UPDATE '06.2014 2014-05-22 Smartfony i tablety na dobre zagościły w naszej codzienności. Stały się obowiązkowymi przedmiotami, jak portfel czy klucze, bez których nie opuszczamy domu. Zjawisko to ma swoje dobre i złe strony, gdyż może w skrajnych przypadkach prowadzić do uzależnień —zatarcia świata wirtualnego z rzeczywistym, ale niezaprzeczalny jest fakt, że wraz z rozwojem technologicznym, przenośne słuchawki coraz bardziej ułatwiają wykonywanie codziennych obowiązków. **UWAGA:** W odpowiedzi na liczne komentarze informujemy, że konieczność podania numeru karty przy próbie pobrania magazynu to wymóg Google. Transaction Cost Management Chihiro Suematsu 2014-08-07 All organizations, institutions, business processes, markets and strategies have one aim in common: the reduction of transaction costs. This aim is pursued relentlessly in practice, and has been perceived to bring about drastic changes, especially in the recent global market and the cyber economy. This book analyzes and describes “transactions” as a model, on the basis of which organizations, institutions and business processes can be appropriately shaped. It tracks transaction costs to enable a scientific approach instead of a widely used “state-of-the-art” approach, working to bridge the gap between theory and practice. This open access book analyzes and describes “transactions” as a model...

Entwicklung und Konstruktion einer Kupplung für eine hydraulische Fahrrad Seitenwagenbremse
Alexander Schubert 2008-07-07 Diplomarbeit aus dem Jahr 2007 im Fachbereich Ingenieurwissenschaften -

Fahrzeugtechnik, Note: 2,7, Hochschule für Technik und Wirtschaft Berlin, 5 Quellen im Literaturverzeichnis, Sprache: Deutsch, Abstract: Im Rahmen der vorliegenden Diplomarbeit soll eine Kupplung für eine hydraulische Fahrrad Seitenwagenbremse, bei einem Tourenrad der Marke SMIKE, entwickelt und konstruiert werden. Hierbei handelt es sich um ein Fahrrad mit abnehmbarem Seitenwagen, der als Beifahrersitz ebenso wie als Transportfläche dient. Dieser Seitenwagen ist für eine maximale Zuladung von 75 kg zugelassen und verfügt serienmäßig über Aufnahmen für einen Kindersitz. Durch die drehbare Lagerung ist auch bei angekoppeltem Seitenwagen die Schräglagenfähigkeit des Fahrrades gewährleistet. Wie in Bild 1 zu sehen ist, kann das Modell optional mit einem elektrischen Unterstützungsantrieb in Form einer Radnabenmotors am Vorderrad ausgestattet werden. Die Diplomarbeit wird bei der Firma HAWK Bikes Entwicklung und Marketing GmbH in Berlin angefertigt. Zusammen mit dem Schweizer Unternehmen SMIKE AG, wurde das Fahrrad und der Seitenwagen entwickelt und ging Mitte des Jahres 2006 in Serie. Jetzt soll der Seitenwagen mit einer hydraulischen Felgenbremse der Marke MAGURA ausgestattet und an die Hinterradbremse des Fahrrades angeschlossen werden. Notwendig macht dies die noch ausstehende, vom Schweizer Bundesamt für Strassen (Astra), kantonale Bewilligung für den Personentransport auf dem Fahrrad Seitenwagen.

Bicycling Science, third edition David Gordon Wilson 2004-03-19 A new, updated edition of a popular book on the history, science, and engineering of bicycles. The bicycle is almost unique among human-powered machines in that it uses human muscles in a near-optimum way. This new edition of the bible of bicycle builders and bicyclists provides just about everything you could want to know about the history of bicycles, how human beings propel them, what makes them go faster, and what keeps them from going even faster. The scientific and engineering information is of interest not only to designers and builders of bicycles and other human-powered vehicles but also to competitive cyclists, bicycle commuters, and recreational cyclists. The third edition begins with a brief history of bicycles and bicycling that demolishes many widespread myths. This edition includes information on recent experiments and achievements in human-powered transportation, including the "ultimate human-powered vehicle," in which a supine rider in a streamlined enclosure steers by looking at a television screen connected to a small camera in the nose, reaching speeds of around 80 miles per hour. It contains completely new chapters on aerodynamics, unusual human-powered machines for use on land and in water and air, human physiology, and the future of bicycling. This edition also provides updated information on rolling drag, transmission of power from rider to wheels, braking, heat management, steering and stability, power and speed, and materials. It contains many new illustrations.
