Asphalt in Pavement Maintenance Asphalt Institute 1983 This is a how-to-do-it manual, limited to specific information on the use of asphalt in pavement maintenance. Planning, programming, financing and administration of maintenance are beyond its scope. Usually, money for pavement maintenance is limited and the maintenance man is called upon to "make one dollar do the work of two;" this is not easy. Large differences in soil types, climate, terrain, traffic and other factors make for greatly varying problems, even within small areas. Some regions are rugged and mountainous while others are fairly smooth and level; some have heavy rainfall, others are semi-arid; some highways and streets must accommodate vehicles carrying coal, ore, logs, or other heavy loads, while others are subjected to only light-weight traffic.
