The Stainless Steel Carrot Sylvia Wilkinson 2012-09-15 In 1970, Sylvia Wilkinson was a writer in the category known as 'young Southern Woman Novelist'. While her novels and teaching paid the bills she had a passion for motorsports that led her to write *The Stainless Steel Carrot: An Auto Racing Odyssey*. The book profiled young up-and-coming road racer John Morton as he raced the BRE Datsun 510 in the 1971 and 1972 SCCA Trans-Am 2.5 Challenge. John won the championships and continued on a road-racing career that saw dozens of championship level victories around the country and abroad. The book, well regarded among both racers and general audience readers, has been out of print since 1973. Original copies often sell for over \$100 online and at collectors events. Now, thanks to years of requests from fans, and Sylvia's interest in animals, the book is republished with additional material. -- Amazon.com.

African Kings and Black Slaves Herman L. Bennett 2018-09-10 As early as 1441, and well before other European countries encountered Africa, small Portuguese and Spanish trading vessels were plying the coast of West Africa, where they conducted business with African kingdoms that possessed significant territory and power. In the process, Iberians developed an understanding of Africa's political landscape in which they recognized specific sovereigns, plotted the extent and nature of their polities, and grouped subjects according to their ruler. In *African Kings and Black Slaves*, Herman L. Bennett mines the historical archives of Europe and Africa to reinterpret the first century of sustained African-European interaction. These encounters were not simple economic transactions. Rather, according to Bennett, they involved clashing understandings of diplomacy, sovereignty, and politics. Bennett unearths the ways in which Africa's kings required Iberian traders to participate in elaborate diplomatic rituals, establish treaties, and negotiate trade practices with autonomous territories. And he shows how Iberians based their interpretations of African sovereignty on medieval European political precepts grounded in Roman civil and canon law. In the eyes of Iberians, the extent to which Africa's polities conformed to these norms played a significant role in determining who was, and who was not, a sovereign people—a judgment that shaped who could legitimately be enslaved. Through an examination of early modern African-European encounters, *African Kings and Black Slaves* offers a reappraisal of the dominant depiction of these exchanges as being solely mediated through the slave trade and racial difference. By asking in what manner did Europeans and Africans configure sovereignty, polities, and subject status, Bennett offers a new depiction of the diasporic identities that had implications for slaves' experiences in the Americas.

Manufacturing Facilities Design and Material Handling Fred E. Meyers 2005 This project-oriented facilities design and material handling reference explores the techniques and procedures for developing an efficient facility layout, and introduces some of the state-of-the-art tools involved, such as computer simulation. A "how-to," systematic, and methodical approach leads readers through the collection, analysis and development of information to produce a quality functional plant layout. Lean manufacturing; work cells and group technology; time standards; the concepts behind calculating machine and personnel requirements, balancing assembly lines, and leveling workloads in manufacturing cells; automatic identification and data collection; and ergonomics. For facilities planners, plant layout, and industrial engineer professionals who are involved in facilities planning and design.

The Lockheed Plant Joe Kirby 2011 The Lockheed Plant in Marietta has been building many of the world's

most legendary aircraft for the past 60 years--and that doesn't even count its service building B-29 bombers for the Bell Aircraft Company during World War II. Lockheed's six decades have seen the plant build jet bombers, like the B-47 Stratojet; the world's most dominant fighter jet (the F-22 Raptor); and the most vaunted cargo planes (C-130 Hercules, C-141 StarLifter, and C-5 Galaxy). In *Images of America: The Lockheed Plant*, readers will learn about those planes, the people who designed and assembled them, and the plant in which they were built. The striking images in this book were shared by Lockheed Martin and the Marietta Daily Journal and depict the plant from its construction through today.

Reviving America: How Repealing Obamacare, Replacing the Tax Code and Reforming The Fed will Restore Hope and Prosperity Steve Forbes 2015-12-04 Conservative icon Steve Forbes returns with his most powerful and provocative ideas yet. The United States has been through one of the most tumultuous decades in recent history. Polls show people on both sides of the ideological divide believe that the country has gone off track. If something isn't done quickly, Americans face a bleak future—continuing decline and disarray in a world that grows ever more dangerous. Steve Forbes, two-time candidate for the GOP presidential nomination and Forbes Media Chairman, explains how today's malaise has been caused by years of Obama's destructive policies, a broken tax system, and the Federal Reserve's Soviet-style controls over credit and money. The problems are challenging. But Forbes tells us that, with the right policies, the country can bounce back faster than people think. In this compelling and much-needed book, he sets forth a three-part plan to revive America. **Patient-Driven Healthcare:** The problem with healthcare, Forbes says, is that Big Government, health insurance companies, and employers are in control, not you, the patient. The key to getting high-quality, affordable healthcare is increasing competition and choice, and putting patients in charge. **Enact a Flat Tax:** Today's complex, corrupt tax code must be scrapped. The best answer is a simple Flat Tax. Forbes shows how this very bold reform would free America from the IRS and unleash an unprecedented wave of prosperity. **A Sound Dollar as Good as Gold:** With its ever-fluctuating "fiat" dollar, the Federal Reserve has blocked a real recovery and is the prime cause of today's stagnant, crisis-ridden economy. The answer? Take the dollar out of the hands of the Washington politicians by returning to a monetary system with the value of the dollar linked to gold. A clear and vital guide, *Reviving America* shows how the United States can recover the optimism and entrepreneurial dynamism that made it the greatest nation in history. These are 21st century solutions—not the failed ideas of the recent past. Forbes offers specific ideas and plans, not generalities and bromides, and is challenging policy makers to do the same. Steve Forbes is the coauthor of *Money*, the New York Times bestseller *Power Ambition Glory*, and the Wall Street Journal bestseller *How Capitalism Will Save Us*. Forbes is the Chairman and Editor-in-Chief of Forbes Media, which published

Solve It with Salt Patty Moosbrugger 1998 Presents more than one hundred practical and ingenious ways to put common table salt to use, from removing coffee stains and polishing copper to rejuvenating skin and removing odors, and includes a collection of salt trivia, recipes, and a list of salt museums and mines. Original.

If it Fitz Jim Fitzgerald 1985

The Austin Seven Jonathan Wood 2008-09-23 One of the most famous of British cars, the diminutive but robust 750cc Austin Seven, introduced in 1922, changed the course of automobile design and proved the viability of the small-capacity four-cylinder car. The salvation of the Austin company, it was aimed at families who might otherwise have travelled by motorcycle and sidecar, and it remained in production until 1939. The Seven performed as well on the race track as it did on the road and inspired a team of magnificent twin overhead camshaft single-seaters. It survives in respectable numbers to provide new generations of enthusiasts with a practical, economical car to run, race and restore.
