Aerobiology Michael L. Mulenberg 2018-04-20 Aerobiology is the study of airborne particles that have an impact on humans and other organisms. Every day, we are exposed to airborne particles, including "natural" particles such as pollen, bacteria, and fungi, and "unnatural" particles, such as asbestos fibers and noxious chemicals. Aerobiology highlights the current interests in this field, primarily the ecology and distribution of airborne particles and their effects on health.

Surviving Mold Ritchie C. Shoemaker 2010 Microbes, especially molds and bacteria, growing in water-damaged buildings make people sick. The book follows Mold Warriors (published in 2005) as the definitive source of information on "mold" illness, its basis in inflammation, its physiology and its links to politics, lawsuits and science. It has true stories, regarding this increasingly common problem in the US and around the world. If you already know that you could be sickened by mold-damaged buildings, this book will guide you through diagnosis and treatment, through remediation and return to health.

International Financial Transactions and Exchange Rates I. Kallianiotis 2013-12-18 International transactions among nations and multinational corporations are important and growing due to the openness of economies all over the world. In this follow-up title to Exchange Rates and International Financial Economics, Kallianiotis examines the role of the exchange rate and trade policy in improving the trade account. He discusses the international parity conditions extensively, together with the most popular theory in international finance, the interest rate parity (IRP) theory. International Financial Transactions and Exchange Rates describes these theories and gives practical solutions for multinational businesses, individuals, and nations. The increasing internationalization of businesses, openness of economies, integration of nations, change in the exchange rate system, and lastly, the deregulation of the financial market and institutions around the world have made the study of international finance necessary for all business students and professionals.

The Nibelungenlied (Prose Translation) Daniel B. Shumway 2019-05-23 The Nibelungenlied ("The Song of the Nibelungs") is an epic poem originally written in Middle High German around the year 1180. It tells the story of the dragon-slayer Siegfried at the court of the Burgundians, how he was murdered, and of his wife Kriemhild's revenge. Along with the Völsunga saga, the Nibelungenlied served as source material for Richard Wagner's famous four music dramas Der Ring des Nibelungen ("The Ring of the Nibelung"), although the storyline in the Nibelungenlied is far more extensive than in Wagner's work. Based on pre-Christian Germanic heroic motifs which include ancient oral traditions (including the Norse sagas), the Nibelungenlied first appeared from the area of the Danube between Passau and Vienna, from where the oldest manuscripts originate. The epic is divided into two parts, the first dealing with the story of Siegfried and Kriemhild, the wooing of Brünhild and the death of Siegfried at the hands of Hagen, and Hagen's hiding of the Nibelung treasure in the Rhine (Chapters 1-19). The second part deals with Kriemhild's marriage to Etzel (Atilla the Hun), her plans for revenge, the journey of the Burgundians to the court of Etzel, and their last stand in Etzel's hall (Chapters 20-39). The original was written as a poem in 2,400 stanzas, divided up into 39 Aventiuren ("adventures"). This edition has been translated into prose format, but still accurately follows the storyline of all the Adventures. It includes a complete background introductory essay by the translator, in which the history of the surviving manuscripts and their storylines are fully explored. About the translator: Daniel Bussier Shumway (1868-1940), served as Professor of Germanic Languages and Literature at University of Pennsylvania.

Idaho State Parks Rick Just 2017-05-15 Idaho's state parks have been called the "jewels" of the Gem State. The story of how those jewels came to be involves political intrigue, much resistance, some philanthropy, and a touch of irony. Sen. Weldon B. Heyburn famously said that state parks were "always a political embarrassment." Idaho's first state park was named after him. Today, Idaho's 30 state parks host five million people a year. Visitors come to boat, camp, bike, climb, hike, fish, and make memories in the great outdoors. This book tells the story of Idaho's diverse state parks--from Priest Lake in

Identifying Filamentous Fungi Guy St-Germain 1996 IDENTIFYING FILAMENTOUS FUNGI: A CLINICAL LABORATORY HANDBOOK, by Guy St. Germain & Richard Summerbell. Medical mycology is a rapidly expanding discipline, increasing in importance & complexity. The dramatic increase in the number of immunocompromised patients, due to aids, indwelling devices, immunosuppression drugs & AIDS has lead to a dramatic increase in the number of mycotic infections. This has made it more important than ever for people in biomedical laboratories to develop & maintain expertise in mycology. IDENTIFYING FILAMENTOUS FUNGI: A CLINICAL LABORATORY HANDBOOK, is a clear, guide to the identification of filamentous fungi, organisms mainly recognized through the microscopic examination. The authors provide a number of identification tools: precise drawings, photomicrographs, & color photographs for each of the many genera & species that are common & uncommon in clinical laboratories. An illustrated key is provided to make identification as easy as possible. Additionally clinical mycology methodology is presented in an easy-to-follow format. ISBN: 0-89863-177-7 Star Publishing Company, P.O. Box 68, Belmont, CA 94002. Phone (650) 591-3505; fax (650) 591-3898 email: mail@starpublishing.com

WHO Guidelines for Indoor Air Quality World Health Organization 2009 Microbial pollution is a key element of indoor air pollution. It is caused by hundreds of species of bacteria and fungi, in particular filamentous fungi (mould), growing indoors when sufficient moisture is available. This document provides a comprehensive review of the scientific evidence on health problems associated with building moisture and biological agents. The review concludes that the most important effects are increased prevalences of respiratory symptoms, allergies and asthma as well as perturbation of the immunological system. The document also summarizes the available information on the conditions that determine the

presence of mould and measures to control their growth indoors. WHO guidelines for protecting public health are formulated on the basis of the review. The most important means for avoiding adverse health effects is the prevention (or minimization) of persistent dampness and microbial growth on interior surfaces and in building structures. [Ed.]

Career As a Nurse Anesthetist Institute for Career Research 2015-06-26 YOU'VE SEEN THE OLD WESTERN movies when someone who has been shot is given a bullet to clench between his teeth so he won't bite his tongue off during surgery. Prior to the advent of anesthesia in the mid-1800s, even the most modest of surgeries were usually excruciatingly painful for patients. Since then, the field of anesthesiology has advanced significantly, offering patients a painless, comfortable, and safe surgical experience. Each year in the United States, approximately 30 million people receive anesthetics, with certified registered nurse anesthetists (CRNAs) administering approximately 65 percent of them. The oldest recognized nursing specialists, nurse anesthetists have touched millions of lives over the years. Although anesthesia may be thought of as merely putting patients to sleep so they will not experience surgical pain, nurse anesthetists also play an important role acting as the patient's eyes and ears during surgery, essentially serving as a patient advocate because the patient is unconscious and cannot speak. Often the CRNA is the last person a patient sees before being put under, and it is the CRNA who offers comfort and confident reassurance, and then proceeds to watch over the patient like a guardian angel. CRNAs are an integral part of the entire operative process. After inducing sleep, they monitor vital signs, adjust anesthesia levels, and wake the patient after surgery. Throughout, they are vigilant monitors of every heartbeat and every breath, as they must be ready to respond if something is not right, such as a patient having a negative response to a certain anesthetic. Fortunately, according to a recent Institute of Medicine report, due to advances in the field, anesthesia is approximately 50 times safer than it was as recently as the 1980s. Nurse anesthetists have been blazing trails in the field since the Civil War, when they were responsible for giving soldiers ether during surgery. Since then they have been the principal providers of anesthesia care to US military personnel on the front lines. The CRNA credential was first established in 1956, and today approximately 42,000 nurse anesthetists throughout the United States administer anesthesia for all types of surgical procedures, from simple to complex. They also work in a variety of settings, from hospitals to private healthcare practices of dentists, podiatrists, ophthalmologists, plastic surgeons, and pain management specialists. On an international basis, according to the International Federation of Nurse Anesthetists, CRNAs are solely responsible for providing 60 percent of anesthesia worldwide and are the predominant providers of anesthesia in rural areas and developing countries. Being a nurse anesthetist is exciting, challenging, and rewarding. They are among the highest paid of all nurses, with salaries typically in the six-figure range. In addition, nurse anesthetists are in great demand and have been so since the late 1980s. If you are thinking of a career as a nurse or are currently a registered nurse (RN) who is thinking about going on to become a CRNA, this report will provide you with valuable information on everything from the history of the field and career duties, to educational requirements and a first-hand look at the field through the eyes of its practitioners.

Musings of an Energy Nerd Martin Holladay 2016-01-05 In this fascinating collection of postings from his popular "Musings of an Energy Nerd" blog, Green Building Advisor's Martin Holladay cuts through the hype and myths about energy efficiency, sustainability, and green building to present the very best ways to make your home more energy efficient. Martin Holladay has been making weekly postings to his "Musings of an Energy Nerd" blog on Green Building Advisor since January 2009. Along the way, he has gathered a devoted following of "energy nerds" who await his weekly musings with rapt anticipation. For the first time, the 50 most popular postings have been assembled in book form to give homeowners a great opportunity to live a more energy-efficient life in their homes. The book begins with an overview of energy priorities, and a discussion of what we mean by terms like green and sustainable. Martin presents several options for energy upgrades for an existing house (from replacing windows to adding superinsulation) before looking at ways to improve the energy efficiency of a new house. Separate chapters follow on HVAC, domestic hot water, appliances, and renewable energy, before the book wraps up with an eye-opening chapter on useless products, scams, and myths (including Martin's list of "Stupid Energy-Saving Tips").

Too Much Loss: Coping with Grief Overload Alan Wolfelt 2020-09-01 Grief overload is what you feel when you experience too many significant losses all at once, in a relatively short period of time, or cumulatively. In addition to the deaths of loved ones, such losses can also include divorce, estrangement, illness, relocation, job changes, and more. Our minds and hearts have enough trouble coping with a single loss, so when the losses pile up, the grief often seems especially chaotic and defeating. The good news is that through intentional, active mourning, you can and will find your way back to hope and healing. This compassionate guide will show you how.
