Transforming the Robocops Monique Marks 2005 Through all the bitter decades of apartheid, the South African Police brutally invaded the everyday lives of ordinary citizens, displaying absolute contempt for human rights. In this book, a policing scholar traces the evolution of the specialised 'Public Order' police unit (formerly the Internal Stability Division and the Riot Unit) that was designed to spearhead the apartheid assault. She then takes us intimately and directly into the daily routines of the same unit in the astonishing years of South Africa's political rebirth. Monique Marks brings to this narrative both a wide-ranging scholarly grasp of contemporary developments in global and South African policing and her own recollections of field operations in patrol vans with the men and women of the Durban police unit who accepted her into their working world.

Seven Days Deon Meyer 2012-09-04 Detective Griessel must solve a cold case to stop a shooter in this thriller from the acclaimed South African author. Two police officers have been shot, and the Cape Town homicide department has

received emails from the shooter alleging the cover-up of an unsolved murder. If the cold case isn't reopened immediately, the shooter's carnage will continue. Now Det. Capt. Benny Griessel is out to solve the crime in question: the murder of an ambitious lawyer stabbed to death in her luxury apartment. Unfortunately, there's no apparent motive, forensic evidence, or leads. As Griessel races to piece together an investigation with nothing to go on and his colleague, Capt. Mbali Kaleni, attempts to locate the shooter, a third cop becomes the victim of another barrage of bullets. The shooter is growing bolder by the day, and it's only a matter of time before Griessel ends up in his sights . . . Police Integrity in South Africa Sanja Kutnjak Ivkovich 2020-05-28 Policing in South Africa has gained notoriety through its extensive history of oppressive law enforcement. In 1994, as the country's apartheid system was replaced with a democratic order, the new government faced the significant challenge of transforming the South African police force into a democratic police agency—the South African Police Service (SAPS)—that would provide unbiased policing to all the country's people. More than two decades since the initiation of the reforms, it appears that the SAPS has rapidly developed a reputation as a police agency beset by challenges to its integrity. This book offers a unique perspective by providing in-depth analyses of police integrity in South Africa. It is a case study that systematically and empirically explores the contours of police integrity in a young democracy. Using the organizational theory of police integrity, the book analyzes the complex set of historical, legal, political, social, and economic circumstances shaping police integrity. A discussion of the theoretical framework is accompanied by the results of a nationwide survey of nearly 900 SAPS officers, probing their familiarity with official rules, their expectations of discipline within the SAPS, and their

willingness to report misconduct. The book also examines the influence of the respondents' race, gender, and supervisory status on police integrity. Written in a clear and direct style, this book will appeal to students and scholars of criminology, policing, sociology, political science, as well as to police administrators interested in expanding their knowledge about police integrity and enhancing it in their organizations.

*Kill Zone* Kevin J. Anderson 2019-08-27 Power duo Kevin J. Anderson and Doug Beason team up in *Kill Zone*, a perilous disaster thriller for the modern age. Deep within a mountain in Albuquerque, New Mexico, a Cold War-era nuclear weapons storage facility is being used to covertly receive more than 100,000 tons of nuclear waste stored across the US. Only Department of Energy employee, Adonia, and a few others including a war hero, a senator, and an environmental activist, are allowed access to perform a high-level security review of the facilities. But Hydra Mountain was never meant to securely hold this much

hazardous waste, and it has the potential to explode, taking with it all of Albuquerque and spreading radioactivity across the nation. This disaster situation proves all too possible when a small plane crashes at a nearby military base, setting off Hydra's lockdown and trapping Adonia and her team in the heart of the hazardous, waste-filled mountain. Now, the only direction for them to go is deeper into the mountain, through the tear gas and into a secretive area no one was ever supposed to know about. *Twilight Policing* Dr. Tessa G. Diphorn 2015-10-20 South Africa boasts the largest private security sector in the entire world, reflecting deep anxieties about violence, security, and governance. *Twilight Policing* is an ethnographic study of the daily policing practices of armed response officers—a specific type of private security officer—and their interactions with citizens and the state police in Durban, South Africa. This book shows how their policing practices simultaneously undermine and support the state, resulting in actions that are neither public nor private, but something in between, something "twilight." Their performances of security are also punitive, disciplinary, and exclusionary, and they work to reinforce post-apartheid racial and economic inequalities. Ultimately, *Twilight Policing* helps to illuminate how citizens survive volatile conditions and to whom they assign the authority to guide them in the process.

**Police Work and Identity** Andrew Faull 2017-09-07 This is a book about the men and women who police contemporary South Africa. Drawing on rich, original ethnographical data, it considers how officers make sense of their jobs and how they find meaning in their duties. It demonstrates that the dynamics that lead to police abuses and scandals in transitional and neo-liberalising regimes such as South Africa can be traced to the day-to-day experiences and ambitions of the average police officer. It is about the stories they tell themselves about themselves and their social worlds, and how these shape the order they produce through their work. By focusing on police officers, this book positions the individual in primacy over the organisation, asking what policing looks like when motivated by the pursuit of ontological security in precarious contexts. It acknowledges but downplays the importance of police culture in determining officers' attitudes and behaviour, and reminds readers that most officers' lives are entangled in, and shaped by a range of social, political and cultural forces. It suggests that a job in the South African Police Service (SAPS) is primarily just that: a job. Most officers join the organisation after other dreams have slipped beyond reach, their presence in the Service being almost accidental. But once employed, they re-write their self-narratives and enact carefully choreographed performances to ease managerial and public pressure, and to rationalize their coercive practices. In an era where 'evidence' and 'what works' reigns supreme, and where 'cop culture' is often deemed a primary socializing force, this book emphasises how officers' personal histories, ambitions, and vulnerabilities remain central to how policing unfolds on the street.

*Private Muscle* Martin Schönsteich 2004 This monograph explores the scope for greater private sector participation in the provision of criminal justice services through outsourcing schemes. This includes an analysis of the concept of outsourcing, its risks and benefits, and a discussion of the South African government's outsourcing policy.

Police in Africa Jan Beek 2017 State police forces in Africa are a curiously neglected subject of study, even within the study of security issues and African states. This book brings together important new work on the subject from a group of criminologists, anthropologists, sociologists, historians, political scientists and others, who have engaged with police forces and the publics with whom they interact across the continent to provide street-level perspectives from below and inside Africa's police forces. The collection is in three parts; first it considers historical trajectories and particular configurations of police power within wider political systems, then examines the "inside view" of police forces as state institutions - the challenges, preoccupations, professional ethics and self-perceptions of police officers, and finally looks at how African police officers go about their work, in terms of everyday practices and engagements with the public, and the meanings that are construed in the course of doing so. The studies span the continent from South Africa to Sierra Leone, and illustrate similarities and differences in Anglophone, Francophone and Lusophone states, post-socialist, post-military and post-conflict contexts, and amid both centralisation and devolution of policing powers, democratic transitions and new illiberal regimes, while keeping a strong ethnographic focus on ordinary police officers and police work at their core.

Policing and Human Rights Julia Hornberger 2011-10-21 Policing and Human Rights analyses the implementation of human rights standards, tracing them from the nodal points of their production in Geneva, through the board rooms of national police management and training facilities, to the streets of downtown Johannesburg. This book deals with how the unprecedented influence of human rights, combined with the inability by police officers to 'live up' to international standards, has created a range of policing and human rights

vernaculars – hybrid discourses that have appropriated, transmogrified and undercut human rights. Understood as an attempt by police officers, as much as by the police as a whole, to recover a position from which to act and to judge, these vernaculars reveal the compromised ways in which human rights are – and are not – implemented. Tracing how, in South Africa, human rights have given rise to new forms of popular justice, informal ‘private’ policing and provisional security arrangements, Policing and Human Rights delivers an important analysis of how the dissemination and implementation of human rights intersects with the post-colonial and post-transformation circumstances that characterise many countries in the South.
