Hitler's Volksgemeinschaft and the Dynamics of Racial Exclusion Michael Wildt 2012-07-15 In the spring of 1933, German society was deeply divided – in the Reichstag elections on 5 March, only a small percentage voted for Hitler. Yet, once he seized power, his creation of a socially inclusive Volksgemeinschaft, promising equality, economic prosperity and the restoration of honor and pride after the humiliating ending of World War I persuaded many Germans to support him and to shut their eyes to dictatorial coercion, concentration camps, secret state police, and the exclusion of large sections of the population. The author argues however, that the everyday practice of exclusion changed German society itself: bureaucratic discrimination and violent anti-Jewish actions destroyed the civil and constitutional order and transformed the German nation into an aggressive and racist society. Based on rich source material, this book offers one of the most comprehensive accounts of this transformation as it traces continuities and discontinuities and the replacement of a legal order with a violent one, the extent of which may not have been intended by those involved.

Forgetting Whose We are David Keck 1996 Alzheimer's disease - a degenerative disease of the central nervous system characterized especially by premature mental deterioration - is the most publicly visible and widely discussed form of a range of disorders known as senile dementia. The nature of Alzheimer's disease, especially its progressive debilitation of the memory, raises key theological issues. What does it mean to be truly human? Does our ability to remember define who we are as persons? When the mind loses its ability to remember, what happens to the life of the soul? When we forget God, does God still remember us? *Forgetting Whose We Are* offers a Christian understanding of and response to the difficult theological, spiritual, and pastoral problems raised by Alzheimer's disease. Filling an important gap in existing literature by directly confronting the theological challenges of Alzheimer's disease to victims, caregivers, and their communities, the book affirms the classic Christian doctrines that witness to the reality of grace and the promises of salvation even for those who can no longer remember themselves, their families, or their relationship with God.

Career Guidance for Social Justice Tristram Hooley 2017-11-22 This edited collection examines the intersections between career guidance, social justice and neo-liberalism. Contributors offer an original and global discussion of the role of career guidance in the struggle for social justice and evaluate the field from a diverse range of theoretical positions. Through a series of chapters that positions career guidance within a neoliberal context and presents theories to inform an emancipatory direction for the field, this book raises questions, offers resources and provides some glimpses of an alternative future for work. Drawing on education, sociology, and political science, this book addresses the theoretical basis of career guidance's involvement in social justice as well as the methodological consequences in relation to career guidance research.

The Crisis of Neoliberalism Gérard Duménil 2011 This is a work of empirical economics, in which Dumenil and Levy adduce a wide range of evidence to argue that capitalism has entered a phase characterized by rapid technological change, increasing returns to capital, and financial instability. While the authors focus on the interpretation of contemporary capitalism, they also integrate an historical perspective, showing that in the immediate post-World-War II era from 1945 till 1975, now considered a golden age of capitalism in which economic growth was high, inflation low, and income inequality decreasing, returns to capital decreased. In the 1970s this trend reversed, and real interest rates started rising, returns to capital increased, and income inequality widened. This cycle occurred in earlier eras, including one that began in the late nineteenth century and ended in The Great Depression. The authors argue that the similarity between the late nineteenth early 20th century and the past two decades is remarkable. Following the depression of the 1890s, more favorable profitability trends were established as a result of the managerial revolution, in the context of the original assertion of the political and economic hegemony of finance. This course of capitalism culminated in The Great Depression. Will the second hegemony of finance end as the first one did in collapse? The authors do not conclude that a crisis similar to the Great Depression is on the agenda, but a major adjustment will be required. Whether it is a new phase of neoliberalism or a new distinct social order is an open question.

The Ailing Empire: Germany from Bismarck to Hitler Sebastian Haffner 2019-08-16 Using his skills as a journalist, historian, and memoirist, Sebastian Haffner (author of *The Meaning of Hitler*) traces the development of the German Empire (1871-1945) and the central role of warfare that characterized the Reich. Haffner contends that Germany's unfavorable geographic position had much to do with the state's belligerence and that, from its inception, created the conflicts that culminated in two world wars. "The fruit of decades of study, the moving and sometimes very personal testament of an author whose works more than any others have influenced public opinion and challenged academic historians." — *Die Zeit* "A brilliant work from the top hat of a powerful historical magician." — Rudolf Augstein, *Der Spiegel* "A thoroughly successful work." — *Wiener Tagblatt* "A book with more historical insights than a whole pile of learned volumes." — *Münchener Abendzeitung* "The history of the Third Reich in just 43 pages? Impossible to do more than discuss a few features superficially. But not with Sebastian Haffner. This brilliant thinker — a journalist turned historian — reveals

the fundamental lines of development in a way that anyone can follow. The pages bristle with questions and unexpected answers. The 300 pages of 'The Ailing Empire' contain more clever and original insights into German history between 1871 and 1945 than many a weighty tome." — Dieter Wunderlich "This illuminating survey by a German journalist focuses on the continuities and discontinuities of the modern German Reich ... Haffner argues that the founding of the state was never regarded as a climactic achievement but rather as a springboard for expansion, and that Germany's unfavorable geographic position had much to do with the state's armed belligerence. The author also contends that the Reich was self-destructive almost from the beginning, creating a host of enemies who brought it to its knees in two world wars and eventually divided it. He describes how Hitler accelerated the catastrophic finish of the Reich by inopportunistly taking on both the Russians and Americans, then tried to turn military defeat into the annihilation of the German people with his Nero Directive of March 18-19, 1945." — Publishers Weekly "[The Ailing Empire] tells the story of yesterday's Germans who made today. It is a story Americans must understand." — San-Diego Union "Sebastian Haffner has written a book that traces the path of Germany's political self-destruction, and offers a realistic account of the war's real causes ... It is a highly readable analysis of the road from Bismarck to Hitler ... This book, based on many previously unpublished accounts, is a devastating portrait of human society." —Chattanooga Times "This is a highly readable analysis of German history over the last century. A long-time journalist, Haffner asserts that the foundations of the German Reich were an inadequate basis for a modern nation state and contained the seeds of its own destruction. Though lacking documentation, Haffner's first-hand recollections of the Nazi era are most interesting. Particularly noteworthy are his observations on daily life during the regime and his judgment regarding those literary and artistic 'antis' who chose 'internal emigration' within the Hitler state." — Library Journal

Science of the Placebo Harry Guess 2002-03-15 Based on a meeting in November 2000, this book brings together researchers from a wide range of disciplines to examine the biological, behavioral, social, cultural and ethical aspects related to the placebo effect. Perspectives on the necessity for including a placebo in randomized clinical trials will also be examined. This is the first attempt to examine the evidence-base of the placebo effect and will provide important information for clinicians.

The Girl with the Leica Helena Janeczek 2019-10-08 The life of a female war photographer killed in action is told by three of her friends in this biographical novel by the author of *Bloody Cow*. Gerda Taro was a German-Jewish war photographer, anti-fascist activist, artist, and innovator who, together with her partner, the Hungarian Endre Friedmann, was one half of the alias Robert Capa, widely considered to be the twentieth century's greatest war and political photographer. She was killed while documenting the Spanish Civil War and tragically became the first female photojournalist to be killed on a battlefield. August 1, 1937, Paris. Taro's twenty-seventh birthday, and her funeral. Friedmann leads the procession. He is devastated, but there are others, equally bereft, with him: Ruth Cerf, Taro's old friend from Leipzig with whom she fled to Paris; Willy Chardack, ex-lover; Georg Kuritzkes, another lover and a key figure in the International Brigades. They have all known a different Gerda, and one who is at times radically at odds with the heroic anti-fascist figure being mourned by the multitudes . . . Another character in the novel is the era itself, the 1930s, with economic depression, the rise of Nazism, hostility towards refugees in France, the century's ideological warfare, the cultural ferment, and the ascendancy of photography as the age's quintessential art form. Winner of the Strega Prize, *The Girl with the Leica* is a must-read for fans of historical fiction centered on extraordinary women's lives. "A biography, a feminist parable, a declaration of love for photography, and a tableau of the 1930s: *The Girl with the Leica* is all this at once." —Il Sole 24 Ore (Italy) "Janeczek creatively and seamlessly spotlights war photographer Gerda Pohorylle." —Publishers Weekly

The Welfare State: A Very Short Introduction David Garland 2016-03 The programmes that make up the welfare state vary from nation to nation and from time to time, and the balance between markets and government, and free enterprise and social protection is perennially in question. In contemporary political debate the welfare state seems to be mostly viewed as a problem rather than a solution, and welfare programmes appear constantly on the defensive. This Very Short Introduction describes the modern welfare state, explaining its historical and contemporary significance and arguing that far from being 'a failure' or 'a problem', welfare states are an essential element of contemporary capitalism, and a vital concomitant of democratic government. In this accessible and entertaining account, David Garland cuts through the fog of misunderstandings to explain in clear and simple terms, what

the welfare state is, how it works, and why it matters. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Study of Time J. T. Fraser 2012-12-06 The First Conference of the International Society for the Study of Time was held at the Mathematisches Forschungsinstitut at Oberwolfach in the Black Forest, Federal Republic of Germany from Sunday, 31 August to Saturday, 6 September, 1969. The origin of this conference and the formation of the Society goes back to a proposal due to J. T. Fraser that was discussed at a conference on "Interdisciplinary Perspectives of Time" held by the New York Academy of Sciences in January, 1966. It was unanimously agreed that an international society should be formed on an interdisciplinary basis with the object of stimulating interest in all problems concerning 'time and that this object could best be attained by means of conferences held at regular intervals. J. T. Fraser was elected Secretary, S. Watanabe Treasurer, and I was elected President. It was agreed, at my suggestion, that the organization of the first conference of the newly formed Society be left to a committee of these three officers, on the understanding that they would invite authorities on the role of time in the various special sciences and humanities to form an Advisory Board to assist them. One of the main difficulties in seeking support for an interdisciplinary conference is that most foundations confine their interest exclusively either to the sciences or to the humanities.

The Red Pony John Steinbeck 1994-10-01 A Penguin Classic Written at a time of profound anxiety caused by the illness of his mother, Nobel Prize winner John Steinbeck draws on his memories of childhood in these stories about a boy who embodies both the rebellious spirit and the contradictory desire for acceptance of early adolescence. Unlike most coming-of-age stories, the cycle does not end with a hero "matured" by circumstances. As John Seelye writes in his introduction, reversing common interpretations, *The Red Pony* is imbued with a sense of loss. Jody's encounters with birth and death express a common theme in Steinbeck's fiction: They are parts of the ongoing process of life, "resolving" nothing. *The Red Pony* was central not only to Steinbeck's emergence as a major American novelist but to the shaping of a distinctly mid twentieth-century genre, opening up a new range of possibilities about the fictional presence of a child's world. This edition contains an introduction by John Seelye. For

more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

Does Ethics Have a Chance in a World of Consumers? Zygmunt Bauman 2009-06-30
Bauman urges us to think in new ways about a newly flexible, newly challenging modern world. In an era of routine travel, where most people circulate widely, the inherited beliefs that aid our thinking about the world have become an obstacle. He challenges members of the "knowledge class" to overcome their estrangement from the rest of society.

All Days Are Night Peter Stamm 2014-11-04 A novel about survival, self-reliance, and art, by Peter Stamm, finalist for the 2013 Man Booker International Prize All Days Are Night is the story of Gillian, a successful and beautiful TV host, content with her marriage to Matthias, even if she feels restless at times. One night following an argument, the couple has a terrible car accident: Matthias, who is drunk, hits a deer on the wet road and dies in the crash. Gillian wakes up in the hospital completely disfigured. Only slowly, after many twists and turns, does she put her life back together, and reconnects with a love interest of the past who becomes a possible future—or so it seems. In Stamm's unadorned and haunting style, this new novel forcefully tells the story of a woman who loses her life but must stay alive all the same. How she works everything out in the end is at once surprising and incredibly rewarding.

Everyday Enlightenment Sally Bongers 2008-07-25 Sally Bongers, the distinguished Australian cinematographer, compiled these interviews while researching subjects for a documentary film

on Enlightenment. Initially she sought out established spiritual teachers, but her emphasis changed to interviewing ordinary people who had experienced a shift of perception which, in the Eastern tradition, would be called Enlightenment or Liberation. She found men and women who still live their lives much as they had done before the realization, working and living in the everyday world. Seven of their stories were chosen for this book. Hearing these people talk about living with this understanding in the real world (not in an ice-cave somewhere!) confirmed the closeness of it all. These stories make it clear that Enlightenment can “happen” to anyone, regardless of so-called spiritual qualifications.

Animal Beauty Christiane Nusslein-Volhard 2019-05-14 An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as “beauty”? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his 1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.
