Will Tomas find his father . . . or will the Brockenspectre find him?

US-Chinese Strategic Triangles S. Mahmud Ali 2017-06-07 This book reveals the nature of Sino-US strategic competition by examining the influence exerted by major secondary stakeholders, e.g. Japan, Russia, India, the Koreas, and ASEAN, on the two powers, USA and its rival China, who consider each other as a source of greatest challenges to their respective interests. By adopting “strategic triangles” as the analytical framework and assessing triangular relational dynamics, such as US-China-Japan or US-China-Russia, the author illustrates how secondary stakeholders advance their own interests by exploiting their respective linkages to the two rivals, thereby, shaping Sino-US competitive dynamics. This work adds a regional and multivariable perspective to the understanding of the Indo-Pacific's insecurity challenges.

Philosophical Foundations of Quality of Life Alex C. Michalos 2017-06-14 This first volume has as its main

focus the philosophical foundations of Michalos' work and describes it in the broad context of the study of logic, the philosophy of social sciences, and a general theory of value. After distinguishing things that have value from the value that things might have, it describes the foundations of a pragmatic theory of value. This theory plays a key role in the author's research on the quality of life and connects his empirical research to the philosophical tradition of the American pragmatists William James, Ralph Barton Perry, John Dewey and Clarence Irving Lewis. The volume addresses various aspects and issues concerning decision making, including decision procedures used in committees, used for assessing the acceptability of scientific theories and new technologies, procedures for a science court, ethical issues involved in the formation of beliefs, some limitations of classical economists' alleged postulates of rational preference, and the importance of analytic guides to decision making. Finally, it describes the organization of the Social Sciences Federation of Canada and a formal accounting system for scientific research.

Revolution Song Russell Shorto 2017-11-07 With America's founding principles being debated today as never before, Russell Shorto looks back to the era in which those principles were forged. Drawing on new sources, he weaves the lives of six people into a seamless narrative that casts fresh light on the range of experience in colonial America on the cusp of revolution. While some of the protagonists—a Native American warrior, a British aristocrat, George Washington—play major roles on the field of battle, others—a woman, a slave, and a laborer—struggle no less valiantly to realize freedom for themselves. Through these lives we understand that the Revolution was, indeed, fought over the meaning of individual freedom, a philosophical idea that became a force for violent change. A powerful narrative and a brilliant defense of American values, *Revolution Song* makes the compelling case that the American Revolution is still being fought today and that its ideals are worth defending.

Learning Portuguese as a Second Language Sandra Figueiredo 2017-04-23 This volume examines the specific effects that schools have on the performance of immigrant students and linguistic minority groups.

Especially in the European context this study fills a gap in examining the effects that schools have on these students' performance and performance differentiation, taking into account school related factors such as resources and teachers, and the influence of other variables like mother tongue and socioeconomic status. This report on an ongoing research project in Portugal examines state schools within the same district, in the same tests over the same assessment period. The study is based on the following set of relationships: between schools that administer proficiency tests to their non-native students; schools that do not use such tests; and schools with verifiable support programs (including physical and digital materials); and between the effect of the school and the predictive values of the nationality, mother tongue and socioeconomic status variables on the performance of non-native students of Portuguese.

Kingdom of Twilight Steven Uhly 2018-08-07 A "powerful and original" (The Times) historical saga that follows the quest for identity, redemption and home in the wake of World War II. One night in autumn 1944, a gunshot echoes through the alleyways of a small town in occupied Poland. An SS officer is shot dead by a young Polish Jew, Margarita Ejzenstain. In retaliation, his commander orders the execution of thirty-seven Poles--one for every year of the dead man's life. First hidden by a sympathetic German couple, Margarita must then flee the brutal advance of the Soviet army with her newborn baby. So begins a thrilling panorama of intermingled destinies and events that reverberate from that single act of defiance. *Kingdom of Twilight* follows the lives of Jewish refugees and a German family resettled from Bukovina, as well as a former SS officer, chronicling the geographical and psychological dislocation generated by war. A quest for identity and truth takes them from refugee camps to Lübeck, Berlin, Tel Aviv, and New York, as they try to make sense of a changed world, and of their place in it. Hypnotically lyrical and intensely moving, Steven Uhly's epic novel is a finely nuanced yet shattering exploration of universal themes: love, hatred, doubt, survival, guilt, humanity, and redemption.
