Jack Brennan is the Chairman and Chief Executive Officer of The Vanguard Group. Death by Day Trading Zordi Cobre 2017-10-04 What is that lyric in that one song? "The lure of easy money has a very strong appeal". Maybe you decided to get into the day trading business of investing and/or investing and trading because you saw some late-night TV commercial about day trading with flashy offers. Perhaps you received a spam e-mail touting some day trading method or system that said you could make easy money in the markets; I suggest you reconsider if that's the case. *Death by Day Trading* is for all beginning aspiring investors and traders who are just getting their head around doing the day trading business who go online and do a search to find information on how to do financial market trading and it should be the first book a brand new beginner reads before any other books on trading as far as I'm concerned and will be the most harsh and brutal day trading book they have ever read. Everyone has their own ideas of what they think day trading is and what it can do for them; you need to look at it from a realistic perspective from the start and *Death by Day Trading* is absolutely going to help you to do that. This book is for beginners and will detail many of the things that a brand new trader must learn not to do before they can become consistently profitable in the live markets. You're heard the saying "just say no to drugs", just say no to day trading and you and your account will be waaaaay ahead of the game to start off. Don't say I didn't warn you, OK, continue with your insanity and read the entire book to give yourself a fighting chance. *Death by Day Trading* can help you keep it simple and filter the huge amount of information out there down to only what you need to know right away and then can work towards adding more information and studies as you go. My trading philosophy is to start small and build on success have limited exposure while you hone your skills, then progress as you become more competent. You can use *Death by Day Trading* and the references, suggestions and tips in it to go further into your educational studies of the markets and their dynamics. Knowing market dynamics is going to be critical for you to have the winning edge you will need to be a successful market participant. By studying what this book suggests you will not become one of the 97% of the sheeple of the herd, don't become one of them.

Financial Straight Talk Dee Mosier 2010-09-07 Your #1 goal should be to have money for retirement. We all want the finer things in life; we are a society obsessed with instant gratification. However, all of your decisions (the financial ones, at least) should be primarily based on both your future and your retirement. With this as an overall theme, this book will walk you down the road to retirement, providing you with options and choices that are most appropriate for your particular situation. No one said the road would be easy, but do not worry, we will face those speed bumps head on, and we will do it together. The best time to start planning for retirement is now! A significant change in the last 20 years is the position of global investments. In 1990, 75 percent of investment opportunities were in the United States and 25 percent in other places around the world. Currently, it is almost the opposite with about 75 percent of the opportunities outside the United States. The U.S. is still the #1 financial leader in the world. Japan is #2. In 2010, China overtook Germany to become #3. We need to recognize that other countries are maturing and we want to make sure you have considered all investment opportunities that exist. By the end of this book, you will be comfortable enough to make your own decisions regarding your investments. If you are not, it will allow you to be comfortable asking any financial consultant the right questions. This book is about giving you new tools. So, we brought in Morningstar® to enable you to evaluate your options and introduced a global perspective to help you maximize potential returns. Think of it this way: if this were your favorite coffee blend (with all the right ingredients), you would want a refill.
