Asian Perspectives on Teacher Education Shin'ichi Suzuki 2013-09-13 Research into teacher education is dominated by Anglophone literature, with the inevitable result that teacher education in non-English speaking regions of the world largely remains unexamined. This book fills the gap in the existing literature and comprises twelve invited contributions from an international panel of educationists. To provide the reader with a clear structure, the book offers a detailed introduction and afterword which brings together the various themes examined in each chapter. The contributions offer perspectives on teacher education in the Asian region, perspectives which, until now, have been missing from contemporary debate on teacher education. Presenting research from Australia, Japan, the USA, the People's Republic of China, the Republic of Korea and Vietnam, this book examines the varied situations teacher educators experience in their own countries; in so doing the researchers identify resonances and dissonances in comparison with the dominant Anglophone research literature on the same subjects. This book is an important contribution to the comparative study of teacher education in the first decade of the twenty-first century, giving a voice to an important sector of the international community of teacher educators. This book was published as a special issue of Journal of Education for Teaching: International research and pedagogy.

Total Quality Management in Education Marmar Mukhopadhyay 2020-07-01 This is a complete revised edition of a popular text on Total Quality Management (TQM). First published in 2001, the book has been translated into many languages and highly praised by readers globally. In spite of the difficulties in defining and capturing 'quality' in a framework, the author admirably succeeds in helping readers to understand the role of TQM in improving the quality of education. The book combines extensive literature review with the author's own experience as an institution builder and his experiments on quality management to develop a practical guide for quality improvement for institutional leaders. The book introduces Shewhart, Lewin, Deming, Juran, Crosby, Ishikawa, Taguchi and a number of other quality gurus to the readers. It proposes a new set of TQM principles that a good leader should apply. Enriched with several examples from the field situation and local metaphors, *Total Quality Management in Education* is an easy read and a must-have practical guide to quality management.

can have a detrimental impact on children's emotional well-being and their educational attainment. The Committee's report examines issues relating to the education of the children of armed forces service personnel, including Service schools overseas and the performance of the Ministry of Defence's agency, Service Children's Education (SCE), which is responsible for providing these schools, as well as issues affecting Service children in UK state-maintained and independent sector day and boarding schools. The Committee concludes that Service personnel deserve assurance that their children's education will not suffer because of their parent's employment, and expresses its doubts that the DfES and the MoD currently take the interests of Service children sufficiently into account. Findings include: the need for better co-ordination between the MoD, the DfES and the devolved administrations to ensure continuity of education for children moving between different parts of the UK; the DfES needs to undertake work to determine how many Service children are in UK schools and the system for transferring student records between schools needs to be improved, particularly for Service children with special needs; and the MoD should increase the provision of telephones and internet access for Service personnel on operations so that they can communicate with their children.

Internationalization of Teacher Education and the Nation State Rita Z. Nazeer-Ikeda 2020-10-29 The relationship between teacher education and internationalization is often regarded as one that has just begun, sparked by globalization and its knowledge economy. This book questions such an assumption by arguing that although contemporary demands on teacher education have intensified the need for internationalization, teacher education and internationalization have a deep and complex relationship, which is context dependent and has developed differently over time. This book urges its readers to question and rethink overly nationalistic approaches to teacher education. It shows how the internationalization of teacher education could be used as a strategic tool to support sustainable educational development and meet labor market demands for twenty-first century competencies. It puts the spotlight on the imperatives for internationalizing teacher education and its present forms, and considers this current phenomenon in the context of Singapore. This nation state has a history of internationalization, albeit with differing rationales, dimensions and strategies. Internationalization has been a key driver of the Singapore education system's sustained growth, from its humble beginnings to its present state as one of the best performing education systems in the world.

schools. The book showcases 15 detailed case studies of courses at institutions across North America, Europe, Asia, and Africa—including from countries currently underrepresented in middle level literature—which provide detailed information on programming whilst foregrounding the political, social, and cultural factors which have influenced priorities within teacher education. Underpinning the book is a comparative case study framework, used to identify divergences and commonalities within and across nations whereby factors such as globalization, policy, and socio-cultural views of teaching and adolescence are explored as determinants of the nature, success, and challenges of middle level teacher preparation. This text will benefit scholars, academics, and students in the fields of middle level education, teacher education, and international and comparative education. Those involved with educational policy and politics, as well as teacher training and the sociology of education more broadly, will also benefit from this volume.
