From Obscurity to Clarity in Psychometric Testing Peter Saville 2016-06-17 The field of psychometrics has a long and varied tradition across the social sciences. A range of academics have sought to understand human consciousness more fully by statistical testing our abilities, personalities, attitudes and beliefs. But perhaps the area where psychometric techniques have had most impact on contemporary society is in employee recruitment, where a range of psychometric tests have become common-place. Professor Peter Saville is one of the pioneers of adapting psychometric testing to the field of occupational psychology and human resource management. In a career of nearly 40 years, his work has been adopted by hundreds of public and private organizations, assessing the suitability of prospective candidates through a range of questionnaires and tests. In this anthology of his work, including both keynote conference address and journal papers, Saville provides a masterly overview of the field of psychometrics, and the key issues and questions that it raises. An ideal companion for any student or researcher of HRM, occupational or organizational psychology, or applied psychology in general, Peter Saville's selected works represent the thinking of one of the most influential psychologists of our time.

A Socialist Empire Louis Baudin 2011-08 2011 Reprint of 1961 Edition. Many social scientists have attempted to lump the unique Inca society into modern political and economic categories. Louis Baudin argued that Incan society was socialistic. He claimed that the ayllu system is what classified the Inca as a system of state socialism. Baudin defines state socialism as being based on the idea of the regulative action of a central power in social relations. According to Baudin, the idea of private property in Europe had been in existence for centuries, but no such idea existed at the times of the Incas. He claims, that society in Peru rested on a foundation of collective ownership which, to a certain extent, facilitated its establishment, because the effacement of the individual within a group prepared him to allow himself to be absorbed. Baudin argued that the higher ranking Incas tried, and succeeded to an extent, to force a degree of uniformity on the common Inca. The Inca were forced to dress similarly, eat the same food, practice the same religion, and speak the same language, Quechua.

The Making of the English Working Class E. P. Thompson 2016-03-15 A history of the common people and the Industrial Revolution: "A true masterpiece" and one of the Modern Library's 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England's greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson's magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain's greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains

incredibly relevant to the social and economic issues of current times, with the Guardian saying upon the book's fiftieth anniversary that it "continues to delight and inspire new readers."

Napalm Robert M. Neer 2013-04-01 Napalm was invented on Valentine's Day 1942 at a secret Harvard war research laboratory. Managerial Imperative and the Practice of Leadership in Schools, The Larry Cuban 1988-01-01 With this significant new work, Larry Cuban provides a unique and insightful perspective on the bridging of the long-standing and well-known gap between teachers and administrators. Drawing on the literature of the field as well as personal experience, Cuban recognizes the enduring structural relationship within school organizations inherited by teachers, principals, and superintendents, and calls for a renewal of their sense of common purpose regarding the role of schooling in a democratic society. Cuban analyzes the dominant images (moral and technical), roles (instructional, managerial, and political), and contexts (classroom, school, and district) within which teachers, principals, and superintendents have worked over the last century. He concludes that when these powerful images and roles are wedded to the structural conditions in which schooling occurs, "managerial behavior" results, thus narrowing the potential for more thoughtful, effective, and appropriate leadership. Cuban then turns to consider this situation with respect to the contemporary movement for school reform, identifying significant concerns both for policymakers and practitioners. This honest, thought-provoking book by a leading scholar, writer, and practitioner in the field represents an invaluable resource—an insightful introduction for those just entering the field and a

fresh, new perspective for those long-familiar with its complexities. Cuban's ethnographic approach to the development of his own career and viewpoint, as well as his highly readable style, make this a work of lasting value.

Report of the Mid Staffordshire NHS Foundation Trust Public Inquiry Mid Staffordshire NHS Foundation Trust Public Inquiry 2013-02-06 This public inquiry report into serious failings in healthcare that took place at the Mid Staffordshire NHS Foundation Trust builds on the first independent report published in February 2010 (ISBN 9780102964394). It further examines the suffering of patients caused by failures by the Trust: there was a failure to listen to its patients and staff or ensure correction of deficiencies. There was also a failure to tackle the insidious negative culture involving poor standards and a disengagement from managerial and leadership responsibilities. These failures are in part a consequence of allowing a focus on reaching national access targets, achieving financial balance and seeking foundation trust status at the cost of delivering acceptable care standards. Further, the checks and balances that operate within the NHS system should have prevented the serious systemic failure that developed at Mid Staffs. The system failed in its primary duty to protect patients and maintain confidence in the healthcare system. This report identifies numerous warning signs that could and should have alerted the system to problems developing at the Trust. It also sets out 290 recommendations grouped around: (i) putting the patient first; (ii) developing a set of fundamental standards, easily understood and accepted by patients; (iii) providing professionally endorsed and evidence-based means of compliance of standards that are understood and adopted by staff; (iv) ensuring openness, transparency and candour throughout system; (v) policing of these standards by the healthcare regulator; (vi) making all those who provide care for patients , properly accountable; (vii) enhancing recruitment, education, training and support of all key contributors to the provision of healthcare; (viii) developing and sharing ever improving means of measuring and understanding the performance of individual professionals, teams, units and provider organisations for the patients, the public, and other stakeholders.

Nelson's Surgeon Laurence Brockliss 2005-10-06 Despite the significant role played by the health and fitness of the British crews in Nelson's defeat of the Combined Fleet in 1805, little has been written hitherto about the naval surgeon in the era of the long war against France. This book is intended to fill the gap. Sir William Beatty (1773-1842) was surgeon of the Victory at Trafalgar. An Ulsterman from Londonderry, he had joined the navy in 1791. Before being warranted to Nelson's flagship, Beatty had served upon ten other warships, and survived a yellow fever epidemic, court martial, and shipwreck to share in the capture of a Spanish treasure ship. After Trafalgar, he became Physician of the Channel Fleet, based at Plymouth, and eventually Physician to Greenwich Hospital, where he served until his retirement in 1838. As the book makes clear in drawing upon an extensive prosopographical database, Beatty's career until 1805 was representative of the experience of the approximately 2,000 naval surgeons who joined the navy in the course of the war. The first part of the biography provides a detailed and scholarly introduction to the professional education, training, and work of the naval surgeon. But after 1805 Beatty became a member of the service elite, and his career becomes interesting for other reasons. In the final decades of his life, Beatty was far more than a senior naval physician. As a Fellow of the Royal Society, director of the Clerical and Medical Insurance Company, and director of the London to Greenwich Railway, he was a prominent figure in London's business and scientific community, who used his growing wealth to build a large collection of books and manuscripts. His later life is testimony to the much wider contribution that some naval and army medical officers made to the development of the new Britain of the nineteenth century. In Beatty's case, too, the contribution was original. By publishing in 1807 his carefully crafted Authentic Narrative of the Death of Lord Nelson , he was instrumental in forging the

myth of the hero's last hours, which has become a part of the national consciousness and has helped to define for generations the concept of Britishness.

Undergrounds in Insurgent, Revolutionary and Resistance Warfare Us Army Special Operations Command 2017-09 Since the original publication of *Undergrounds in Insurgent, Revolutionary, and Resistance Warfare* in 1963, much has changed, but much remains relevant. The Internet, the globalization of media, the demise of Soviet Communism and the Cold War, and the rise of Islamic fundamentalism have all impacted the nature and functionality of undergrounds. The original study's observation, however, that for every guerilla fighter, there are from two to twenty-seven underground members is still true. Likewise, the report's main thesis--that the underground part of an insurgency is the sine qua non of all such movements--is demonstrably accurate today. This book examines the anatomy of undergrounds in various insurgencies of recent history. Our goal is to continue the groundbreaking work performed in the original study and update it with insights from the post-Cold War world. Primary source material for this book comes from the Tier I and Tier II Case Studies written as part of the *Assessing Revolutionary and Insurgent Strategies* project. Hence, these case studies should be used as companion documents for this study.

First Language Attrition Monika S. Schmid 2013-05-22 This volume consists of a collection of papers that focus on structural/grammatical aspects of the process of first language attrition. It presents an overview of current research, methodological issues and important questions regarding first language attrition. In particular, it addresses the two most prominent issues in current L1 attrition research: Can attrition effects impact on features of core syntax, or are they limited to interface phenomena?, and; What is the role of age at onset (pre-/post-puberty) in this regard? By investigating attrition in a variety of settings, from a case study of a Spanish-speaking adoptee in the US to an empirical investigation of more than 50 long-term attriters of Turkish in the Netherlands, the investigations presented take a new perspective on these issues. Originally published in *Language, Interaction and Acquisition - Langage, Interaction et Acquisition* 2:2 (2011).

Program Evaluation Theory and Practice, First Edition Donna M. Mertens 2012-03-01 This engaging text takes an evenhanded approach to major theoretical paradigms in evaluation and builds a bridge from

them to evaluation practice. It offers balanced coverage of quantitative, qualitative, and mixed methods approaches. Useful pedagogical features include:

- *Examples of large- and small-scale evaluations from multiple disciplines.
- *Beginning-of-chapter reflection questions that set the stage for the material covered.
- *"Extending your thinking" questions and practical activities that help readers apply particular theoretical paradigms in their own evaluation projects.
- *Relevant Web links, including pathways to more details about sampling, data collection, and analysis.
- *Boxes offering a closer look at key evaluation concepts and additional studies.
- *Checklists for readers to determine if they have followed recommended practice.

Philosophy in Educational Research David Bridges 2016-12-01 This book provides critical and reflective discussions of a wide range of issues arising in education at the interface between philosophy, research, policy and practice. It addresses epistemological questions about the intellectual resources that underpin educational research, explores the relationship between philosophy and educational research, and examines debates about truth and truthfulness in educational research. Furthermore, it looks at issues to do with the relationship between research, practice and policy, and discusses questions about ethics and educational research. Finally, the book delves into the deeply contested area of research quality assessment. The book is based on extensive engagement in empirically based educational research projects and in the institutional and professional management of research, as well as in philosophical work. It clarifies what is at stake in international debates around educational research and teases out the nature of the arguments, and, where argument permits, the conclusions to which these point. The book

discusses these familiar themes using less predictable sources and points of reference, such as: codes of social obligation in contemporary Egypt and New Zealand; the 'Soviet', and the inspiration of the nineteenth-century philosopher, Abai in contemporary Kazakhstan; seventeenth-century France, Pascal, and the disputes between Jesuits and Jansenites; eighteenth-century Italy, Giambattista Vico, and la scienza nuova; 'educational magic' in traditional Ethiopia; and ends at a banquet with Socrates and dinner with wine and a conversation-loving Montaigne.
