Conception systémique pour la conversion d'énergie électrique 1 : gestion, analyse et synthèse ROBOAM
Xavier 2012-11-06 Le contexte actuel mène les concepteurs vers des systèmes toujours plus complexes et performants, intégrant un grand nombre d'éléments souvent fortement couplés et appartenant à divers champs de la physique énergétique. Après une présentation de l'approche systémique de conception, ce premier volume rassemble les points-clés permettant de modéliser et de caractériser efficacement des systèmes multiphysiques (formalismes graphiques, Bond Graphs, GIC/REM), d'analyser la qualité et la stabilité des réseaux et de contribuer à la robustesse en conception intégrée. La gestion de l'énergie des systèmes énergétiques hybrides incluant du stockage est également largement détaillée et différentes méthodes statistiques permettant de dimensionner les réseaux ou de caractériser leur sûreté de fonctionnement sont proposées (par exemple, la méthode de Monte-Carlo). Les techniques d'analyse, de synthèse et de gestion présentées dans cet ouvrage participent à l'optimisation des systèmes énergétiques. Elles sont complétées par des approches spécifiquement orientées vers la conception par

optimisation, objets du second volume.

La Recherche-Intervention Dans les Entreprises et les Organisations Anthony F. Buono 2018-02-01 This volume continues to build on the relationship between the Research in Management Consulting series and the intervener-researchers at the Socio-Economic Institute for Firms and Organizations (ISEOR) in Ecully, France, extending that partnership to our recent work with the French Foundation for Management Education (FNEGE), a foundation dedicated to closing the gap between the teaching and practice of management in France. As part of the Foundation's multifaceted activities—which range from seminars and an advanced training initiative for French doctoral students to joint programs with international organizations and associations—FNEGE partnered with ISEOR to sponsor a series of workshops on developing high quality intervention-research. This volume is one of the results from that endeavor. Although intervention-research helps to uncover valuable insight into organizational dynamics and performance, the challenge of capturing and disseminating that insight to both academics and practitioners is entrenched in the rigor-relevance debate. While we are witnessing increased calls for “actionable knowledge,” this ideal, unfortunately, remains a rather elusive concept as critics contend either that rigorous academic research falls well-short of relevance to the practitioner world or research

that proves to be valuable to practitioners falls short of the rigor expected in academic life. This volume is intended to help bridge that divide. Drawing on the FNEGE-ISEOR intervention-research workshop, the volume contains 18 chapters that explore the intervention-research process, from initial conceptualization, to implementation, to publication. The volume will be published in French and English

Challenges of Education Financing and Planning in Africa: What Works and What Does Not Work
Adebayo Olukoshi 2007-01-15 This volume highlights the proceedings of the two policy dialogue conferences held by the Working Group on Finance and Education (WGFE) in 2004. Part I of the document discusses the endemic crisis that higher education has been beset with since the outset of the post colonial period in Africa. It highlights the critical state of higher education systems in Burkina Faso, Mali, Nigeria and Senegal by scrutinizing the causes, manifestations and consequences of the crisis to posit useful recommendations and possible solutions. Part II is a comprehensive review of the challenges facing the financing and planning of all levels and types of education - from kindergarten to graduate school - in selected African countries. The papers reveal the sources and mechanisms of funding education in Africa, drawing attention to the experiences of communities confronted with new funding sources. A new trend, which consists of designing decade long educational development plans, has emerged and is rapidly expanding in numerous African countries. This experience is examined and shared by the authors. This book has contributions in both French and English.

European Directory of Bioethics Gérard Huber 1993 For the first time, based on an extensive survey conducted across the whole of Europe by the Association Descartes, the details of over 1,000 persons and organisations are now available. The Directory is broken down into 14 sections : the first section is

devoted to European institutions; the next twelve cover each EEC country and list the names of persons and organisations involved in bioethics; a complementary listing covers indispensable persons or organisations; A reference work both for researchers and anybody concerned with bioethics.

La science de l'information : Origines, théories et paradigmes IBEKWE-SANJUAN Fidelia 2012-10-01 Cet ouvrage de synthèse sur les fondements théoriques et épistémologiques de la science de l'information répond à trois questions : – existe-t-il une science de l'information à part entière ? – comment se définit l'information, objet de cette science ? – y a-t-il une spécificité française de la science de l'information ? Ce livre compare les chemins parcourus par la science de l'information en France et dans le reste du monde. Il contextualise cette évolution à l'aune d'une diversité d'inscriptions disciplinaires. L'enjeu de la science de l'information est de concilier l'approche réaliste de la connaissance, l'approche individualiste des sciences cognitives et l'approche collectiviste où les domaines sont façonnés et les comportements sont modulés par les environnements, les cultures et les construits sociaux partagés. Cette étude sera utile à tous les chercheurs, étudiants et professionnels désirant approfondir leurs connaissances sur les fondements théoriques de la science de l'information.

Phenomenology of Space and Time Anna-Teresa Tymieniecka 2014-04-26 This book celebrates the investigative power of phenomenology to explore the phenomenological sense of space and time in conjunction with the phenomenology of intentionality, the invisible, the sacred, and the mystical. It examines the course of life through its ontopoietic genesis, opening the cosmic sphere to logos. The work also explores, on the one hand, the intellectual drive to locate our cosmic position in the universe and, on the other, the pull toward the infinite. It intertwines science and its grounding principles with imagination in

order to make sense of the infinite. This work is the first of a two-part work that contains papers presented at the 62nd International Congress of Phenomenology, The Forces of the Cosmos and the Ontopoietic Genesis of Life, held in Paris, France, August 2012. It features the work of scholars in such diverse disciplines as biology, anthropology, pedagogy, and psychology who philosophically investigate the cosmic origins of beingness. Coverage in this first part includes: Toward a New Enlightenment: Metaphysics as Philosophy of Life, Transformation in Phenomenology: Husserl and Tymieniecka, Biologically Organized Quantum Vacuum and the Cosmic Origin of Cellular Life, Plotinus "Enneads" and Self-Creation, The Creative Potential of Humor, Transcendental Morphology – A Phenomenological Interpretation of Human and Non-Human Cosmos, and Cognition and Emotion: From Dichotomy to Ambiguity.

Education Nouvelle Et Sciences de L'éducation Bernard Schneuwly 2006 This book is about the tumultuous and even passionate relationship between New Education and Educational Sciences, which are regarded as an inseparable «couple», intrinsically linked and surprisingly fruitful. Yet they remain irreconcilable and are mutually contradictory in a number of their elements and characteristics. Do Educational Sciences offer a scientific base or ideological support for New Education? Do the numerous new educational initiatives and reforms provide a «laboratory» for Educational Sciences or alternatives to the new scientific paradigms? Is this at the risk of their merging? And what is the price of these tensions? Specialists in the history of Educational Sciences and New Education from various geographical, cultural and disciplinary horizons explore the complex links between this powerful reforming movement and the nascent disciplinary field that emerged during the first half of the 20th century. Cet ouvrage analyse les relations tumultueuses - passionnelles même - de l'Education nouvelle et des Sciences de l'éducation: un couple indissociable - intrinsèquement lié et d'une étonnante fécondité - autant qu'inconciliable, nombre de leurs présupposés et caractéristiques se contredisant mutuellement. Les Sciences de l'éducation offrent-elles la base scientifique ou l'appui idéologique de l'Education nouvelle ? Les nombreuses expériences et réformes éducatives constituent-elles des laboratoires des Sciences de l'éducation ou des alternatives aux nouveaux paradigmes scientifiques ? Au risque de leur fusion ? Au prix de quelles tensions ? Des spécialistes de l'histoire des Sciences de l'éducation et de l'Education nouvelle d'horizons géographiques, culturels et disciplinaires divers explorent les rapports complexes entre ce puissant mouvement réformiste et le champ disciplinaire naissant durant la première moitié du 20e siècle.

African Yearbook of International Law/Annuaire Africain De Droit International Abdulqawi A. Yusuf

1997-08-01 The "African Yearbook of International Law" provides an intellectual forum for the systematic analysis and scientific dissection of issues of international law as they apply to Africa, as well as Africa's contribution to the progressive development of international law. It contributes to the promotion, acceptance of and respect for the principles of international law, as well as to the encouragement of the teaching, study, dissemination and wider appreciations of international law in Africa. A clear articulation of Africa's views on the various aspects of international law based on the present realities of the continent as well as on Africa's civilization, culture, philosophy and history will undoubtedly contribute to a better understanding among nations. The "African Yearbook of International Law" plays an important role in examining the tensions underlying the State in Africa, and by shedding more light on the causes of the fragility of African State institutions so as to facilitate the identification of appropriate remedies. The tension and interrelationships among issues such as territorial integrity, self determination, ethnic diversity and nation-building are constantly addressed. Development, human rights and democratization in Africa are also the subject of continuous attention and examination. The Special Theme of this volume is: "Civil Conflicts in Africa (Part" "I)/ Les conflits internes en Afrique (1ere partie),"

Life Phenomenology of Life as the Starting Point of Philosophy Anna-Teresa Tymieniecka 2012-12-06 This collection presents perspectives into the pristine field of phenomenology/philosophy of life conceived by Tymieniecka, initiated in the *Analecta Husserliana* and unfolding with each volume. This new and original philosophy reaches to the 'inner workings of Nature' as well as to the innermost recesses of the Human Creative Condition, opening a basic starting point for all philosophy. Life, 'the theme of our times', finds at last a profound philosophical treatment.
