University and School Collaborations during a Pandemic Fernando M. Reimers 2021-11-05 Based on twenty case studies of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in

interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This challenges the view of universities as "ivory towers" being isolated from the surrounding environment and detached from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach.

New Pedagogical Challenges in the 21st Century Olga Bernad-Cavero 2018-07-04 The societies of the twenty-first century are subject to social, cultural, political, and economic changes. In this context, the school is asked to educate the future citizens in the present. To respond to this kaleidoscopic reality, the school is immersed in a pedagogical revolution. In this book, the reader will find a selection of avant-garde research works from different disciplines and contexts, which have their epicenter in the school and in the faculties of education. New issues in pedagogy and education, and new roles of teachers and students, are discussed in a global and diverse context. And new methodological and formative proposals are also proposed to build the ideal school and the ideal teacher, from the initial and continuous teacher training.

**Night Noise Guidelines for Europe** World Health Organization. Regional Office for Europe 2009 The WHO Regional Office for Europe set up a working group of experts to provide scientific advice to the Member States for the development of future legislation and policy action in the area of assessment and control of night noise exposure. The working group reviewed available scientific evidence on the health effects of night noise, and derived health-based guideline values. In December 2006, the working group and stakeholders from industry, government and nongovernmental organizations reviewed and reached general agreement on the guideline values and key texts for the final document of the "Night noise guidelines for Europe". Considering the scientific evidence on the thresholds of night noise exposure indicated by "Lnight,outside" [L suffix night,outside] as defined in the Environmental Noise Directive (2002/49/EC), an Lnight, outside of 40 dB should be the target of the night noise guideline (NNG) to protect the public, including the most vulnerable groups such as children, the chronically ill and the elderly. "Lnight,outside" value of 55 dB is recommended as an interim target for the countries where the NNG cannot be achieved in the short term for various reasons, and where policy-makers choose to adopt a stepwise approach. These guidelines are applicable to the Member States of the European Region, and may be considered as an extension to, as well as an update of, the previous WHO "Guidelines for community noise" (1999). **Enterprise Software Security** Kenneth R. van Wyk 2014-12-01 STRENGTHEN SOFTWARE SECURITY BY HELPING DEVELOPERS AND SECURITY EXPERTS WORK TOGETHER Traditional approaches to securing software are inadequate. The solution: Bring software engineering and network security teams together in a new, holistic approach to protecting the entire enterprise. Now, four highly respected security experts explain why this "confluence" is so crucial, and show how to implement it in your organization. Writing for all software and security practitioners and leaders, they show how software can play a vital, active role in protecting your organization. You'll learn how to construct software that actively safeguards sensitive data and business processes and contributes to intrusion

detection/response in sophisticated new ways. The authors cover the entire development lifecycle, including project inception, design, implementation, testing, deployment, operation, and maintenance. They also provide a full chapter of advice specifically for Chief Information Security Officers and other enterprise security executives. Whatever your software security responsibilities, Enterprise Software Security delivers indispensable big-picture guidance–and specific, high-value recommendations you can apply right now. COVERAGE INCLUDES: • Overcoming common obstacles to collaboration between developers and IT security professionals • Helping programmers design, write, deploy, and operate more secure software • Helping network security engineers use application output more effectively • Organizing a software security team before you've even created requirements • Avoiding the unmanageable complexity and inherent flaws of layered security • Implementing positive software design practices and identifying security defects in existing designs • Teaming to improve code reviews, clarify attack scenarios associated with vulnerable code, and validate positive compliance • Moving beyond pentesting toward more comprehensive security testing • Integrating your new application with your existing security infrastructure • "Ruggedizing" DevOps by adding infosec to the relationship between development and operations • Protecting application security during maintenance

*Education in Mother Tongue* A. Babs Fafunwa 1989 This book makes a case for the mother tongue as the medium of education for the first 12 years of the child's life. It describes Nigeria's 6-Year Primary Project, which taught experimental groups of students in their native Yoruba in varying degrees for their first 6 school years, beginning in 1970. The book shows how the mother-tongue education program was planned, organized, and implemented. Chapter 1 traces the historical background of mother-tongue education, describing educational policy and the primary school system under British rule, and the changes made thereafter. Chapter 2 describes plans for the project including initial goals and funding. Chapters 3 and 4 discuss curriculum development and production, describing how panels developed materials for mathematics, science, social studies, Yoruba, and English instruction. Chapter 5 describes teacher preparation, including workshops and on-the-job training. Chapter 6 describes instructional programs and objectives for each subject. Chapter 7 examines problems encountered during the project. Chapter 8 offers a comprehensive evaluation of the project, including methodology and longitudinal achievement test results (from the five sample groups) that compare several variables, including urban and rural settings. Chapter 9 offers observations and recommendations for other countries, noting literacy-rate improvement and enhancement of the instructional language itself. (TES)

**Language learning and professionalization in higher education: pathways to preparing learners and teachers in/for the 21st century** Béatrice Dupuy 2020-11-16 In this volume, language learning and professionalization are explored by addressing the existing gap between pressing needs for enhanced soft skills in work environments wherein technology-mediated, multilingual communication is increasingly the norm, and current foreign language teaching and learning offerings in higher education. Considering theoretical, methodological, and pedagogical perspectives for preparing language learners and teachers in/for the 21st century, this volume's eight chapters underscore that research findings should inform the design of learning experiences so that people's communication needs in fast-changing work environments are met and the link between language education and professionalization, within a lifelong learning perspective, is sustained.

**Advances in Computational and Bio-Engineering** S. Jyothi 2020-10-23 This book gathers state-of-the-art research in computational engineering and bioengineering to facilitate knowledge exchange between various scientific communities. Computational engineering (CE) is a relatively new discipline that addresses the development and application of computational models and simulations often coupled with high-performance computing to solve complex physical problems arising in engineering analysis and design in the context of natural phenomena. Bioengineering (BE) is an important aspect of computational biology, which aims to develop and use efficient algorithms, data structures, and visualization and communication tools to model biological systems. Today, engineering approaches are essential for biologists, enabling them to analyse complex physiological processes, as well as for the pharmaceutical industry to support drug discovery and development programmes.

**Teachers as Course Developers** Maria del Carmen Blyth 1996-02-23 Teachers as Course Developers is a book about how language teachers themselves rather than curriculum specialists develop and implement their own courses. It uses a unique case study approach featuring the stories of six teachers who successfully designed their own courses in different settings in Japan, the U.S., and Latin America. The book provides a framework for the processes of course development which any teacher can use in developing his or her own courses. Each chapter highlights a different aspect of the framework based on the particular teacher s approach and examines how the teacher has utilized or departed from the framework in meeting the challenges of a particular situation. Each narrative is followed by a set of tasks and discussion questions. An annotated bibliography is also included.

Contemporary Topics in Graduate Medical Education Stanislaw P. Stawicki 2019-10-09 Graduate medical education (GME) is a continually evolving, highly dynamic area within the complex fabric of the modern health-care environment. Given the rapidly changing regulatory, financial, scientific and technical aspects of GME, many institutions and programs face daily challenges of "keeping up" with the most recent developments within this ever-more-sophisticated operational environment. Organizational excellence is a requirement for the seamless functioning of GME programs, especially when one consider the multiple disciplines and stakeholders involved. The goal of the current book cycle, titled Contemporary Topics in Graduate Medical Education, beginning with this inaugural tome, is to provide GME professionals with a practical and readily applicable set of reference materials. More than 20 distinguished authors from some of the top teaching institutions in the US, touch upon some of the most relevant, contemporary, and at times controversial topics, including provider burnout, gender equality issues, trainee wellness, scholarly activities and requirements, and many other theoretical and practical considerations. We hope that the reader will find this book to be a valuable and high quality resource of a broad range of GME-related topics. It is the Editors' goal to create a multi-tome platform that will become the definitive go-to reference for professionals navigating the complex landscape of modern graduate medical education.
