Schoolgirls Peggy Orenstein 2013-02-06 A NEW YORK TIMES NOTABLE BOOK OF THE YEAR When Peggy Orenstein's now-classic examination of young girls and self-esteem was first published, it set off a groundswell that continues to this day. Inspired by an American Association of University Women survey that showed a steep decline in confidence as girls reach adolescence, Orenstein set out to explore the obstacles girls face--in school, in the hoime, and in our culture. For this intimate, girls' eye view of the world, Orenstein spent months observing and interviewing eighth-graders from two ethnically disparate communities, seeking to discover what was causing girls to fall into traditional patterns of self-censorship and self-doubt. By taking us into the lives of real young women who are struggling with eating disorders, sexual harrassment, and declining academic achievement, Orenstein brings the disturbing statistics to life with the skill and flair of an experienced journalist. Uncovering the adolescent roots of issues that remain important to American women throughout their lives, this groundbreaking book challenges us to change the way we raise and educate girls.

Cross-Cultural Roots of Minority Child Development Patricia M. Greenfield 2014-12-05 Cross-Cultural Roots of Minority Child Development was the first volume to analyze minority child development by comparing minority children to children in their ancestral countries, rather than to children in the host culture. It was a ground-breaking volume that not only offered an historical reconstruction of the cross-cultural roots of minority child development, but a new cultural-historical approach to developmental psychology as well. It was also one of the best attempts to develop guidelines for building models of development that are multicultural in perspective, thus challenging scholars across the behavioral sciences to give more credence to the impact of culture on development and socialization in their respective fields of work. A true classic, Cross-Cultural Roots of Minority Child Development will remain an essential resource for any scholar who is interested in minority child development and engages in cross-cultural research and multidisciplinary

methodologies.

Publishing Sacrobosco's De sphaera in Early Modern Europe Matteo Valleriani 2022-03-12 This open access volume focuses on the cultural background of the pivotal transformations of scientific knowledge in the early modern period. It investigates the rich edition history of Johannes de Sacrobosco's Tractatus de sphaera, by far the most widely disseminated textbook on geocentric cosmology, from the unique standpoint of the many printers, publishers, and booksellers who steered this text from manuscript to print culture, and in doing so transformed it into an established platform of scientific learning. The corpus, constituted of 359 different editions featuring Sacrobosco's treatise on cosmology and astronomy printed between 1472 and 1650, represents the scientific European shared knowledge concerned with the cosmological worldview of the early modern period until far after the publication of Copernicus' De revolutionibus orbium coelestium in 1543. The contributions to this volume show how the academic book trade influenced the process of homogenization of scientific knowledge. They also describe the material infrastructure through which such knowledge was disseminated, and thus define the premises for the foundation of modern scientific communities.

Dancing with Myself Billy Idol 2015-09-29 A candid memoir by the multiplatinum recording artist chronicles his life from his childhood in England and rise to fame at the height of the punk-pop revolution to his popular hits and his collaborations with fellow artists.

XXXXX Martin Howse 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hirosimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the

first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

Ptolemy's Almagest Ptolemy 1998-11-08 Ptolemy's Almagest is one of the most influential scientific works in history. A masterpiece of technical exposition, it was the basic textbook of astronomy for more than a thousand years, and still is the main source for our knowledge of ancient astronomy. This translation, based on the standard Greek text of Heiberg, makes the work accessible to English readers in an intelligible and reliable form. It contains numerous corrections derived from medieval Arabic translations and extensive footnotes that take account of the great progress in understanding the work made in this century, due to the discovery of Babylonian records and other researches. It is designed to stand by itself as an interpretation of the original, but it will also be useful as an aid to reading the Greek text.

Complete Poems of Frances E.W. Harper Frances Ellen Watkins Harper 1988 Frances Harper was renowned in her lifetime not only as an activist who rallied on behalf of blacks, women, and the poor, but as a pioneer of the tradition of 'protest' literature, whose immense popularity did much to develop an audience for poetry in America. This collection of her poems is drawn from ten volumes published between 1854 and 1901. Their main issues are oppression, Christianity, and social and moral reform. Consolidating the oral tradition and the ballad form, and merging dramatic details and imagery with a strong political and racial awareness, Harper's poetry represented a distinctly Afro-American discourse that was to inspire generations of black writers.

Sex Work in Nepal Lisa Caviglia 2019-06-09 This book explores 'sex work' in Nepal as a social and analytical category. Narrating stories of those subsumed under such definition, it examines changes as well as continuities characterising socio-cultural norms and perceptions through an analysis of sexual consumption. It also highlights the ways in which the development sector, media, and local community discourses frame 'sex work' as a distinct category. How does the work of development aid projects affect the understanding of the sex worker category? How are visual and media images employed to mark spaces of perdition in the Nepalese urban setting and what forms of imagination do they trigger? How are intimate practices and relations transformed by imported notions of love, and how do standards of propriety related to such interactions shift? This book attempts to answer some of these questions. An in-depth and intimate ethnography, the book deconstructs the sex worker category against the backdrop of global influences within local urban surroundings and points to the contradictions therein. Furthermore, through thorough descriptions of the experiences, agency, decision-making processes, and lives of those labelled as sex workers, the book challenges concepts such as deviance and victimhood. It proposes a counternarrative by rethinking ideas of gender, objectification, marginality, symbolic violence, and discrimination. This book will greatly interest researchers and scholars in women and gender studies, sociology and social anthropology, South Asian studies and social sciences, as well as NGOs and those involved in the development sector.

A Good War Is Hard to Find David Griffith 2006 In the wake of Abu Ghraib, Americans have struggled to understand what happened in the notorious prison and why. In this elegant series of essays, inflected with a radical Catholic philosophy, David Griffith contends that society's shift from language to image has changed the way people think about violence and cruelty, and that a disconnect exists between images and reality. Griffith meditates on images and literature, finding potent insight into what went wrong at the prison in the works of Susan Sontag, Anthony Burgess, and especially Flannery O'Connor, who often explored the gulf between proclamations of faith and the capacity for evil. Accompanying the essays are illustrated facts about torture, lists of torture methods and their long-term effects, and graphics such as the schematics of the "pain pathways" in the human body. Together, the images and essays endow the human being with the complexity images alone deny.
