*Escherichia coli in the Americas* Alfredo G. Torres 2016-10-14 Bacterial diarrheal diseases remain an important leading cause of preventable death, especially among children under five in developing countries. In the American continent, diarrheal disease and other health complications caused by *Escherichia coli* constitute a major public health problem, and, therefore, several research groups have dedicated their effort to understand this pathogen and provide feasible solutions to prevent, treat and reduce *E. coli* infections. The Latin American Coalition for *Escherichia coli* Research (LACER) was created as a multidisciplinary network of international research groups working with *E. coli* with the ultimate goal of advancing understanding of *E. coli*, and to prepare the next generation of American *E. coli* investigators. As such, this book compiles the knowledge of these investigators about *E. coli*, a commensal bacteria living inside its host, and a pathogen causing disease in animals and humans. *Escherichia coli in the Americas* contains a series of 15 chapters written by experts, covering basic concepts regarding the different categories of *E. coli*, including their environmental niche, virulence mechanisms, host reservoir, and disease outcomes, as well as diagnosis, vaccine development and treatment. This book's target audience include trainees and students learning about the basic and clinical aspects of *E. coli* pathogenesis, as well as experts around the globe who wish to learn more about this pathogen and the public health impact this bacteria has in America.

**Immoral Memories** Sergei Eisenstein 2013-11-01 Republished for the first time since the 1980s, a legendary book on the cinema from one of the most important figures in the history of film Vivid, eccentric, and free-ranging, this memoir is written in a style reminiscent of the brilliant visual effects of montage and dynamic progression of the legendary Russian director. Eisenstein wittily portrays his life in Russia from the time of the Revolution, his travels in the West, and his encounters with an amazing medley of people on both sides of the Iron Curtain, including Charlie Chaplin, Marlene Dietrich, and Man Ray. With 48 pages of illustrations from the author's own collection, including photos and personal sketches, this is the fullest picture possible of a man and his films, from one of the most iconic eras of the art form.

Sharpening the Sword of State Andrew Podger 2016-11-11 Sharpening the Sword of State explores the various ways in which 10 jurisdictions in the Asia-Pacific enhance their administrative capabilities through training and executive development. It traces how modern governments across this region look to develop their public services and public sector organisations in the face of rapid global change. For many governments there is a delicate balance between the public interest in promoting change and capacity enhancement across the public service, and the temptation to micro-manage agencies and be complacent about challenging the status quo. There is a recognition in the countries studied that training and executive development is a crucial investment in human capital but is also couched in a much wider context of public service recruitment, patterns of entry and retention, promotion, executive appointment and career development. This empirical volume, authored by academics and practitioners, is one of the first to chart these comparative differences and provide fresh perspectives to enable learning from international experiences

**The Learning Industry** Nell P. Eurich 1990 This study focuses on the connection between education and the world of work and the urgency of the endeavor to educate the work force. Part I considers the resources for adult learning in the United States, with a focus on the major providers outside the traditional education system. Technological resources that can extend educational opportunities and reach more workers are then analyzed. Examples of each medium's use are given, and its limitations and effectiveness for instruction are charted. One new development is given special attention: artificial intelligence as an aid in training and education. Part II describes workers' training opportunities. It looks first at the skilled trades and technical fields: construction workers, office workers, administrative assistants, information systems technicians, and factory workers encountering computer-integrated manufacturing systems. Next, the education of managers is considered. Finally, updating knowledge of advanced professionals is examined. Examples from various providers show contributions toward available opportunities. Part III deals with those whom training programs fail to reach or serve adequately: dislocated workers, unemployed youth, immigrants and refugees, and welfare recipients. The report concludes that the issues call for public responsibility and action. Federal, state, and private initiatives are urged. Endnotes for each chapter and an index are appended. (YLB)

**Noise, Water, Meat** Douglas Kahn 2001-08-24 An examination of the role of sound in twentieth-century arts. This interdisciplinary history and theory of sound in the arts reads the twentieth century by listening to it—to the emphatic and exceptional sounds of modernism and those on the cusp of postmodernism, recorded sound, noise, silence, the fluid sounds of immersion and dripping, and the meat voices of viruses, screams, and bestial cries. Focusing on Europe in the first half of the century and the United States in the postwar years, Douglas Kahn explores aural activities in literature, music, visual arts, theater, and film. Placing aurality at the center of the history of the arts, he revisits key artistic questions, listening to the sounds that drown out the politics and poetics that generated them. Artists discussed include Antonin Artaud, George Brecht, William Burroughs, John Cage, Sergei Eisenstein, Fluxus, Allan Kaprow, Michael McClure, Yoko Ono, Jackson Pollock, Luigi Russolo, and Dziga Vertov.
