HIV to resonate more broadly into international politics and echo into the heart of the Ukrainian public.

**Enhancing Police Service Delivery** James F. Albrecht 2021-02-16 Contemporary police service delivery and performance are complex phenomena. Law enforcement, particularly at the local level, must therefore face the additional challenges of globalization, cybercrime, counter-terrorism and calls for reform, at a time when extreme budgetary constraints are being implemented. Policing operations encompass multiple critical tasks and responsibilities not routinely measured and evaluated, such as response to incidents involving medical assistance, homelessness, mental illness, community engagement, and neighborhood problem-solving endeavors. This volume aims to provide government, criminal justice and policing administrators, policy makers and criminal justice scholars and researchers with comprehensive analyses of the critical issues impacting the challenges inherent in providing effectual public safety, security and service, all from a global perspective. It takes into account popular criticism, extreme budgetary constraints, and the relatively novel and overwhelming challenges of terrorism and cybercrime. The book merges study and practice to identify avenues to best serve community interests, ensure organizational success, and enhance

public confidence in policing and in rule of law.

*Predator Empire* Ian G. R. Shaw 2016-08-15 What does it mean for human beings to exist in an era of dronified state violence? How can we understand the rise of robotic systems of power and domination? Focusing on U.S. drone warfare and its broader implications as no other book has to date, *Predator Empire* argues that we are witnessing a transition from a labor-intensive "American empire" to a machine-intensive "Predator Empire." Moving from the Vietnam War to the War on Terror and beyond, Ian G. R. Shaw reveals how changes in military strategy, domestic policing, and state surveillance have come together to enclose our planet in a robotic system of control. The rise of drones presents a series of "existential crises," he suggests, that are reengineering not only spaces of violence but also the character of the modern state. Positioning drone warfare as part of a much longer project to watch and enclose the human species, he shows that for decades—centuries even—human existence has slowly but surely been brought within the artificial worlds of "technological civilization." Instead of incarcerating us in prisons or colonizing territory directly, the *Predator Empire* locks us inside a worldwide system of electromagnetic enclosure—in which democratic ideals give way to a system of totalitarian control, a machinic "rule by Nobody." As accessibly written as it is theoretically ambitious, *Predator Empire* provides up-to-date information about U.S. drone warfare, as well as an in-depth history of the rise of drones.

**Consuming Habits** Jordan Goodman 2014-04-08 Covering a wide range of substances, including opium, cocaine, coffee, tobacco, kola, and betelnut, from prehistory to the present day, this new edition has been extensively updated, with an updated bibliography and two new chapters on cannabis and khat. *Consuming Habits* is the perfect companion for all those interested in how different cultures have defined drugs across the ages. Psychoactive substances have been central to the formation of civilizations, the definition of cultural identities, and the growth of the world economy. The labelling of these substances as 'legal' or 'illegal' has diverted attention away from understanding their important cultural and historical role. This collection explores the rich analytical category of psychoactive substances from challenging historical and anthropological perspectives.

Border Policing Holly M. Karibo 2020-04-21 An extensive history examining how North American nations have tried (and often failed) to police their borders, *Border Policing* presents diverse scholarly perspectives on attempts to regulate people and goods at borders, as well as on the ways that individuals and communities have navigated, contested, and evaded such

regulation. The contributors explore these power dynamics through a series of case studies on subjects ranging from competing allegiances at the northeastern border during the War of 1812 to struggles over Indian sovereignty and from the effects of the Mexican Revolution to the experiences of smugglers along the Rio Grande during Prohibition. Later chapters stretch into the twenty-first century and consider immigration enforcement, drug trafficking, and representations of border policing in reality television. Together, the contributors explore the powerful ways in which federal authorities impose political agendas on borderlands and how local border residents and regions interact with, and push back against, such agendas. With its rich mix of political, legal, social, and cultural history, this collection provides new insights into the distinct realities that have shaped the international borders of North America.
